Annual Report 2025

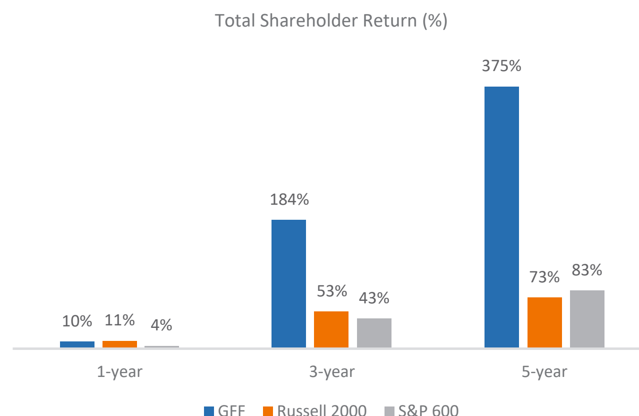
A MESSAGE TO SHAREHOLDERS

From Chairman and CEO Ron Kramer

I am pleased to report that Griffon delivered another strong performance in fiscal 2025 despite a challenging macroeconomic environment. Our results continue to highlight the strength of our portfolio, the resilience of our businesses, and the disciplined execution of our strategy.

Our fiscal year 2025 results were once again highlighted by robust free cash flow generation and operating profitability driven primarily by the performance of our Home and Building Products (HBP) segment, which generated EBITDA margin exceeding 30%. The Consumer and Professional Products (CPP) segment increased profit and margin, despite lower volume, as the segment continues to realize the benefits of the global sourcing expansion initiative completed in September 2024.

Griffon's 2025 adjusted EBITDA[1] was $580 million (before unallocated expenses), representing a 23.0% EBITDA margin and a 100+ basis point year-over-year improvement in profitability. This strong operating performance drove $323 million of free cash flow[2], of which $174 million was returned to Griffon shareholders in the form of share repurchases and dividends. We simultaneously strengthened our balance sheet by paying down $116 million in debt and reducing our year-over-year leverage by 0.2x to 2.4 times net debt to EBITDA.[3] Our continued commitment to returning value to shareholders is reflected in Griffon's Total Shareholder Return (TSR), which compares favorably to the returns of the Russell 2000 and S&P 600. The cumulative return chart over the last one, three, and five fiscal years illustrates this excellent performance.



Data from Bloomberg as of 9/30/2025. Total Shareholder Return assumes reinvestment of all dividends.

We continue to invest in technology, innovation and productivity across our businesses and see these investments as a catalyst for our long-term growth. In 2025, HBP was recognized internationally with prestigious awards from peers for product innovation in the building products industry and for being an exceptional customer partner. Similarly, CPP has innovated by entering exciting new product categories and strategically expanding product offerings. These actions will enhance our operating margins in both segments in the near term and will drive growth and margin expansion in the longer term, as consumer, housing and commercial construction markets improve.

HOME AND BUILDING PRODUCTS

The Home and Building Products segment conducts its operations through Clopay Corporation (Clopay), the preeminent manufacturer and marketer of sectional residential, and commercial, garage doors and rolling steel doors in North America. Clopay's products are sold under the Clopay®, Cornell®, Cookson®, Ideal Door® and Holmes® brands. Clopay leverages its extensive design, manufacturing and logistics capabilities, including its 57 North American distribution centers, to serve a diverse customer portfolio spanning a network of over 3,000 professional dealers and retail partners.

Despite continued challenges in the residential and commercial construction markets, HBP generated fiscal 2025 revenue of $1.6 billion and adjusted EBITDA[1] of $495 million. These results demonstrate the resilience and strength of Clopay's business model, the dedication of its team, and its commitment to the success of its customers.

Innovation

Fiscal 2025 was yet another landmark year for Clopay innovation as it continues to be the market leader in redefining the garage door industry. Clopay's new product development pipeline continued to expand, providing exciting new products and features for evolving customer needs in design, functionality, and connectivity. Clopay remains committed to providing the best products to architects, designers, facility owners, homeowners, remodelers, and homebuilders alike.

This year's product headlines were highlighted by the extraordinary achievements of the VertiStack® Avante® door. At the 2025 International Builders Show, this revolutionary stacking design received unprecedented recognition by winning the top award in the Door and Window category as well as the overall Best in Show award. This innovative vertically stacking door, previously launched in the commercial space, reimagines the conventional garage door, offering a clean, modern design that eliminates cumbersome overhead tracks and exposed hinges.

Cornell® and Cookson®, Clopay's industry-leading rolling steel brands, earned industry recognition for leadership in advanced security, life safety, and sustainable designs. A key product introduction was the Thermiser Max® – Low U door, the industry's only thermally broken rolling slat design, which set a new standard for thermal efficiency while meeting evolving building code requirements for challenging applications including data centers and other conditioned spaces. Fiscal 2025 also saw a significant adoption of the new space-saving, counter fire door design and the industry leading Ultra™ powder coat finish – the only finish on the market that provides a warranty against wear.

Clopay continues to expand the appeal of its best-selling residential products with enhancements to its Canyon Ridge®, Bridgeport™, and Modern Steel™ product lines. Homeowners have been highly receptive to the four new Modern Steel™ Ultra-Grain® Plank designs, which are driving increased demand. With ever-growing color palettes, wood designs and window options, Clopay offers the broadest residential product portfolio in the industry.

Infrastructure and Technology

As an industry leader, Clopay continually invests in cutting-edge technologies. These investments directly improve the customer buying experience, streamline manufacturing processes, ensure high quality, accelerate new product development, and enhance enterprise efficiency and security.

In 2024, Clopay's national multimedia advertising campaign contributed to driving the most leads in the

company's history and was recognized as the best in the industry by the Door and Access Systems Manufacturer's Association (DASMA). This year, Clopay built upon that success, making significant Artificial Intelligence (AI) enhancements to its EZDoor visualizer tool which increases homeowner engagement and facilitates the purchasing process. Clopay also invested in dealer-facing tools such as MyDoor®, its powerful, innovative and one-of-a-kind garage door sales application, to enhance the level of service provided to dealers and drive dealer loyalty.

Giving Back to the Community

Clopay maintains a strong commitment to the communities in which it operates, guided by the core belief that its long-term success is directly related to the health and well-being of its communities. This belief has fueled a meaningful partnership with Habitat for Humanity, which began in 2020, to provide safe and beautiful housing for first-time home buyers. In 2025 this collaboration completed its fourth home build. This initiative is a source of immense pride for Clopay associates, powerfully underscoring the company's commitment to building stronger communities

Looking Ahead

Clopay is well-positioned for continued growth and profitability. In 2025, garage doors were again ranked as the best home improvement project in terms of return on investment, generating more than a 2.5x return at resale, according to the Zonda 2025 Cost vs. Value Report. Clopay's growth strategy is focused on a clear set of priorities: developing innovative new products, expanding distribution, and delivering exceptional customer service. We are optimistic about the future, given the promising opportunities the company has created and its trajectory for continued success.

CONSUMER AND PROFESSIONAL PRODUCTS

The Consumer and Professional Products segment is a global provider of branded consumer and professional tools; residential, commercial, and industrial fans; home storage and organization products; and products that enhance outdoor lifestyles. CPP serves its primary markets in the United States, Australia, Canada, and the United Kingdom, and offers its products through a portfolio of leading brands including AMES®, ClosetMaid®, Hunter®, True Temper®, Razor-Back®, Jackson®, Casablanca®, Hills®, Garant®, Cyclone®, Nylex®, Harper® and Kelkay®.

Despite challenging and uncertain market conditions, CPP generated fiscal 2025 revenue of $936 million and increased adjusted EBITDA 18% year-over-year to $86 million. CPP EBITDA margin improved over 200 basis points, despite revenue decreasing by 10% due to soft consumer activity and increased tariffs which disrupted customer ordering patterns. This margin improvement was largely driven by the successful transition of U.S. production to an asset-light global sourcing model, which reduced overall costs while continuing to provide branded high quality products. Additional benefits came from enhanced supply chain flexibility, reduced administrative expenses, and continued improvements to operational processes across CPP's markets. These structural changes have fundamentally strengthened CPP's cost profile, enabling the segment to achieve higher profitability in a consumer-constrained environment.

Innovation

CPP's product innovation is highlighted by Hunter Fan's release of HunterSMART™, the only Wi-Fi ceiling fan that can be controlled through the HunterSMART™ app or other popular smart home assistant apps such as Amazon Alexa, Google Assistant, or Apple HomeKit. Additionally, Hunter launched the ultra-slim, smart, and efficient ZenTech™ line of ceiling fans. This is Hunter's most advanced fan line yet, featuring a sophisticated technological suite, which sets a new standard for design and performance. Hunter also celebrated Casablanca's 50th anniversary this year with a launch of 16 new, fashion-forward models, reestablishing Casablanca® as the design leader in luxury ceiling fans.

Also in fiscal 2025, CPP introduced Hunter ceiling fans to the Australian market, securing five lines of some of our most popular fans with the largest retailers in Australia.

In Canada, Garant successfully launched its first product in the Outdoor Power Equipment (OPE) category: an innovative, 62-volt cordless electric snow shovel. The electric snow shovel utilizes a high-performance brushless motor with a turbo function to adjust motor speed based on snow density, to deliver consistent power in all conditions. This product was highly successful in its first year despite a limited release, and represents a promising start to our multi-year strategy to penetrate the Canadian OPE snow market.

AMES U.S. successfully released the MaxLoad® garage storage wire program, which provides unmatched strength and durability for garage storage requirements. This high-performance system combines heavy duty shelving with our adjustable ShelfTrack® system, making MaxLoad® ideal for storing large items in the garage such as storage totes, power tools, and lawn equipment.

Infrastructure and Technology

CPP continued the successful global deployment of its business intelligence system with the roll-out of this capability at the Hunter Fan business in 2025. This system provides powerful business analytics tools, data management and reporting capabilities, which are essential drivers of growth and improved efficiencies within the CPP global supply chain.

Looking Ahead

CPP is well positioned to capitalize on the recovery of consumer demand in North America and continue to realize improved operational efficiencies through a flexible, asset-light business model. Continued global deployment of the business intelligence system will contribute to improved supply chain efficiency and information collaboration across all CPP global business units.

A MESSAGE TO SHAREHOLDERS

CONCLUSION

Our strong operating performance in fiscal 2025 generated $323 million in free cash flow, which we deployed in a disciplined manner consistent with our long-standing capital allocation priorities.

During fiscal 2025, we returned $174 million to shareholders through share repurchases and dividends. Since April 2023 and through September 2025, we have repurchased 10.8 million shares, representing 19% of the shares outstanding at that time, at an average price of $51.79. During the year, we also increased the quarterly dividend amount by 22%, and since we began paying dividends in 2012 we have increased our dividend at a compound annual rate of 19%. These actions underscore our consistent financial performance and commitment to superior shareholder returns.

In addition to returning capital, we strengthened our balance sheet by paying down $116 million of debt and reducing our net leverage to 2.4x from 2.6x in the prior year, while still investing meaningfully across all our businesses to support innovation, capacity expansion, and operational enhancements.

Taken together, our actions in fiscal 2025 reflect a balanced approach to capital allocation – one that prioritizes returning capital to shareholders, maintaining a strong financial position, and investing in strategic initiatives that enhance long-term growth and profitability. These actions reflect the confidence of both management and our Board in Griffon's strategic direction, earnings power, and future opportunities.

As we enter fiscal 2026, we remain encouraged by long-term market fundamentals across our end markets, including repair and remodel demand, commercial and industrial construction activity, and the eventual recovery of the residential housing market. With an expanding portfolio of leading products, Griffon is poised to capture market share and increase profitability in the years ahead, with technology and innovation serving as a catalyst.

In 2024, we communicated our expectation to generate over $1 billion of free cash flow over the next three years. With $323 million generated in fiscal 2025, we remain firmly on track. As stated, our intention is to use this cash to execute our share repurchase program, reduce debt, and invest in high-return opportunities across our businesses.

Our performance this year reflects the dedication and commitment of our Griffon employees worldwide. Their talent, innovation, and passion drive our success, and I extend my sincere appreciation to all of them.

I close with the absolute conviction that our momentum is real, our position is strong, and again–the best is yet to come.

