Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2014.

Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

Attached hereto and incorporated herein by reference as Exhibit 1.01 is the Griffon Corporation 2014 Conflict Minerals Report. Included within the Conflict Minerals Report are disclosures of:

- (a) Our Reasonable Country of Origin Inquiry (“RCOI”) of necessary Conflict Minerals (as defined under Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Act”)), conducted in good faith, to determine whether any Conflict Minerals in our supply chain originated in the Democratic Republic of the Congo or an adjoining country (as defined in the Act as “DRC”), or are from recycled or scrap sources;
- (b) Our determination and results of our RCOI;
- (c) Our due diligence measures performed in accordance with the Organization for Economic Development and Cooperation (“OECD”) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High Risk Areas; and
- (d) The results of our OECD due diligence.

This Form SD and our 2014 Conflict Minerals Report can be found on our website at www.griffoncorp.com. Both Form SD and the 2014 Conflict Minerals Report will be maintained on our website for a 12 month period.

Item 1.02 Exhibit

Griffon Corporation’s 2014 Conflict Minerals Report is attached hereto as Exhibit 1.01 and incorporated herein by reference.

Section 2 - Exhibits

Item 2.01 Exhibits

The following exhibit is filed as part of this report.

Exhibit 1.01: 2014 Conflict Minerals Report of Griffon Corporation

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Date: May 26, 2015

Griffon Corporation
2014 Conflict Minerals Report

Introduction

This report for the year ended December 31, 2014 is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934 (the “Rule”) requiring certain SEC registrants to disclose (i) their use of Conflict Minerals (as defined under Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Act”)), (ii) whether those Conflict Minerals originate from the Covered Countries and (iii) whether the sale of those Conflict Minerals financed or benefited armed groups in the Covered Countries. Conflict Minerals include columbite-tantalite (referred to as coltan), cassiterite, gold, wolframite, and their derivatives, limited to tantalum, tin and tungsten (“3TG”). The Covered Countries for the purposes of the Rule and this Report are the Democratic Republic of Congo, the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia and Angola (collectively, “the DRC”).

Overview

This report has been prepared by Griffon Corporation (the “Company” or “Griffon”).

Company and Product Overview

Griffon is a diversified management and holding company that conducts business through wholly-owned subsidiaries. Griffon currently conducts its operations through three business segments: Home & Building Products (“HBP”), Telephonics Corporation (“Telephonics”) and Clopay Plastic Products Company (“Plastics”).

- HBP consists of:
 - o The AMES Companies, Inc. (“AMES”), a global provider of non-powered landscaping products for homeowners and professionals.
 - o Clopay Building Products (“CBP”), a manufacturer and marketer of residential, commercial and industrial garage doors to professional installing dealers and major home center retail chains.
- Telephonics designs, develops and manufactures high-technology integrated information, communication and sensor system solutions for military and commercial markets worldwide.
- Plastics is an international developer and producer of embossed, laminated and printed specialty plastic films used in a variety of hygienic, health-care and industrial applications.

Reasonable Country of Origin Inquiry (“RCOI”) Process

For 2014, we assessed our suppliers based on (i) the likelihood that the products they supplied to us contain 3TG, and (ii) our annual spend with each of those suppliers, and then determined which suppliers to survey. We conducted our survey of the selected suppliers using the template developed by the Electronic Industry Citizenship Coalition® (“EICC®”) and The Global e-Sustainability Initiative (“GeSI”), known as the Conflict Free Smelter Initiative (“CFSP”) Conflict Minerals Reporting Template (the “Template”). This commonly used Template was developed to facilitate disclosure and communication of information regarding smelters that provide material to a company’s supply chain. It includes questions regarding a company’s conflict-free policy and engagement with its direct suppliers, and requests a listing of the smelters used by the company and its suppliers. The template also contains questions about the origin of Conflict Minerals included in the company’s products, as well as questions regarding supplier due diligence. Based on our prior year supplier responses and current year internal analysis, we determined that our Plastics’ products do not contain 3TG minerals.

Due Diligence Process

Governance

Griffon has designed a Conflict Minerals compliance initiative to implement a consistent, company-wide compliance process which includes:

- Educating our employees and suppliers about Conflict Minerals;
- Requesting key suppliers to identify which of their products purchased by Griffon contain tin, tungsten, tantalum or gold, and, where applicable, to validate the country of origin of these minerals;
- Preparing for an independent audit of Griffon's Conflict Minerals approach and processes, when required; and
- Reporting mechanisms for questions and concerns, including a toll-free confidential and anonymous hotline.

Our compliance program has been designed to conform, in all material respects, with the framework in The Organization for Economic Co-operation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas Second Edition ("OECD Guidance"), and the related supplements for gold and for tin, tantalum and tungsten.

Conflict Minerals Policy

We have adopted a Conflict Minerals policy, which is available on the Griffon website at the following URL: <http://ir.griffoncorp.com/phoenix.zhtml?c=86647&p=irol-govHighlights>.

Analysis of Supplier Survey Responses

We evaluated each supplier response received against criteria such as completeness of responses in the Template, inconsistencies within the data they reported in the Template and smelter information, based on publicly available information, including a listing of smelters participating in the CFSI.

The majority of the responses received indicated that the due diligence evaluations conducted by suppliers were not complete to fully respond to our survey request, including all smelter information. In addition, all responses were at a company level, rather than at a specific product level.

We received responses from two suppliers indicating that their companies source from the DRC. Many smelters sourcing from the DRC have been certified as conflict-free by the CFSI; one of the suppliers provided a listing of smelters, all of which are classified as conflict-free by the CFSI. One supplier indicated that they source from the DRC but did not provide complete product or smelter information for products supplied to Griffon.

We are therefore unable to determine whether any of the 3TG minerals reported by the suppliers were contained in components or parts supplied to us, or to validate that any of these smelters or refiners are actually in our supply chain. Based on the responses we received, we determined that some of our HBP and Telephonics' products contain 3TG minerals, the origin of which is undeterminable at this time. Our RCOI and due diligence performed represent a reasonable inquiry conducted by us in good faith to identify the mine or location of origin. See Appendix A for a table of smelter information.

Other Required Disclosures

Risk Mitigation

We are committed to conducting business in a lawful manner, in compliance with the Rule, and to supporting the reporting requirements of our customers under the Rule. In 2014, we expanded our efforts by:

- Joining the CFSI established by EICC® and GeSI;
- Expanding the number of suppliers requested to supply information;
- Contracting with laboratories to perform elemental analyses of selected products to determine whether they contain 3TG; and
- Engaging with suppliers to continue to educate them and improve the content of supplier responses.

We intend to continue to take these risk mitigation steps in our due diligence process to attempt to obtain more specific information, particularly for suppliers who indicate that they source from the DRC.

Annual Reporting

In accordance with the OECD Guidance and the Rule, this report is available on our website www.griffoncorp.com.

Appendix A

2014 Standard Smelter Summary

Certified smelters	171
Non certified smelters	<u>69</u>
Total Smelters	<u><u>240</u></u>

The information compiled in this listing has been reported to us by our 3TG direct suppliers or obtained from a certifying entity, such as CFSI. Standard smelters are those that have been verified to exist as smelting operations. It is difficult to confirm the accuracy of information that was collected and transmitted through many levels of the supply chain. In many cases, the information was provided to us for all products sold by our suppliers and therefore is not necessarily limited to facilities that have confirmed to contribute necessary 3TG for a Griffon product. None of our suppliers indicated in their responses that they were using minerals from sources known to support conflict. As our due diligence process progresses, our listing may change to reflect improvements in the quality of information provided to us.