Yours sincerely,

Ronald J. Kramer
Chairman and CEO

Special Notes Regarding Forward-Looking Statements

This Annual Report on Form 10-K, especially "Management's Discussion and Analysis", contains certain "forward-looking statements" within the meaning of the Securities Act, the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. Such statements relate to, among other things, income (loss), earnings, cash flows, revenue, changes in operations, operating improvements, the industries in which Griffon Corporation (the "Company" or "Griffon") operates and the United States and global economies. Statements in this Form 10-K that are not historical are hereby identified as "forward-looking statements" and may be indicated by words or phrases such as "anticipates," "supports," "plans," "projects," "expects," "believes," "achieves," "should," "would," "could," "hope," "forecast," "management is of the opinion," "may," "will," "estimates," "intends," "explores," "opportunities," the negative of these expressions, use of the future tense and similar words or phrases. Such forward-looking statements are subject to inherent risks and uncertainties that could cause actual results to differ materially from those expressed in any forward-looking statements. These risks and uncertainties include, among others: current economic conditions and uncertainties in the housing, credit and capital markets; Griffon's ability to achieve expected savings and improved operational results from cost control, restructuring, integration and disposal initiatives (including the expanded CPP global outsourcing strategy announced in May 2023); the ability to identify and successfully consummate, and integrate, value-adding acquisition opportunities; increasing competition and pricing pressures in the markets served by Griffon's operating companies; the ability of Griffon's operating companies to expand into new geographic and product markets, and to anticipate and meet customer demands for new products and product enhancements and innovations; increases in the cost or lack of availability of raw materials such as steel, resin and wood, components or purchased finished goods, including any potential impact on costs or availability resulting from tariffs; changes in customer demand or loss of a material customer at one of Griffon's operating companies; the potential impact of seasonal variations and uncertain weather patterns on certain of Griffon's businesses; political events or military conflicts that could impact the worldwide economy; a downgrade in Griffon's credit ratings; changes in international economic conditions including inflation, interest rate and currency exchange fluctuations; the reliance by certain of Griffon's businesses on particular third party suppliers and manufacturers to meet customer demands; the relative mix of products and services offered by Griffon's businesses, which impacts margins and operating efficiencies; short-term capacity constraints or prolonged excess capacity; unforeseen developments in contingencies, such as litigation, regulatory and environmental matters; Griffon's ability to adequately protect and maintain the validity of patent and other intellectual property rights; the cyclical nature of the businesses of certain of Griffon's operating companies; possible terrorist threats and actions and their impact on the global economy; effects of possible IT system failures, data breaches or cyber-attacks; the impact of pandemics on the U.S. and the global economy, including business disruptions, reductions in employment and an increase in business and operating facility failures, specifically among our customers and suppliers; Griffon's ability to service and refinance its debt; and the impact of recent and future legislative and regulatory changes, including, without limitation, changes in tax laws. Such statements reflect the views of the Company with respect to future events and are subject to these and other risks, as previously disclosed in the Company's Securities and Exchange Commission filings. Readers are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements speak only as of the date made. Griffon undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

(Unless otherwise indicated, any reference to years or year-end refers to the fiscal year ending September 30 and U.S. dollars and non-U.S. currencies are in thousands, except per share data)

PART I

Item 1. *Business*

Overview

Griffon Corporation (the "Company," "Griffon," "we," or "us") is a diversified management and holding company that conducts business through wholly-owned subsidiaries. The Company, founded in 1959, is a Delaware corporation headquartered in New York, N.Y. and is listed on the New York Stock Exchange (NYSE:GFF).

Business Strategy

Our strategic objective is to maintain leading positions in the markets we serve by providing innovative, branded products with superior quality and industry-leading service. We place emphasis on our iconic and well-respected brands, which helps to differentiate us and our offerings from our competitors and strengthens our relationship with our customers and those who ultimately use our products.

Through operating a diverse portfolio of businesses, we expect to reduce variability caused by external factors such as market cyclicality, seasonality, and weather. We achieve diversity by providing various product offerings and brands through multiple sales and distribution channels and conducting business across multiple countries which we consider our home markets.

Griffon oversees the operations of its subsidiaries, allocates resources among them and manages their capital structures. Griffon provides direction and assistance to its subsidiaries with acquisition and growth opportunities as well as divestitures. As long-term investors, we intend to continue to grow and strengthen our existing businesses, and to diversify further through investments in our businesses and acquisitions.

Since 2017, we have undertaken a series of transformative transactions to strengthen our core business and increase shareholder value. We divested our specialty plastics business in 2018 and our defense electronics (Telephonics) business in 2022 to focus on our core markets and improve our free cash flow conversion. In our Home and Building Products ("HBP") segment, we acquired CornellCookson, Inc. in 2018, which has established us as a leading North American manufacturer and marketer of residential garage doors and sectional commercial doors, and rolling steel doors and grille products, under brands that include Clopay, Ideal, Cornell and Cookson. In our Consumer and Professional Products ("CPP") segment, we expanded the scope of our brands through the acquisition of Hunter Fan Company ("Hunter") in January 2022 and ClosetMaid, LLC ("ClosetMaid") in 2018.

On July 1, 2024, Griffon announced that its subsidiary, The AMES Companies, Inc., ("AMES") expanded the scope of its Australian operations by acquiring substantially all the assets of Pope, a leading Australian provider of residential watering products, from The Toro Company (NYSE:TTC) for a purchase price of approximately AUD 21,800 (approximately $14,500) in cash. This is CPP's seventh acquisition in Australia since 2013, and further expands AMES's product portfolio in the Australian market. Pope generated over $25,000 in revenue in its first full year of operations.

CPP Global Sourcing Strategy Expansion and Restructuring Charges

Griffon announced in May 2023 that CPP was expanding its global sourcing strategy to include long handled tools, material handling, and wood storage and organization product lines for the U.S. market. This initiative was successfully completed as of September 30, 2024.

As a result of this global sourcing expansion initiative, manufacturing operations have concluded at four manufacturing sites and four wood mills, resulting in a total facility footprint reduction of approximately 1.2 million square feet, or approximately 15% of CPP's square footage, and a headcount reduction of approximately 600. The closed locations have met the held for sale criteria and have been classified as such on our Consolidated Balance Sheets as of September 30, 2025 and September 30, 2024. The net book value of these properties as of September 30, 2025 and September 30, 2024 totaled $5,609 and $14,532, respectively.

The adoption of an asset-light business model for these U.S. products has positioned CPP to better serve customers with a more flexible and cost-effective sourcing model that leverages supplier relationships around the world, and improved its competitive positioning. These actions will be essential for CPP to achieve its target of 15% EBITDA margin while enhancing free cash flow through improved working capital and significantly reduced capital expenditures.

Implementation of this strategy over the duration of the project resulted in charges of $133,777, which included $51,082 of cash charges for employee retention and severance, operational transition, and facility and lease exit costs, and $82,695 of non-cash charges, primarily related to asset write-downs. In addition, there were $2,678 of capital investments to effectuate the project. This excludes cash proceeds from the sale of real estate and equipment, which through September 30, 2024 were $13,271, and excludes future proceeds from the sale of remaining real estate and equipment. During the year ended September 30, 2025, cash proceeds related to the sale of remaining real estate and equipment held for sale totaled $17,729.

Available Information

We are subject to the information and periodic reporting requirements of the Securities Exchange Act of 1934 and, in accordance therewith, file periodic reports, proxy statements, and other information, including our Code of Conduct, with the SEC. Such periodic reports, proxy statements, and other information are available on the SEC's website at www.sec.gov.

Griffon posts and makes available, free of charge through its website at *www.griffon.com*, its annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) of the Securities Exchange Act of 1934, as well as press releases, as soon as reasonably practicable after such materials are published or filed with or furnished to the Securities and Exchange Commission (the "SEC"). The information found on Griffon's website is not incorporated into this or any other report it files with or furnishes to the SEC.

For information regarding revenue, profit and total assets of each segment, see the Reportable Segments footnote in the Notes to Consolidated Financial Statements.

Reportable Segments:

Griffon conducts its operations through two reportable segments:

- Home and Building Products ("HBP") conducts its operations through Clopay Corporation ("Clopay"). Founded in 1964, Clopay is the largest manufacturer and marketer of garage doors and rolling steel doors in North America. Residential and commercial sectional garage doors are sold through professional dealers and leading home center retail chains throughout North America under the brands Clopay, Ideal, and Holmes. Rolling steel door and grille products designed for commercial, industrial, institutional, and retail use are sold under the Clopay, Cornell and Cookson brands.

- Consumer and Professional Products ("CPP") is a global provider of branded consumer and professional tools; residential, industrial and commercial fans; home storage and organization products; and products that enhance indoor and outdoor lifestyles. CPP sells products globally through a portfolio of leading brands including AMES, since 1774, Hunter, since 1886, True Temper, and ClosetMaid.

Reportable Segments:

HOME AND BUILDING PRODUCTS

The HBP segment consists of Clopay. Founded in 1964 and acquired by Griffon in 1986, Clopay has grown organically and through acquisitions to become the largest manufacturer and marketer of both residential and commercial garage doors, and rolling steel doors, in North America. The majority of Clopay's sales come from home remodeling and renovation projects, with the balance from commercial construction and new residential housing construction. Sales into the home remodeling market are driven by the aging of the housing stock, existing home sales activity, and the trends of improving both home appearance and energy efficiency. Sales into the commercial market are driven by commercial construction and repair and replacement, including the aging of nonresidential buildings, warehouses, and institutional and industrial facilities, as well as increased business activity, changes to building codes, security of facilities, and trends of improving function and performance.

Clopay has approximately 3,100 employees.

Brands

Clopay brings over 60 years of experience and innovation to the residential and sectional garage door industry, and has over 100 years of experience in the rolling steel industry. Residential and commercial sectional products are sold under market-leading brands, including Clopay®, America's Favorite Garage Doors®, Holmes Garage Door Company® and IDEAL Door®. Clopay commercial rolling steel door brands include Cornell®, Cookson® and Clopay®.

Products and Service

Clopay manufactures a broad line of residential sectional garage doors with a variety of options, at varying prices. Clopay offers garage doors made primarily from steel, aluminum, plastic composite and wood, and also sells related products, such as garage door openers manufactured by third parties.

Commercial door products manufactured and marketed by Clopay include rolling steel service doors, fire doors, shutters, steel security grilles, and room dividers. Clopay also manufactures and markets commercial sectional doors, which are similar to residential garage doors, but are designed to meet the more demanding performance specifications of a commercial application.

Customers

Clopay supports a diversity of customers, ranging from local rural dealerships to national retail chains. Clopay's customers include over 3,000 independent professional installing dealers and major home center retail chains including Home Depot and Menards. Clopay maintains strong relationships with its installing dealers and believes it is the largest supplier of sectional garage doors to the retail and professional installing channels in North America and the largest supplier of rolling steel door products in North America.

Clopay distributes its garage doors directly to customers from its manufacturing facilities and through its network of 57 distribution centers located throughout the U.S. and Canada. These distribution centers allow Clopay to maintain an inventory of garage doors near installing dealers and provide quick-ship service to retail and professional dealer customers.

Clopay is currently the exclusive supplier of residential and commercial garage doors to Home Depot and Menards locations throughout North America, and has maintained long-standing relationships with

Home Depot for 40 years and with Menards for over 30 years. The loss of either of these customers would have a material adverse effect on Clopay and Griffon.

Product Development

Clopay product development efforts focus on both new products and improvements to existing products. Products are developed through in-house design and engineering staffs.

Clopay operates technical development centers where its research engineers design and develop new products and technologies and perform durability and performance testing of new and existing products, materials and finishes. Clopay continually improves its door offerings through these development efforts, focusing on characteristics such as strength, design, performance, durability, and energy efficiency. The process engineering teams also work to develop new manufacturing processes and production techniques aimed at improving manufacturing efficiencies and ensuring quality-made products.

Sales and Marketing

The Clopay sales and marketing organization supports our customers, consults on new product development, and aggressively markets door solutions, with a primary focus on the North American market. Clopay maintains a strong promotional presence, in both traditional and digital media.

Clopay provides a unique customer experience platform called MyClopay™, which delivers an array of sales, order management, analytical, instructional, and informational applications. These applications empower Clopay's customers to provide the best solutions to their end customers, and MyClopay has been widely adopted by Clopay's customers due to its feature rich, intuitive, and device-agnostic software. We believe this capability is unique to the industry.

Within the MyClopay application suite, Clopay customers use a proprietary residential door web application, the MyDoor® mobile enabled app, that guides consumers through an easy to use door visualization and pricing process, allowing them to select the optimal door for their home. For Clopay's commercial products, Clopay's Commercial Door Quoter (CDQ®™) and WebGen™ applications deliver a streamlined quoting and bid submittal process to our professional dealers, providing improved close rates, productivity, and back office efficiency.

Raw Materials and Suppliers

The principal raw material used in Clopay's manufacturing is galvanized steel. Clopay also utilizes certain hardware and plastic components, as well as aluminum and insulated foam. All raw materials are generally available from a number of sources.

Competition

The sectional garage door and commercial rolling steel door industry includes several large national manufacturers and many smaller, regional and local manufacturers. Clopay competes on the basis of service, quality, brand awareness, product design and price.

Clopay brand names are widely recognized in the building products industry. Clopay believes that it has earned a reputation among installing dealers and retailers for producing a broad range of innovative, high-quality doors with industry leading lead times supported by an extensive distribution network. Clopay's market position, brand recognition, and proprietary software applications and systems are key marketing tools for expanding its customer base.

Manufacturing and Distribution

Clopay's principal manufacturing facilities include 1,625,000 square feet in Troy and Russia, Ohio, 279,000 square feet in Mountain Top, Pennsylvania and 163,000 square feet in Goodyear, Arizona. Clopay distributes its products through a wide range of distribution channels, including a national network of 57 distribution centers with a total of approximately 1,300,000 square feet. This network of manufacturing facilities and distribution centers is capable of providing just in time and prepositioned inventory across the U.S. and Canada, and provides flexibility regarding how and where doors are delivered to customers in their local markets.

CONSUMER AND PROFESSIONAL PRODUCTS

Consumer and Professional Products ("CPP") is a global provider of branded consumer and professional tools; residential, industrial and commercial fans; home storage and organization products; and products that enhance indoor and outdoor lifestyles. CPP sells products globally through a portfolio of leading brands including AMES, Hunter and ClosetMaid. AMES, founded in Massachusetts in 1774, has the distinction of being one of the oldest companies in continuous operation in the United States. Over its long life, AMES has grown organically and through the acquisition of other leading and historic tool businesses such as True Temper, Union Tools, and Garant. Today, AMES is a leading provider of long-handled tools and landscaping products for homeowners and professionals in North America, and also provides these products in key global markets including Canada, Australia, New Zealand, the U.K., and Ireland. Under the ClosetMaid brand, CPP is a leading provider of wood and wire closet organization, general living storage, and wire garage storage products in the United States. Under the Hunter brand, since 1886, CPP is a leading provider of residential, industrial and commercial fans in the United States.

CPP has approximately 2,000 employees worldwide.

Brands

CPP's brands are among the most recognized across its primary product categories in North America, Australia and the United Kingdom. Its brand portfolio for long-handled tools, outdoor décor, and landscaping product includes AMES®, True Temper®, Garant®, Harper®, UnionTools®, Westmix™, Cyclone®, Southern Patio®, Northcote Pottery™, Nylex®, Hills®, Kelkay®, Tuscan Path®, La Hacienda®, Kelso™, Dynamic Design®™, Apta®, Quatro Design® and Pope®. Contractor-oriented tool brands include Razor-Back® Professional Tools and Jackson® Professional Tools. CPP's home organization, general living storage, and garage storage products are sold primarily under the ClosetMaid® brand. CPP's residential, industrial and commercial fan products are sold under the Hunter Fan®, Hunter Industrial® and Casablanca® brands.

This strong portfolio of brands enables CPP to build and maintain long-standing relationships with leading retailers and distributors. In addition, given the breadth of its brand portfolio and product category depth, CPP is able to offer specific, differentiated branding strategies for key retail customers. These strategies focus on enhancement of brand value, with the goal of de-commoditizing CPP products through identity and functionality elements that makes each top brand unique, attractive and visually recognizable by the consumer.

Products

CPP markets a broad portfolio of long-handled tools, landscaping products, home organization products and residential, industrial and commercial fans. This portfolio contains many iconic brands and is anchored by six core product categories: seasonal outdoor tools, project tools, outdoor décor and watering, home organization, fans and cleaning products. As a result of brand portfolio recognition, outstanding product quality, industry leading service and strong customer relationships, CPP has earned

market-leading positions in its six core product categories. The following is a brief description of CPP's primary product lines:

- ***Seasonal Outdoor Tools***
  - *Long-Handled Tools:* An extensive line of engineered tools including shovels, spades, scoops, rakes, hoes, cultivators, weeders, post hole diggers, scrapers, edgers and forks, marketed under leading brand names including AMES®, True Temper®, UnionTools®, Garant®, Cyclone® and Kelso™, as well as contractor-oriented brands including Razor-Back® Jackson® and Darby™.
  - *Wheelbarrows:* AMES designs, and develops a full line of wheelbarrows and lawn carts, primarily under the AMES®, True Temper®, Jackson® Professional Tools, UnionTools®, Garant® and Westmix™ brand names. The products range in size, material (poly and steel), tray form, tire type, handle length and color based on the needs of homeowners, landscapers and contractors.
  - *Snow Tools:* A complete line of snow tools is marketed under the True Temper®, Garant® and Union Tools® brand names. The snow tool line includes shovels, pushers, roof rakes, sled sleigh shovels, scoops and ice scrapers.
  - *Pruning:* The pruning line is made up of pruners, loppers, shears, and other tools sold primarily under the AMES®, True Temper®, Cyclone® and Garant® brand names.
- ***Project Tools***
  - *Striking Tools:* Axes, picks, mattocks, mauls, wood splitters, sledgehammers, pry bars and repair handles make up the striking tools product line. These products are marketed under the True Temper®, AMES®, Cyclone®, Garant®, Jackson® Professional Tools and Razor-Back® Professional Tools brand names.
  - *Hand Tools:* Hammers, screwdrivers, pliers, adjustable wrenches, handsaws, tape measures, levels, clamps, and other traditional hand tools make up this product line. These products are marketed under the Trojan®, Cyclone® and Supercraft® brand names. In addition, gardening hand tools, such as trowels, cultivators, weeders and other specialty garden hand tools, are marketed under the AMES® brand name.
- ***Outdoor Décor and Watering***
  - *Planters and Lawn Accessories:* AMES is a designer and distributor of indoor and outdoor planters and accessories, sold under the Southern Patio®, Northcote Pottery™, Tuscan Path®, La Hacienda®, Hills®, Kelkay®, Quatro Design®, Pope® and Dynamic Design®™ brand names, as well as various private label brands. The range of planter sizes (from 6 to 32 inches) is available in various designs, colors and materials.
  - *Garden Hose and Storage:* AMES offers a wide range of garden hoses and hose reels under the AMES®, NeverLeak® and Nylex® brand names.
- ***Home Organization***: AMES designs, manufactures and sells a comprehensive portfolio of wire and wood shelving, containers, storage cabinets and other closet and home organization accessories primarily under the highly recognized ClosetMaid® brand name. Wire products include wire shelving and hardware, wire accessories and kitchen storage products. Wire product brands include Maximum Load®, SuperSlide® and ShelfTrack®. Wood solutions include closet systems, cube storage, storage furniture and cabinets. Selected wood product brands include MasterSuite®, Suite Symphony®™, ExpressShelf®, Style+®, and SpaceCreations®.
- ***Fans:*** CPP designs and sells residential, industrial and commercial fans under the Hunter Fan®, Hunter Industrial® and Casablanca® brand names.

- ***Cleaning Products***: CPP offers a line of cleaning products for professional, home, and industrial use, including brooms, brushes, squeegees, and other cleaning products, primarily under the Harper® brand.

Customers

CPP sells products throughout North America, Australia, New Zealand, the U.K. and Ireland through (1) home centers, such as The Home Depot, Inc. ("Home Depot"), Lowe's Companies Inc. ("Lowe's"), Rona Inc., Bunnings Warehouse ("Bunnings") and Woodies (with the average length of the relationship with these customers being approximately 30 years); (2) mass market, specialty, and hardware retailers including Tractor Supply Corporation, Wal-Mart Stores Inc., Target Corporation, Canadian Tire Corporation, Limited, Costco Wholesale Corporation, Ace, Do-It-Best and True Value Company; (3) industrial distributors, such as W.W. Grainger, Inc. and ORS Nasco; (4) homebuilders, such as D.R. Horton, KB Home, Lennar and NVR, Inc.; and (5) E-commerce platforms, such as Amazon Inc., Wayfair Inc. ("Wayfair"), Hayneedle Inc. ("Hayneedle"), Beyond, Inc. ("Beyond"), and Spreetail LLC.

Home Depot, Lowe's and Bunnings are significant customers of CPP. The loss of any of these customers would have a material adverse effect on the CPP business and on Griffon.

Product Development

CPP product development efforts focus on both new products and product line extensions. CPP continually improves existing products as well as develops new products to satisfy consumer needs, expand revenue opportunities, maintain or extend competitive advantages, increase market opportunity and reduce production costs. Products are developed through in-house industrial design and engineering staffs to introduce new products and product line extensions that are timely and cost effective.

Sales and Marketing

CPP's sales organization is structured by product line and distribution channel in the U.S., and by country internationally. In the U.S., a dedicated team of sales professionals is provided for each of the large retail customers. Offices are maintained adjacent to each of the two largest customers' headquarters, supported by a shared in-house sales analyst. In addition, sales professionals are assigned to domestic, wholesale and industrial distribution channels. Sales teams located in Canada, Australia, the United Kingdom, Mexico and Ireland handle sales in each of their respective regions. In Australia, a dedicated team of sales professionals is provided for the largest retail customer. CPP has made significant investments in automation, facilities expansion and fulfillment operations to support e-commerce growth.

Raw Materials and Suppliers

CPP's primary raw material inputs include resin (primarily polypropylene and high-density polyethylene), hickory wood and steel (wire rod). All raw materials are generally available from a number of sources. CPP sources certain finished goods, primarily in storage and organization, outdoor décor, residential, industrial and commercial fans, and tools.

Competition

The long-handled tools and landscaping product industry is highly competitive and fragmented. Most competitors consist of small, privately-held companies focusing on a single product category. Some competitors, such as Fiskars Corporation in the hand tool and pruning tool market and Truper Herramientas S.A. de C.V. in the long-handled and garden tool space, compete in various tool categories. Suncast Corporation competes in the hose reel and accessory market, and in the long-handled plastic snow shovel category. In addition, there is competition from imported or sourced

products from China, India and other low-cost producing countries, particularly in long-handled tools, wheelbarrows, planters, striking tools and pruning tools.

The home storage and organizational solutions industry is also highly fragmented. CPP, primarily under the ClosetMaid brands, sells through retail, direct to consumer (e-commerce category) and direct to installer (building) channels and competes with a significant number of companies across each of these unique channels. Principal competition for retail wire products is from products sourced from China, India and other low-cost producing countries. FirstService Brands, Inc. sells competing wood solutions under the brand California Closets®, but does not sell through the retail or direct to consumer channels.

The residential, industrial, and commercial fan industry is fragmented. CPP, under the highly recognized Hunter brand, sells through direct to consumer (e-commerce category), retail, and direct to installer (industrial and commercial) channels. CPP's principal competitors in the consumer ceiling fan market are retailer house brands such as Hampton Bay in The Home Depot and Harbor Breeze in Lowe's, followed by Minka Air. In the industrial and commercial fan space, principal competitors are Big Ass Fans, Rite-Hite, Macro Air, and Minka Air.

CPP differentiates itself and provides the best value to customers through its successful history of innovation, dependable supply chain and high on-time delivery rates, quality, product performance, and highly recognized product brands. CPP's size, depth and breadth of product offering, category knowledge, research and development ("R&D") investment, service and its ability to react to sudden changes in demand from seasonal weather patterns, especially during harsh winter months, are competitive advantages.

Manufacturing and Distribution

CPP sources products for sale through a combination of internal and external global manufacturing sources and supply chain partners. Principal North American manufacturing facilities include a 676,000 square foot facility in Ocala, Florida, and a 353,000 square foot center in St. Francois, Quebec, Canada. CPP also operates two wood mills, of which one is located in Canada and the other is located in the United States. Internationally CPP operates manufacturing facilities in Grafton, New South Wales and Wonthaggi, Victoria, both in Australia.

CPP has three principal distribution facilities in the United States: a 1.4 million square foot facility in Carlisle, Pennsylvania; a 997,000 square foot facility in Reno, Nevada; and a 600,000 square foot facility in Byhalia, Mississippi. Finished goods are transported to these facilities by both an internal fleet, as well as over the road trucking and rail. Additionally, light assembly is performed at the Carlisle and Reno locations. Smaller distribution centers are also strategically located in the U.S. in Ocala, Florida, and internationally in Canada, Australia, the United Kingdom and Ireland.

Griffon Corporation

Employees

As of September 30, 2025, Griffon and its subsidiaries employ approximately 5,100 employees located primarily throughout North America, the United Kingdom, Australia, and China. Generally, the total number of employees of Griffon and its subsidiaries does not significantly fluctuate throughout the year. However, acquisition activity or the opening of new branches or lines of business, efficiency initiatives, or other changes in the level of Griffon's business activity (for instance, based on actual or anticipated customer demand or other factors), could require staffing level adjustments.

As of September 30, 2025, approximately 145 employees in Canada are represented by the Trade Union Advisory Committee. Griffon believes its relationships with its employees are satisfactory.

In managing its human capital resources, Griffon aims to attract a qualified workforce through an inclusive and accessible recruiting process that utilizes online recruiting platforms, campus outreach, internships and job fairs. Griffon also seeks to retain employees by offering competitive wages, benefits and training opportunities, as well as promoting a safe and healthy workplace. Griffon and all of its businesses strictly comply with all applicable state, local and international laws governing nondiscrimination in employment in every location in which Griffon and its businesses have facilities. This applies to all terms and conditions of employment, including recruiting, hiring, placement, promotion, termination, layoff, recall, transfer, leaves of absence, compensation and training. All applicants and employees are treated with the same high level of respect regardless of their gender, ethnicity, religion, national origin, age, marital status, political affiliation, sexual orientation, gender identity, disability or protected veteran status.

Regulation

Griffon's operations are subject to various environmental, health, and employee safety laws and regulations. Griffon believes that it is in material compliance with these laws and regulations. Historically, compliance with environmental, health, and employee safety laws and regulations have not materially affected, and are not expected to materially affect, Griffon's capital expenditures, earnings or competitive position. Nevertheless, Griffon cannot guarantee that, in the future, it will not incur additional costs for compliance or that such costs will not be material.

Customers

A small number of customers account for, and are expected to continue to account for, a substantial portion of Griffon's consolidated revenue. In 2025, Home Depot represented 10% of Griffon's consolidated revenue, 9% of HBP's revenue and 12% of CPP's revenue.

No other customer accounted for 10% or more of consolidated revenue. Future operating results will continue to substantially depend on the success of Griffon's largest customers and Griffon's relationships with them. Orders from these customers are subject to change and may fluctuate materially. The loss of all or a portion of volume from any one of these customers could have a material adverse impact on Griffon's financial results, liquidity and operations.

Seasonality

Griffon's revenue and earnings are generally lowest in our first and fourth quarters ending December 31, and September 30, respectively, and highest in the second and third quarters ending March 31, and June 30, respectively, primarily due to the seasonality within the HBP and CPP businesses. HBP's business is driven by renovation and construction during warm weather, which is historically at reduced levels during the winter months, generally in our second quarter. In 2025, 49% of CPP's sales occurred during the second and third quarters compared to 52% in 2024 and 54% in 2023.

Demand for lawn and garden products is influenced by weather, particularly weekend weather during peak gardening season. AMES' sales volume can be adversely affected by certain weather patterns such as unseasonably cool or warm temperatures, hurricanes, water shortages or floods. In addition, lack of snow or lower than average snowfall during the winter season may result in reduced sales of certain AMES' products, such as snow shovels and other snow tools. As a result, AMES' results of operations, financial results and cash flows could be adversely impacted.

Financial Information About Geographic Areas

Segment and operating results are included in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations.

For geographic financial information, see the Reportable Segment footnote in the Notes to Consolidated Financial Statements in Item 8, Financial Statements and Supplementary Data.

Griffon's non-U.S. businesses are primarily in Canada, Australia, the U.K., Ireland and China.

Research and Development

Griffon's businesses are encouraged to improve existing products as well as develop new products to satisfy customer needs; expand revenue opportunities; maintain or extend competitive advantages; increase market share and reduce production costs. R&D costs, not recoverable under contractual arrangements, are charged to expense as incurred.

Intellectual Property

Griffon follows a practice of actively protecting and enforcing its proprietary rights in the U.S. and throughout the world where Griffon's products are produced and sold. All intellectual property information presented in this section is as of September 30, 2025.

Trademarks are of significant importance to Griffon's HBP and CPP businesses. With 50 years of experience and innovation in the garage door industry, and over 100 years of experience in the rolling steel door industry, HBP has a significant level of goodwill in its strong family of brands, including: Clopay®, America's Favorite Doors®; Holmes Garage Door Company®; IDEAL Door®; and the Cornell® and Cookson® commercial door brands. Principal global and regional trademarks used by CPP for its tool and landscape products include AMES®, True Temper®, Garant®, Harper®, UnionTools®, Westmix™, Cyclone®, Southern Patio®, Northcote Pottery™, Nylex®, Hills®, Kelkay®, Tuscan Path®, Pope®, La Hacienda®, Kelso™, Apta®, and Dynamic Design®, as well as contractor-oriented brands including Razor-Back® Professional Tools and Jackson® Professional Tools. Storage and home organization brands within CPP include ClosetMaid®, MasterSuite®, Suite Symphony®, Cubeicals®, ExpressShelf®, SpaceCreations®, Maximum Load®, SuperSlide® and ShelfTrack®. CPP's Hunter Fan Company has over 135 years of experience in the ceiling fan industry with well-recognized brands including Hunter®, Casablanca®, Hunter Industrial®, and Jan Fan®. The HBP and CPP businesses have approximately 1,564 registered trademarks and approximately 149 pending trademark applications around the world. Griffon's rights in these trademarks endure for as long as they are used and registered.

Patents are also important to the HBP and CPP businesses. HBP holds approximately 65 issued patents and 27 pending patent applications in the U.S., as well as approximately 18 and 108 corresponding foreign patents and patent applications, primarily related to garage door system components and operation. CPP protects its designs and product innovation through the use of patents, and currently has approximately 855 issued patents and approximately 187 pending patent applications in the U.S., as well as approximately 345 and 69 corresponding foreign patents and patent applications, respectively. Design patents are generally valid for fourteen years, and utility patents are generally valid for twenty years, from the date of filing. Griffon's patents are in various stages of their terms of validity.

Sustainable Business Practices

Griffon and its operating companies have always taken into account environmental, social and governance ("ESG") considerations in the management of our businesses. Griffon is a subscriber to the United Nations Global Compact ("UNGC") and published its inaugural annual Sustainability Report in August 2022, in relation to fiscal 2021, benchmarked to both United Nations Global Compact ("UNGC") Sustainable Development Goals and to the Sustainability Accounting Standards Board ("SASB") criteria. Since then, Griffon published an annual Sustainability Report in November 2024 in relation to calendar 2023; and in November 2023 in relation to calendar 2022. The Griffon ESG policy, and annual Sustainability Report, can be found on the Griffon website at www.griffon.com. We expect to file our calendar year 2024 Sustainability Report before the end of calendar 2025.

The annual Sustainability Report discusses employee safety, employee education and welfare, carbon emissions, air emissions, energy consumption, water consumption, waste generation, recycled raw materials, and packaging initiatives, as well as community involvement and charitable giving. In our calendar 2022 report, we set an overarching goal of 30 percent reduction across six key metrics by 2030: carbon emissions, air emissions, water consumption, hazardous waste generated, lost time rates, and recordable injury rates. In addition, in 2023, in connection with the announcement of an expansion of CPP's global sourcing strategy, we adopted a Supplier Code of Conduct ("SCC") that essentially binds our suppliers to the same ESG goals and criteria to which Griffon adheres.

Griffon has assessed the environmental risk from its operations and focused its efforts to date on areas with the potential to have the greatest environmental impact. Where available, we use recycled materials to construct our products, and we continuously improve our packaging to reduce both volume and environmental impact. For example, bags used to pack AMES' Kelkay aggregate products in the UK are made from plant-based materials, and not from petroleum. The AMES Companies use a box-on-demand system that reduces packaging size. Approximately seventy percent of the steel used in HBP's garage doors is recycled steel. AMES is a member of the Appalachian Hardwood Manufacturers Association, which provides sustainable hardwoods for AMES tools, and is committed to purchasing hardwoods through the Sustainable Forestry Initiative.

Our operating companies are involved in the local communities in which they operate. We are involved in more than 100 charitable and community organizations, including well known national concerns such as Habitat for Humanity, Boys and Girls Clubs, the Home Depot Foundation (Diamond Sponsor), the Lowe's Foundation, and the American Cancer Society, as well as local groups such as garden clubs. Our communities know they can count on our support.

Over the last six years, we have invested millions of dollars in capital improvements relating to employee safety and health. These improvements include major upgrades to our loading and unloading operations (which had been the source of a significant portion of our worker injuries), ergonomic improvements, machine guarding and elimination of certain high-risk repetitive jobs through the use of robotics. Griffon has also invested significant time and capital in reducing ergonomic injuries through better work positioning and lifting improvements. Griffon has invested over one million dollars in improvements to employee welfare facilities, such as break areas and cafeterias.

More importantly, we view our employees as more than just workers. Through our Employee Stock Ownership Plan ("ESOP"), our U.S. employees own approximately nine percent of Griffon stock. Our businesses engage in a variety of outreach programs in the various communities in which we operate to recruit new employees at all levels. These programs involve high schools and vocational schools, as well as colleges and universities, and often include internships as a means for potential new employees to experience what it is like to be part of our team. We also have a variety of onboarding programs, onsite job training programs, leadership development programs, and tuition reimbursement and education assistance policies to further the development and advancement of our employees.

In all of our geographies, we conduct regular audits of suppliers and utilize contractual terms that require our suppliers to comply with environmental and social laws and regulations, as well as with our policies, including with respect to human rights, child labor, slave labor and unsafe working conditions. Our SCC requires that all new suppliers, major volume suppliers and suppliers in higher risk areas submit a formal certification of compliance with our SCC. All key suppliers worldwide are required to periodically submit to an SCC audit, which evaluates not only quality control and vendor capabilities, but assesses to what extent each supplier emphasizes environmental, labor and social considerations in the operation of its business. Griffon companies are in the process of phasing in the SCC over a multi-year period; the initial year included training and program roll-out.

Honesty, transparency, and ethical practices have been ordinary course at Griffon for decades, and we continue to review and upgrade our programs in these areas. Our Code of Business Conduct and Ethics ("Code"), to which every employee certifies annually, requires that each and every employee conduct business to the highest ethical standards. Any acts of bribery are strictly prohibited, as is human trafficking and activities supporting human trafficking, such as the use of conflicts minerals. The Code

prohibits all business courtesies except for those with an insignificant value, and even then, only under limited circumstances. Our SCC reinforces the same expectations from our suppliers. Our Corporate Governance Guidelines are published on our website. While the guidelines require that a majority of directors be independent, currently all of our directors are independent except our CEO (constituting approximately 91% of our directors). Griffon has appointed a lead independent director and has four principal board committees - Audit, Compensation, Nominating and Corporate Governance, and Finance - each of which has its responsibilities set forth in a charter available on the Griffon website.

We expect each of our employees and suppliers around the world to work hard to deliver outstanding products to our customers and to deliver value to our shareholders. And, while doing so, we expect them to respect and adhere to our environmental, social and governance commitments and policies, and to make our company a place where all employees are proud to come to work every day.

Executive Officers of the Registrant

The following is a current list of Griffon's executive officers:

Name	Age	Positions Held and Prior Business Experience
Ronald J. Kramer	67	Chief Executive Officer since April 2008, Chairman of the Board since January 2018, Director since 1993, Vice Chairman of the Board from November 2003 to January 2018. From 2002 through March 2008, President and a Director of Wynn Resorts, Ltd. (Nasdaq:WYNN), a developer, owner and operator of destination casino resorts. From 1999 to 2001, Managing Director at Dresdner Kleinwort Wasserstein, an investment banking firm, and its predecessor Wasserstein Perella & Co. Member of the board of directors of Franklin BSP Capital Corporation and Franklin BSP Private Credit Fund. Former member of the board of directors of Douglas Elliman Inc. (NYSE: DOUG), from December 2021 to July 2024, and of Entain pls (LSE:ENT), from March 2024 to March 2025.
Robert F. Mehmel	63	President and Chief Operating Officer since December 2012, director from May 2018 to March 2022. From August 2008 to October 2012, President and Chief Operating Officer of DRS Technologies (Formerly NYSE:DRS) ("DRS"), a supplier of integrated products, services and support to military forces, intelligence agencies and prime contractors worldwide. From May 2006 to August 2008, Executive Vice President and Chief Operating Officer of DRS and from January 2001 to May 2006, Executive Vice President, Business Operations and Strategy, of DRS.
Brian G. Harris	56	Executive Vice President and Chief Financial Officer since November 2024. Senior Vice President and Chief Financial Officer from August 2015 to November 2024. From November 2012 to July 2015, Vice President and Controller of Griffon. From July 2009 to July 2015, Griffon's Chief Accounting Officer. From May 2005 to June 2009, Assistant Controller of Dover Corporation, a diversified global manufacturer (NYSE:DOV). Prior to this time, held various finance and accounting roles with Hearst Argyle Television (Formerly NYSE:HTV), John Wiley and Sons, Inc. (NYSE:WLY) and Arthur Andersen, LLP.

Name	Age	Positions Held and Prior Business Experience
Seth L. Kaplan............	56	Senior Vice President, General Counsel and Secretary since May 2010. From July 2008 to May 2010, Assistant General Counsel and Assistant Secretary at Hexcel Corporation (NYSE:HXL), a manufacturer of advanced composite materials for space and defense, commercial aerospace and wind energy applications. From 2000 to July 2008, Senior Corporate Counsel and Assistant Secretary at Hexcel. From 1994 to 2000, associate at the law firm Winthrop, Stimson, Putnam & Roberts (now Pillsbury Winthrop Shaw Pittman LLP).

Item 1A. *Risk Factors*

Griffon's business, financial condition, operating results and cash flows can be impacted by a number of factors which could cause Griffon's actual results to vary materially from recent or anticipated future results. The risk factors discussed in this section should be carefully considered with all of the information in this Annual Report on Form 10-K. These risk factors should not be considered the only risk factors facing Griffon. Additional risks and uncertainties not presently known or that are currently deemed immaterial may also materially impact Griffon's business, financial condition, operating results and cash flows in the future.

In general, Griffon is subject to the same general risks and uncertainties that impact other diverse manufacturing companies including, but not limited to, general economic, industry and/or market conditions and growth rates; impact of natural disasters and pandemics, and their effect on global markets; possible future terrorist threats and their effect on the worldwide economy; and changes in laws or accounting rules. Griffon has identified the following specific risks and uncertainties that it believes have the potential to materially affect its business and financial condition.

Risks Related to Our Business

Current worldwide economic uncertainty and market volatility could adversely affect Griffon's businesses.

The current worldwide economic uncertainty and market volatility could continue to have an adverse effect on Griffon during 2026, within both the HBP and CPP segments, which are linked to the U.S. housing and the commercial property markets, and the U.S. economy in general. Purchases of many HBP and CPP products are discretionary for consumers who are generally more willing to purchase products during periods in which favorable macroeconomic conditions prevail. These conditions could make it more difficult to obtain additional credit on favorable terms for investments in current businesses or for acquisitions, or could render financing unavailable; in addition, while we do not have any material debt maturities prior to 2028, if these conditions persist, we may have difficulty refinancing our debt before it comes due. Griffon is also exposed to certain fundamental economic risks including a decrease in the demand for the products and services it offers or a higher likelihood of default on its receivables.

Adverse trends and general economic conditions, especially those that relate to construction and renovation, will impact Griffon's business.

The HBP and CPP businesses serve residential and commercial construction and renovation, and are influenced by market conditions that affect these industries. For the year ended September 30, 2025, approximately 63% and 37% of Griffon's consolidated revenue was derived from the HBP and CPP segments, respectively, which were dependent on renovation of existing homes, new home construction, and commercial non-residential construction, repair and replacement. The strength of the U.S. economy, the age of existing home stock, job growth, interest rates, consumer confidence and the availability of consumer credit, as well as demographic factors such as migration into the U.S. and

migration of the population within the U.S., have an effect on HBP and CPP. To the extent market conditions for residential or commercial construction and renovation are weaker than expected, this will likely have an adverse impact on the performance and financial results of the HBP and CPP businesses.

Griffon is exposed to fluctuations in inflation, which could negatively affect its business, financial condition and results of operations.

U.S. annual inflation rose to approximately 9.1% in 2022, its highest level in about 40 years, and has since moderated to the low-to-mid 2% range, according to the U.S. Department of Labor data and projections from the Social Security Administration. Although inflation rates have generally decreased over the last three years, future increases in inflation may result in decreased demand for Griffon's operating company's products and services and increased operating costs and expenses, including for labor, raw materials and supplies. Increases in interest rates, especially if coupled with reduced government spending and volatility in financial markets, may have the effect of further increasing economic uncertainty and heightening these risks, which may result in economic recession. As a result of fluctuations in inflation, we may seek to increase the sales prices of our products and services in order to maintain satisfactory margins. Any attempts to offset Griffon's cost increases with price increases may result in reduced sales, increased customer dissatisfaction or reputational harm. Additionally, Griffon's operating companies may be unable to raise the prices of their products and services at or above the rate at which their costs increase, which may reduce operating margins and have a material adverse effect on financial results and future growth.

Griffon operates in highly competitive industries and may be unable to compete effectively.

Griffon's operating companies face intense competition in the markets they serve. Griffon competes primarily on the basis of technical expertise, product differentiation, quality of products and services, and price. There are a number of competitors to Griffon, some of which are larger and have greater resources than Griffon's operating companies. Griffon's operating companies may face additional competition from companies that operate in countries with significantly lower operating costs.

Many HBP and CPP customers are large mass merchandisers, such as home centers, warehouse clubs, discount stores, commercial distributors and e-commerce companies. The growing share of the market represented by these large mass merchandisers, together with changes in consumer shopping patterns, have contributed to the increase of multi-category retailers and e-commerce companies that have strong negotiating power with suppliers. Many of these retailers import products directly from suppliers based in low-cost countries to source and sell products under their own private label brands to compete with HBP and CPP products and brands, which increases pricing pressure on our products. In addition, the intense competition in the retail and e-commerce sectors, combined with the overall increasingly competitive economic environment, may cause certain HBP or CPP customers to experience financial difficulty, or fail. The loss of, or a failure by, one of HBP's or CPP's significant customers could adversely impact our sales and operating cash flows.

To address all of these challenges, HBP and CPP must be able to respond to these competitive pressures, and the failure to respond effectively could result in a loss of sales, reduced profitability and a limited ability to recover cost increases through price increases. In addition, there can be no assurance that Griffon will not encounter increased competition in the future, which could have a material adverse effect on Griffon's financial results.

The loss of large customers can harm financial results.

A small number of customers account for, and are expected to continue to account for, a substantial portion of Griffon's consolidated revenue. Home Depot and Menards are significant customers of HBP and Home Depot, Lowe's and Bunnings are significant customers of CPP. Home Depot accounted for approximately 10% of Griffon's consolidated revenue, 9% of HBP's revenue and 12% of CPP's revenue for the year ended September 30, 2025. Future operating results will continue to substantially

depend on the success of Griffon's largest customers, as well as Griffon's relationships with them. Orders from these customers are subject to fluctuation and may be reduced materially due to changes in customer needs or other factors. Any reduction or delay in sales of products to one or more of these customers could significantly reduce Griffon's revenue. Griffon's operating results also depend on successfully developing and maintaining relationships with additional key customers. Griffon cannot ensure that its largest customers will be retained or that additional key customers will be recruited. Also, both HBP and CPP extend credit to its customers, which exposes Griffon to credit risk. The Company's largest customer accounted for approximately 6%, 14% and 9% of the net accounts receivable of HBP, CPP and Griffon as of September 30, 2025, respectively. If this customer were to become insolvent or otherwise unable to pay its debts, the financial condition, results of operations and cash flows of HBP, CPP and Griffon could be adversely affected.

Reliance on third party suppliers and manufacturers may impair the ability of HBP and CPP to meet their customer demands.

HBP and CPP rely on a limited number of companies globally to supply components and manufacture certain of their products. The percentage of HBP and CPP worldwide sourced finished goods as a percent of revenue approximated 6% and 38%, respectively, in 2025. The percentage of HBP and CPP's worldwide sourced components as a percent of cost of goods sold approximated 18% and 3%, respectively, in 2025. Reliance on third party suppliers and manufacturers may reduce control over the timing of deliveries and quality of both HBP and CPP products. Reduced product quality or failure to deliver products timely may jeopardize relationships with certain of HBP's and CPP's key customers. In addition, reliance on third party suppliers or manufacturers may result in the failure to meet HBP and CPP customer demands. Continued turbulence in the worldwide economy may affect the liquidity and financial condition of HBP and CPP suppliers. Should any of these parties fail to manufacture sufficient supply, go out of business or discontinue a particular component, alternative suppliers may not be found in a timely manner, if at all. Such events may impact the ability of HBP and CPP to fill orders, which could have a material adverse effect on customer relationships. Finally, the recent expansion by CPP of its global sourcing strategy to include various product lines for the U.S. market has increased CPP's reliance on third-party suppliers and, accordingly, CPP's exposure to the risks relating to the use of third-party suppliers.

If Griffon is unable to obtain raw materials for products at favorable prices it could adversely impact operating performance.

HBP and CPP suppliers primarily provide resin, wood, steel and wire rod. Both of these businesses could experience shortages of raw materials or components for products or be forced to seek alternative sources of supply. If temporary shortages due to disruptions in supply caused by weather, transportation, production delays or other factors require raw materials to be secured from sources other than current suppliers, the terms may not be as favorable as current terms or certain materials may not be available at all. In recent years, both HBP and CPP have experienced price increases for most of their raw materials.

While most key raw materials used in Griffon's businesses are generally available from numerous sources, raw materials are subject to price fluctuations. Because raw materials in the aggregate constitute a significant component of the cost of goods sold, price fluctuations could have a material adverse effect on Griffon's results of operations. Griffon's ability to pass raw material price increases to customers is limited due to supply arrangements and competitive pricing pressure, and there is generally a time lag between increased raw material costs and implementation of corresponding price increases for Griffon's products. In particular, sharp increases in raw material prices are more difficult to pass through to customers and may negatively affect short-term financial performance.

CPP is subject to risks from sourcing from international locations, especially China

CPP's business is global, with products and raw materials sourced from, and manufactured and sold, in multiple countries around the world. There are risks associated with conducting a business that may be impacted by political and other developments associated with international trade. In this regard, certain products sold by CPP in the United States and elsewhere are currently sourced from suppliers in China, with some of these products sourced exclusively from suppliers in China. Certain raw materials used by CPP are also sourced from China and therefore may have their prices and availability impacted by tariffs imposed on trade between the United States and China. Through the expanded sourcing strategy and the closure of U.S. facilities, CPP has increased its reliance on suppliers in China, which could exacerbate the impact of tariffs. While CPP has established certain suppliers outside of China and is in the process of developing additional suppliers outside of China, and has increased sourcing from several other countries in an effort to minimize the risks associated with sourcing from China, various tariff actions taken since January 2025 by the U.S. government relating to imports from other countries may increase the costs of shifting CPP's supply chain away from China. Uncertainties regarding the future of these tariffs may cause CPP to delay, postpone, or modify some of its supply chain sourcing changes, and may thereby impact CPP's ability to realize the full benefits of its expanded sourcing strategy.

The sourcing of CPP finished goods, components and raw materials from China are generally subject to supply agreements with Chinese companies. China does not have a well-developed, consolidated body of laws governing agreements with international customers. Enforcement of existing laws or contracts based on existing law may be uncertain and sporadic, and it may be difficult to obtain swift and equitable enforcement or to obtain enforcement of a judgment by a court of another jurisdiction, including other jurisdictions within China itself. The relatively limited Chinese judicial precedent on matters of international trade in many cases creates additional uncertainty as to the outcome of any litigation. In addition, interpretation of statutes and regulations in China may be subject to government policies or political changes.

Because of the volume of sourcing by CPP from international locations, trade actions by the U.S. government since January 2025, as well as future trade actions, represent a continuing risk to CPP's revenue and operating performance. U.S. imports from China are projected to reach $439 billion in 2025. The majority of these imports were already subject to the tariffs imposed on Chinese imports since March 2018 under Section 301 of the Trade Act of 1974, as amended. In January 2025, the U.S. issued the "America First Trade Policy," pursuant to which the administration commenced a broad range of trade investigations that have resulted in the imposition of a series of significant tariffs on products from many countries around the world. These actions aim to address national security, migration and trade imbalances, but have triggered significant global trade tensions and numerous legal challenges. Since their implementation, many of these tariffs have been paused, expanded, increased, reduced, or rolled back, in some cases multiple times, and several additional tariffs have been added, increasing the overall scope of products covered. The volatile nature of these tariff actions creates significant uncertainty about the financial and operational impact on CPP's operating and financial performance and may hinder the ability of CPP to develop and implement sustainable tariff mitigation strategies. Additionally, the U.S. government has announced an enhanced focus on aggressive customs enforcement, including through the creation of a Trade Fraud Task Force, a cross-agency initiative of the U.S. Departments of Justice and Homeland Security aimed at combatting trade fraud, tariff evasion, and customs violations. Compliance with evolving trade regulations in light of this heightened enforcement paradigm has increased administrative complexity and costs, and the failure to adapt quickly and effectively to these changes could materially and adversely affect CPP's business.

In addition to tariffs, an increased global focus on forced labor in supply chains continues to have the potential to impact our business operations. In June 2022, the Uyghur Forced Labor Prevention Act (UFLPA) went into effect and establishes a rebuttable presumption that goods made in whole or in part in the Xinjiang Uyghur Autonomous Region of the People's Republic of China are produced with forced labor, and directs U.S. Customs and Border Protection (CBP) to prevent entry of products made with forced labor into the U.S. market. Importers whose shipments are detained by CBP under the UFLPA can rebut the presumption with "clear and convincing evidence" that the products were not

produced with forced labor. This requires that the importer submit detailed information regarding every supplier and sub-supplier, and all components and raw materials, relating to the manufacturing and transportation of goods being detained. Detention costs accrue during the pendency of CBP's evaluation.

From October 1, 2024 through September 30, 2025, more than 6,900 shipments to U.S importers were targeted by CBP for further inspection, compared to approximately 4,200 shipments in the prior year. Neither CPP nor its suppliers currently manufacture or source products, components or raw materials from the Uyghur region of China; however, CBP takes a broad approach when targeting shipments it believes may have originated from the Uyghur region based on product definitions, tariff codes and supplier names that lead them to suspect the goods come from the Uyghur region. Additionally, the Forced Labor Enforcement Task Force has determined that certain industry sectors (including consumer products and mass merchandising, electronics, apparel, cotton and cotton products, silica-based products, PVC and aluminum products), and countries of origin outside of China (including Malaysia, Vietnam, and Thailand) have an inherently higher risk of forced labor, such that CBP may detain goods within these sectors suspected of being manufactured with materials originating from Xinjiang, or coming from a country identified as higher risk.

As a result, CPP shipments may be targeted for detention in which case they become subject to the rebuttable presumption that they were sourced from the Uyghur region or another high-risk country, even though they are not imported directly from China or are otherwise demonstrably outside the scope of the UFLPA. In view of the increased enforcement of forced labor initiatives, we are continuing to update our compliance measures and work with our supply base to validate their supply chains, from raw materials through components to finished goods, to ensure our goods are not made using forced labor. We cannot be certain that our products will not be targeted or that our shipments will not be detained, which may impact our operating performance.

HBP and CPP operations are also subject to the effects of international trade agreements and regulations such as the United States-Mexico-Canada Agreement (USMCA), which will undergo a mandatory six-year review in 2026, and the activities and regulations of the World Trade Organization. Although these trade agreements generally have positive effects on trade liberalization, sourcing flexibility and the cost of goods by reducing or eliminating the duties and/or quotas assessed on products manufactured in a particular country, trade agreements can also adversely affect HBP and CPP. For example, trade agreements can result in setting quotas on products that may be imported from a particular country into key markets including the U.S., Canada, Australia and the U.K., or may make it easier for other companies to compete by eliminating restrictions on products from countries in which HBP and CPP competitors source products. With the expansion of its global sourcing strategy and the closure of numerous U.S. manufacturing locations, CPP is likely to experience a diminished ability to take advantage of the trade benefits of the USMCA.

The ability of HBP and CPP to import products in a timely and cost-effective manner may continue to be affected by conditions at ports or issues that otherwise affect transportation and warehousing providers, such as port and shipping capacity, fuel prices, labor disputes, severe weather or increased homeland security requirements in the U.S. and other countries, as well as the potential for increased costs due to currency exchange fluctuations. Changes in U.S. trade policy, including new tariffs and vessel fees for Chinese-built ships, as well as tariff-driven inventory surges, can disrupt international shipping, complicate import planning, and may result in delivery delays and increased costs, which could have an adverse impact on the business and financial results of HBP and CPP.

A future pandemic could adversely impact our results of operations.

If a future pandemic or similar outbreak occurs and governments take protective actions, it may have a material adverse impact on Griffon's businesses and operating results for the reasons described above. In such event, the extent and duration of any impact on our businesses would be difficult to predict. To the extent a new outbreak adversely affects our businesses, operations, financial condition and operating results, it may also have the effect of heightening many of the other risks factors such as those

relating to our high level of indebtedness, our need to generate sufficient cash flows to service our indebtedness, and our ability to comply with the covenants contained in the agreements that govern our indebtedness, as described in more detail below.

Griffon's businesses are subject to seasonal variations and the impact of uncertain weather patterns.

HBP's business is driven by renovation and construction during warm weather, which is historically at reduced levels during the winter months, generally in our second quarter. In 2025, 49% of CPP's sales occurred during the second and third quarters compared to 52% in 2024 and 54% in 2023.

Demand for lawn and garden products is influenced by weather, particularly weekend weather during the peak gardening season. AMES' sales volumes could be adversely affected by certain weather patterns such as unseasonably cool or warm temperatures, hurricanes, water shortages or floods. In addition, lack of snow or lower than average snowfall during the winter season may result in reduced sales of certain AMES' products such as snow shovels and other snow tools. As global temperatures have warmed as a result of climate change, average snowfall levels in the United States and Canada have decreased and are expected to continue to decrease; this has resulted, and will likely continue to result, in reduced sales of snow shovels and other snow tools. As a result, AMES' results of operations, financial results and cash flows could be adversely impacted.

Griffon's operations and reputation may be adversely impacted if our information technology (IT) systems, or the IT systems of third parties with whom we do business, fail to perform adequately or if we or such third parties are the subject of a data breach or cyber-attack.

We rely on IT systems, networks and services to conduct our business, including communicating with employees and our key commercial customers, ordering and managing materials and products from suppliers, shipping products to customers and analyzing and reporting results of operations. While we have taken steps to ensure the security of our information technology systems, our systems may nevertheless be vulnerable to computer viruses, security breaches and other disruptions from unauthorized users. Cyber criminals are becoming more sophisticated and knowledgeable every day, and as their tactics evolve, it is a constant challenge to ensure that our IT security practices are sufficient to protect our IT systems and data. If our IT systems are damaged or cease to function properly for an extended period of time, whether as a result of a significant cyber incident or otherwise, our ability to communicate internally as well as with our customers and suppliers could be significantly impaired, which may adversely impact our business, operations and reputation.

In the normal course of our business, we collect, store, and transmit proprietary and confidential information regarding our brands, customers, employees, suppliers and others. We also engage third parties that store, process and transmit these types of information, as well as personal information, on our behalf. An operational failure or breach of security from increasingly sophisticated cyber threats could lead to loss, misuse or unauthorized disclosure of this information about our employees or customers, which may result in regulatory or other legal proceedings, and could have a material adverse effect on our business and reputation. We also may not have the resources or technical sophistication to anticipate or prevent rapidly evolving types of cyber-attacks. Any such attacks or precautionary measures taken to prevent anticipated attacks may result in increasing costs, including costs for additional technologies, training, and third-party consultants. The losses incurred from a breach of data security and operational failures as well as the precautionary measures required to address this evolving risk may adversely impact our financial condition, results of operations and cash flows.

We depend on our information systems to process orders, manage inventory and accounts receivable collections, purchase, sell, and ship products efficiently and on a timely basis, maintain cost-effective operations, and provide superior service to our customers. If these systems are damaged, infiltrated, shutdown, or cease to function properly (whether as a result of planned upgrades, force majeure, telecommunications failures, hardware or software break-ins or viruses, other cyber security incidents, or otherwise), we may suffer disruption in our ability to manage and operate our business.

There can be no assurance that the precautions which we have taken against certain events that could disrupt the operations of our IT systems will prevent the occurrence of such a disruption. Any such disruption could have a material adverse effect on our business and results of operations.

Griffon may be unable to implement its acquisition growth strategy, which may result in added expenses without a commensurate increase in revenue and income, and divert management's attention.

Making strategic acquisitions is a part of Griffon's growth plans. The ability to successfully complete acquisitions depends on identifying and acquiring, on acceptable terms, companies that either complement or enhance currently held businesses or expand Griffon into new profitable businesses, and, for certain acquisitions, obtaining financing on acceptable terms. Additionally, Griffon must properly integrate acquired businesses in order to maximize profitability. The competition for acquisition candidates is intense and Griffon cannot assure that it will successfully identify acquisition candidates and complete acquisitions at reasonable purchase prices, in a timely manner, or at all. Further, there is a risk that acquisitions will not be properly integrated into Griffon's existing structure. In the past, Griffon has consummated a group of acquisitions within a short time period, which could occur again; the risks relating to integration of an acquisition may be exacerbated when numerous acquisitions are consummated in a short time period.

In implementing an acquisition growth strategy, the following may be encountered:

- Costs associated with incomplete or poorly implemented acquisitions;
- Expenses, delays and difficulties of integrating acquired companies into Griffon's existing organization;
- Dilution of the interest of existing stockholders;
- Diversion of management's attention; or
- Difficulty in obtaining financing on acceptable terms, or at all.

An unsuccessful implementation of Griffon's acquisition growth strategy, including the failure to properly integrate acquisitions, could have an adverse impact on Griffon's results of operations, cash flows and financial condition. We may also incur debt or assume contingent liabilities in connection with acquisitions, which could impose restrictions on our business operations and harm our operating results.

Risks Related to Our Indebtedness

Griffon's senior notes, which have limited covenants, are not due until 2028; our $800 million Term Loan B (current balance of $449 million), which also has limited covenants, is not due until 2029; and our $500 million revolving line of credit, which has greater covenant requirements, does not mature until 2028. However, in the event the 2028 Senior Notes are not repaid, refinanced, or replaced prior to December 1, 2027, the Revolver will mature on December 1, 2027. There are potential impacts from Griffon's use of debt to finance certain of its activities, especially acquisitions and expansions, as set forth below.

Compliance with restrictions and covenants in Griffon's debt agreements may limit its ability to take corporate actions.

The credit agreement entered into by, and, to a lesser extent, the terms of the senior notes issued by, Griffon, each contain covenants that restrict the ability of Griffon and its subsidiaries to, among other things, incur additional debt, pay dividends, incur liens and make investments, acquisitions, dispositions, restricted payments and capital expenditures. Under the credit agreement, Griffon is also required to comply with specific financial ratios and tests. Griffon may not be able to comply in the future with

these covenants or restrictions as a result of events beyond its control, such as prevailing economic, financial and industry conditions or a change in control of Griffon. If Griffon defaults in maintaining compliance with the covenants and restrictions in its credit agreement or the senior notes, its lenders could declare all of the principal and interest amounts outstanding due and payable and, in the case of the credit agreement, terminate the commitments to extend credit to Griffon in the future. If Griffon or its subsidiaries are unable to secure credit in the future, its business could be harmed.

Griffon may be unable to raise additional financing if needed.

Griffon may need to raise additional financing in the future in order to implement its business plan, refinance debt, or acquire new or complimentary businesses or assets. Any required additional financing may be unavailable, or only available at unfavorable terms, due to uncertainties in the credit markets. If Griffon raises additional funds by issuing equity securities, current holders of its common stock may experience significant ownership interest dilution and the holders of the new securities may have rights senior to the rights associated with current outstanding common stock.

Griffon's indebtedness and interest expense could limit cash flow and adversely affect operations and Griffon's ability to make full payment on outstanding debt.

Griffon's indebtedness poses potential risks such as:

- A substantial portion of cash flows from operations could be used to pay principal and interest on debt, thereby reducing the funds available for working capital, capital expenditures, acquisitions, product development and other general corporate purposes;
- Insufficient cash flows from operations may force Griffon to sell assets, or seek additional capital, which Griffon may not be able to secure on favorable terms, if at all; and
- Its level of indebtedness may make Griffon more vulnerable to economic or industry downturns.

Risk Related to Our Common Stock

Griffon has the ability to issue additional equity securities, which would lead to dilution of issued and outstanding common stock.

The issuance of additional equity securities or securities convertible into equity securities would result in dilution to existing stockholders' equity interests. Griffon is authorized to issue, without stockholder vote or approval, 3,000,000 shares of preferred stock in one or more series, and has the ability to fix the rights, preferences, privileges and restrictions of any such series. Any such series of preferred stock could contain dividend rights, conversion rights, voting rights, terms of redemption, redemption prices, liquidation preferences or other rights superior to the rights of holders of Griffon's common stock. While there is no present intention of issuing any such preferred stock, Griffon reserves the right to do so at any time. In addition, Griffon is authorized to issue, without stockholder approval, up to 85,000,000 shares of common stock, of which 46,346,048 shares, net of treasury shares, were outstanding as of September 30, 2025. Additionally, Griffon is authorized to issue, without stockholder approval, securities convertible into either shares of common stock or preferred stock.

General Risk Factors

Each of Griffon's businesses faces risks related to the disruption of its primary manufacturing facilities.

The manufacturing facilities for each of Griffon's businesses are concentrated in just a few locations, and in the case of CPP, include third-party manufacturing facilities, some of which are abroad in low-cost locations. Any of Griffon's manufacturing facilities, including those of Griffon's third-party suppliers, are subject to disruption for a variety of reasons, such as natural or man-made disasters,

pandemics, terrorist activities, disruptions of information technology resources, and utility interruptions. Such disruptions may cause delays in shipping products, which could result in the loss of business or customer trust, adversely affecting Griffon's businesses and operating results.

Manufacturing capacity constraints or increased manufacturing costs may have a material adverse effect on Griffon's business, results of operations, financial condition and cash flows.

Griffon's current manufacturing resources may be inadequate to meet significantly increased demand for some of its products. Griffon's ability to increase its manufacturing capacity depends on many factors, including the availability of capital, steadily increasing consumer demand, equipment delivery, construction lead-times, installation, qualification, and permitting and other regulatory requirements. Increasing capacity through the use of third-party manufacturers may depend on Griffon's ability to develop and maintain such relationships and the ability of such third parties to devote additional capacity to meet Griffon's needs.

A lack of sufficient manufacturing capacity to meet demand could cause customer service levels to decrease, which may negatively affect customer demand for Griffon's products and customer relations generally, which in turn could have a material adverse effect on Griffon's business, results of operations, financial condition and cash flows. In addition, operating facilities at or near capacity may also increase production and distribution costs and negatively impact relations with employees or contractors, which could result in disruptions to operations.

In addition, manufacturing costs may increase significantly and Griffon may not be able to pass along all or any of such increase to its customers; and when such increases are passed off to customers, there will be a time lag, which may be significant.

If HBP and CPP do not continue to develop and maintain leading brands or realize the anticipated benefits of advertising and promotion spend, its operating results may suffer.

The ability of HBP and CPP to compete successfully depends in part on the company's ability to develop and maintain leading brands so that retail and other customers will need its products to meet consumer demand. Leading brands allow each of CPP and HBP to realize economies of scale in its operations. The development and maintenance of such brands require significant investment in brand-building and marketing initiatives. While HBP and CPP plan to continue to increase expenditures for advertising and promotion and other brand-building and marketing initiatives over the long term, the initiatives may not deliver the anticipated results and the results of such initiatives may not cover the costs of the increased investment.

Griffon may be required to record impairment charges for goodwill and indefinite-lived intangible assets.

Griffon is required to assess goodwill and indefinite-lived intangible assets annually for impairment or on an interim basis if changes in circumstances or the occurrence of events suggest impairment exists. If impairment testing indicates that the carrying amount of reporting units or indefinite-lived intangible assets exceeds the respective fair value, an impairment charge would be recognized. If goodwill or indefinite-lived intangible assets were to become impaired, the results of operations could be materially and adversely affected.

During the fiscal years ended September 30, 2025, 2024 and 2023, Griffon performed annual impairment testing of its goodwill and indefinite-lived intangible assets. During the third quarter of fiscal 2025, indicators of goodwill and indefinite-lived intangible asset impairments were present for the Hunter Fan reporting unit within the CPP reportable segment. As a result of this assessment, during the third quarter of fiscal 2025, we recorded pre-tax, non-cash impairment charges of $136,612 and $107,000 related to Hunter Fan's goodwill and indefinite-lived intangible assets, respectively, which resulted in an aggregate decrease of $4.65 in our earnings per share for the year ended September 30, 2025. Indicators

of impairment were not present for the HBP reportable segment or the AMES reporting unit within the CPP reportable segment during the fiscal year ended September 30, 2025.

For the fiscal year ended September 30, 2024, the annual impairment testing did not result in any impairments to goodwill or indefinite-lived intangible assets. For the fiscal year ended September 30, 2023, we recorded a non-cash, pre-tax indefinite-lived intangible assets impairment of $109,200, which resulted in an aggregate decrease of $1.49 in our earnings per share for the year ended September 30, 2023. Should we have to record any impairment charges in the future, it could have a significant negative impact on our earnings per share for the year in which any such impairment charge is recorded.

If Griffon's subcontractors or suppliers fail to perform their obligations, Griffon's performance and ability to win future business could be harmed.

Griffon relies on other companies to provide materials, major components and products to fulfill contractual obligations. Such arrangements may involve subcontracts, teaming arrangements, or supply agreements with other companies. There is a risk that Griffon may have disputes regarding the quality and timeliness of work performed. In addition, changes in the economic environment, including constraints on available financing, may adversely affect the financial stability of Griffon's supply chain and their ability to meet their performance requirements or provide needed supplies on a timely basis. A disruption or failure of any supplier could have an adverse effect on Griffon's business resulting in an impact to profitability, possible termination of a contract, imposition of fines or penalties, and harm to Griffon's reputation impacting its ability to secure future business.

Griffon's companies must continually improve existing products, design and sell new products and invest in research and development in order to compete effectively.

The markets for Griffon's products are characterized by rapid technological change, evolving industry standards and continuous improvements in products. Due to constant changes in Griffon's markets, future success depends on Griffon's ability to develop new technologies, products, processes and product applications. Griffon's long-term success in the competitive retail environment and the industrial and commercial markets depends on its ability to develop and commercialize a continuing stream of innovative new products that are appealing to ultimate end users and create demand. New product development and commercialization efforts, including efforts to enter markets or product categories in which Griffon has limited or no prior experience, have inherent risks. These risks include the costs involved, such as development and commercialization, product development or launch delays, and the failure of new products and line extensions to achieve anticipated levels of market acceptance or growth in sales or operating income.

Griffon also faces the risk that its competitors will introduce innovative new products that compete with Griffon's products. In addition, sales generated by new products could cause a decline in sales of Griffon's other existing products. If new product development and commercialization efforts are not successful, Griffon's financial results could be adversely affected.

Product and technological developments are accomplished both through internally-funded R&D projects, as well as through strategic partnerships with customers. Because it is not generally possible to predict the amount of time required and costs involved in achieving certain R&D objectives, actual development costs may exceed budgeted amounts and estimated product development schedules may be extended. Griffon's financial condition and results of operations may be materially and adversely affected if:

- Product improvements are not completed on a timely basis;
- New products are not introduced on a timely basis or do not achieve sufficient market penetration;

- There are budget overruns or delays in R&D efforts; or
- New products experience reliability or quality problems, or otherwise do not meet customer preferences or requirements.

The loss of certain key officers or employees could adversely affect Griffon's business.

The success of Griffon is materially dependent upon the continued services of certain key officers and employees. The loss of such key personnel could have a material adverse effect on Griffon's operating results or financial condition.

Griffon is exposed to a variety of risks relating to non-U.S. sales and operations, including non-U.S. economic and political conditions and fluctuations in exchange rates.

Griffon and its companies conduct operations in Canada, Australasia, the U.K., and China, and sell their products in many countries around the world. Sales of products by non-U.S. subsidiaries accounted for approximately 17% of consolidated revenue for the year ended September 30, 2025. These sales could be adversely affected by changes in political and economic conditions, trade protection measures, such as tariffs, the ability of the Company to enter into industrial cooperation agreements (offset agreements), differing intellectual property rights and laws and changes in regulatory requirements that restrict the sales of products or increase costs in such locations. Enforcement of existing laws in such jurisdictions can be uncertain, and the lack of a sophisticated body of laws can create various uncertainties, including with respect to customer and supplier contracts. Currency fluctuations between the U.S. dollar and the currencies in the non-U.S. regions in which Griffon does business may also have an impact on future reported financial results.

Griffon's international sales and operations are subject to applicable laws relating to trade, export controls and foreign corrupt practices, the violation of which could adversely affect operations. Griffon is subject to various anti-corruption laws that prohibit improper payments or offers of payments to foreign governments and their officials for the purpose of obtaining or retaining business. In addition, Griffon is subject to certain export controls, laws and regulations, as well as to economic sanctions, laws and embargoes imposed by various governments or organizations, including the U.S. and the European Union or member countries. Violations of anti-corruption, export controls or sanctions laws may result in severe criminal or civil sanctions and penalties, including loss of export privileges and loss of authorizations needed to conduct Griffon's international business. Such violations could also result in Griffon being subject to other liabilities, which could have a material adverse effect on Griffon's business, results of operations and financial condition.

Griffon may not be able to protect its proprietary rights.

Griffon relies on a combination of patent, copyright and trademark laws, common law, trade secrets, confidentiality and non-disclosure agreements and other contractual provisions to protect proprietary rights. Such measures do not provide absolute protection and Griffon cannot give assurance that measures for protecting these proprietary rights are and will be adequate, or that competitors will not independently develop similar technologies.

Griffon or its suppliers may inadvertently infringe on, or may be accused of infringing on, proprietary rights of others.

Griffon is regularly improving its technology and employing existing technologies in new ways. Though Griffon takes reasonable precautions to ensure it does not infringe on the rights of others, it is possible that Griffon may inadvertently infringe on, or be accused of infringing on, proprietary rights held by others. If Griffon is found to have infringed on the propriety rights held by others, any related litigation

or settlement relating to such infringement may have a material effect on Griffon's business, results of operations and financial condition.

It is also possible that Griffon's suppliers may inadvertently infringe on, or be accused of infringing on, proprietary rights held by others. Any such infringement (or alleged infringement) may have a material adverse effect on Griffon's business, results of operations and financial condition. For example, a supplier may not be able to develop an alternative design that meets Griffon's needs at a comparable cost or at all, and the supply of certain products or components to Griffon may be interrupted.

Griffon may use artificial intelligence in its business, and challenges with properly managing its use could result in reputational harm, competitive harm and legal liability.

Griffon may use artificial intelligence ("AI") tools in its operations and systems and, as AI tools become more advanced and reliable, such use may increase. Griffon's success may become increasingly dependent on its ability to effectively leverage AI to support its operational efficiencies, such as with respect to supply chain, logistical systems, product development and marketing capabilities. Griffon's competitors may more successfully and more quickly integrate AI solutions, which could adversely impact Griffon's ability to compete effectively. Use of AI exposes Griffon to risks that the AI solutions used may be deficient, produce inaccurate or misleading output, become inoperable or subject Griffon to cybersecurity and data privacy breaches, all of which could lead to operational disruptions, flawed decision-making, increased costs, and difficulties improving product development and marketing through the use of AI, and could impact Griffon's operational effectiveness and financial condition. Additionally, the use of certain AI solutions could put Griffon's own information and intellectual property rights at risk or expose Griffon to the risk of infringing third parties' intellectual property or other rights. The global legal, regulatory, and ethical landscape surrounding AI is evolving rapidly and remains uncertain, which creates continued compliance risk and may increase the operational costs associated with Griffon's use of AI, may limit Griffon's ability to fully develop or use AI solutions as intended, and may cause legal repercussions and brand or reputational harm to Griffon.

Griffon is exposed to product liability and warranty claims.

Griffon is subject to product liability and warranty claims in the ordinary course of business, including with respect to former businesses now included within discontinued operations. These claims relate to the conformity of its products with required specifications, and to alleged or actual defects in Griffon's products (or in end-products in which Griffon's products were a component part) that cause damage to property or persons. There can be no assurance that the frequency and severity of product liability claims brought against Griffon will not increase, which claims can be brought either by an injured customer of an end product manufacturer who used one of Griffon's products as a component, or by a direct purchaser. There is also no assurance that the number and value of warranty claims will not increase as compared to historical claim rates, or that Griffon's warranty reserve at any particular time is sufficient. No assurance can be given that indemnification from customers or coverage under insurance policies will be adequate to cover future product liability claims against Griffon; for example, product liability insurance typically does not cover claims for punitive damages. Warranty claims are typically not covered by insurance at all. Product liability insurance can be expensive, difficult to maintain and may be unobtainable in the future on acceptable terms. The amount and scope of any insurance coverage may be inadequate if a product liability claim is successfully asserted. Furthermore, if any significant claims are made, the business and related financial condition of Griffon may be adversely affected by negative publicity.

Griffon has been, and may in the future be, subject to claims and liabilities under environmental laws and regulations.

Griffon's operations and assets are subject to environmental laws and regulations pertaining to the discharge of materials into the environment, the handling and disposal of wastes, including solid and

hazardous wastes, and otherwise relating to health, safety and protection of the environment, in the various jurisdictions in which it operates. Griffon does not expect to make any expenditure with respect to ongoing compliance with or remediation under these environmental laws and regulations that would have a material adverse effect on its business, operating results or financial condition. However, the applicable requirements under environmental laws and regulations may change at any time.

Griffon can incur environmental costs related to sites that are no longer owned or operated, as well as third-party sites to which hazardous materials are sent. Material expenditures or liabilities may be incurred in connection with such claims. See the Commitment and Contingencies footnote in the Notes to Consolidated Financial Statements for further information on environmental contingencies. Based on facts presently known, the outcome of current environmental matters are not expected to have a material adverse effect on Griffon's results of operations and financial condition. However, presently unknown environmental conditions, changes in environmental laws and regulations or other unanticipated events may give rise to claims that may involve material expenditures or liabilities.

Changes in income tax laws and regulations or exposure to additional income tax liabilities could adversely affect profitability.

Griffon is subject to Federal, state and local income taxes in the U.S. and in various taxing jurisdictions outside the U.S. Tax provisions and liabilities are subject to the allocation of income among various U.S. and international tax jurisdictions. Griffon's effective tax rate could be adversely affected by changes in the mix of earnings in countries with differing statutory tax rates, changes in any valuation allowance for deferred tax assets or the amendment or enactment of tax laws. Further changes in the tax laws could arise as a result of the base erosion and profit shifting project ("Pillar Two") undertaken by the Organization for Economic Co-operation and Development. Certain provisions of Pillar Two have been adopted by taxing authorities in countries in which we do business and could be adopted in additional countries in which we do business. These changes could increase the amount of taxes we pay and therefore decrease our results of operations and cash flows. The amount of income taxes paid is subject to audits by U.S. Federal, state and local tax authorities, as well as tax authorities in the taxing jurisdictions outside the U.S. If such audits result in assessments different from recorded income tax liabilities, Griffon's future financial results may include unfavorable adjustments to its income tax provision.

Actions taken by activist shareholders could be disruptive and costly and may conflict with or disrupt the strategic direction of our business.

Similar to the activist shareholder campaign initiated in 2021, activist shareholders may from time to time attempt to effect changes in our strategic direction and seek changes regarding Griffon's corporate governance or structure. Our Board of Directors and management team strive to maintain constructive, ongoing communications with all shareholders who wish to speak with us, including activist shareholders, and welcomes their views and opinions with the goal of working together constructively to enhance value for all shareholders. However, activist campaigns that contest, or conflict with, our strategic direction could have an adverse effect on us because:

a. responding to actions by activist shareholders can disrupt our operations, be costly and time consuming, and divert the attention of our Board and senior management from the pursuit of our business strategies, and

b. perceived uncertainties as to our future direction may cause (i) instability or lack of continuity, which may be exploited by our competitors, (ii) concern on the part of current or potential customers, (iii) loss of business opportunities, or (iv) difficulties in attracting and retaining qualified personnel and business partners.

Activist campaigns may also cause significant fluctuations in our stock price based on temporary or speculative market perceptions, or other factors that do not necessarily reflect the fundamental underlying value of our businesses.

Item 1B. *Unresolved Staff Comments*

None.

Item 1C. *Cybersecurity*

Risk Management and Strategy

Griffon relies on electronic information systems, networks and technologies to conduct and support its operations and other functions and activities within the Company and with third parties. We rely on commercially available systems, software, tools, third-party service providers and monitoring to provide security for processing, transmission and storage of confidential information and data. We have an enterprise-grade cybersecurity management program designed to assess, identify, protect, detect and respond to, and manage material risks from cybersecurity threats. To protect our information systems from cybersecurity threats, we use various information technology and cybersecurity tools to safeguard our systems and data, which help prevent, identify, escalate, investigate, remediate, respond and recover from identified vulnerabilities and cybersecurity incidents.

As part of the Company's cybersecurity risk management program, we follow the National Institute of Standards and Technology Cybersecurity Framework to assess, identify and manage material risks that arise from cybersecurity threats. Griffon's cybersecurity risk management program is closely tied to and integrated with the Company's overall enterprise risk management processes.

Griffon has a third-party risk management program regarding the cybersecurity practices of its vendors and partners that is designed to oversee, identify, and minimize material risks from cybersecurity threats associated with the use of such third parties. This program involves vetting of third parties before engagement. Regular monitoring and reviews are conducted to ensure third party vendors and partners comply with Griffon's security standards.

From time to time, Griffon engages external experts, including cybersecurity assessors, consultants, and/or auditors to evaluate cybersecurity measures and risk management processes.

We also maintain a cyber incident response plan with the objective of (1) providing a structured and systematic incident response process for cybersecurity threats that affect us, (2) timely and effectively identifying, resolving and communicating cybersecurity incidents, and (3) managing internal and external communications and reporting.

If a cybersecurity incident occurs, our incident response team ("IRT") is immediately notified, and Griffon management is informed about and monitors the prevention, detection, mitigation, and remediation of cybersecurity incidents impacting the Company. The IRT also coordinates further notifications, as applicable, to senior executives and organizational leadership, our Audit Committee and Board of Directors, business partners or service providers, and authorities.

Like most organizations, we and our third-party service providers have experienced and expect to continue to experience actual or attempted cyber-attacks of our information systems and networks. During the reporting period, Griffon has not identified any risks from cybersecurity threats, including as a result of previous cybersecurity incidents, that we believe have materially affected, or are reasonably likely to materially affect, us, including our business strategy, operating results, and financial condition. However, if any such event, whether actual or perceived, were to occur, it could have a material adverse effect on our business strategy, operating results and financial condition. We continuously use threat models and cyber threat intelligence to identify relevant risks to our businesses and take active measures to mitigate these risks. For more information regarding the risks we face from cybersecurity threats, see Item 1A., *"Risk Factors"* in this Annual Report on Form 10-K.

Cybersecurity Governance

Cybersecurity is an important part of our enterprise risk management processes and an area of focus for our Board of Directors and management.

The Audit Committee assists the Board of Directors in its oversight of risks related to cybersecurity and directly oversees risk management relating to cybersecurity. The Audit Committee is also responsible for assessing the steps management has taken to monitor and control these risks and exposures, and evaluating guidelines and policies with respect to our cybersecurity risk assessment and risk management. The Audit Committee reviews our cybersecurity program with management and reports to the Board of Directors with respect to, and regarding its review of, the program. Cybersecurity reviews by the Audit Committee generally occur at least annually, or more frequently as determined to be necessary or advisable. From time to time, third-party subject matter experts present to the Audit Committee on contemporary cybersecurity topics of interest.

Griffon also has a Cybersecurity Management Committee, consisting of executives from Griffon and technology leaders from Griffon's business segments, that monitors and assesses progress and performance by Griffon's business segments in the area of cybersecurity; the results of such assessments are reported to the Audit Committee from time to time. The Chief Information Officers of each of HBP and CPP regularly provide updates on material cybersecurity risks to our senior management and to our Audit Committee, and along with their technology teams, are responsible for assessing and managing cybersecurity risks. Each of our business segment Chief Information Officers has over 20 years of experience in cybersecurity, information security, policy, architecture, engineering and incident response.

Item 2. *Properties*

Griffon occupies approximately 9,838,500 square feet of general office, factory and warehouse space primarily throughout the U.S., Canada, Mexico, Australia, U.K., Ireland, New Zealand and China. For a description of the encumbrances on certain of these properties, refer to Note 22—Leases and Note 12—Long-Term Debt. The following table sets forth certain information related to Griffon's major facilities:

Location	Business Segment	Primary Use	Approx. Square Footage	Owned/ Leased	Lease End Year
New York, NY	Corporate	Headquarters	10,000	Leased	2035
Troy, OH	Home and Building Products	Manufacturing	1,372,000	Owned	
Russia, OH	Home and Building Products	Manufacturing	253,000	Owned	
Mountain Top, PA	Home and Building Products	Manufacturing	279,000	Owned	
Mason, OH	Home and Building Products	Office	131,000	Owned	
Goodyear, AZ	Home and Building Products	Manufacturing	163,000	Owned	
Greenville, OH	Home and Building Products	Distribution	148,000	Leased	2027
Ocala, FL	Consumer and Professional Products	Office, Manufacturing	619,500	Owned	
St. Francois, Quebec	Consumer and Professional Products	Manufacturing, Distribution	353,000	Owned	
Cork, Ireland	Consumer and Professional Products	Distribution, Manufacturing	74,000	Owned	
Pollington Site, UK	Consumer and Professional Products	Manufacturing, Distribution	115,000	Owned	
Carlisle, PA	Consumer and Professional Products	Manufacturing, Distribution	1,409,000	Leased	2030–2035
Reno, NV	Consumer and Professional Products	Manufacturing, Distribution	997,000	Leased	2034
Byhalia, MS	Consumer and Professional Products	Distribution	537,000	Leased	2036
Smyrna, TN	Consumer and Professional Products	Office	100,000	Leased	2030
Australia (various)	Consumer and Professional Products	8 Distribution, 2 Manufacturing	918,000	Leased	2025–2031
Canada (Various)	Consumer and Professional Products	1 Manufacturing, 3 Distribution	93,000	Leased	2026–2028

In addition to the facilities listed above, HBP leases approximately 1,155,000 square feet of space for distribution centers in numerous facilities throughout the U.S. and in Canada; HBP and CPP lease approximately 186,000 square feet of office space throughout the U.S. and various international locations; and CPP owns approximately 22,000 square feet of additional space for an operational wood mill in the U.S. As a part of CPP's global sourcing strategy expansion, several facilities concluded operations during fiscal 2024 and, as a result, these facilities, which are approximately 904,000 square feet in the aggregate, are classified as held for sale.

All facilities are generally well maintained and suitable for the operations conducted.

Item 3. *Legal Proceedings*

Griffon is involved in litigation, investigations and claims arising out of the normal conduct of business, including those relating to commercial transactions, product liability and warranty claims, environmental, employment, and health and safety matters. Griffon estimates and accrues liabilities resulting from such matters based on a variety of factors, including the stage of the proceeding; potential settlement value; assessments by internal and external counsel; and assessments by environmental engineers and consultants of potential environmental liabilities and remediation costs. Such estimates are not discounted to reflect the time value of money due to the uncertainty in estimating the timing of the expenditures, which may extend over several years.

While it is impossible to ascertain the ultimate legal and financial liability with respect to certain contingent liabilities and claims, Griffon believes, based upon examination of currently available information, experience to date, and advice from legal counsel, that the individual and aggregate liabilities resulting from the ultimate resolution of these contingent matters, after taking into consideration existing insurance coverage and amounts already provided for, will not have a material

adverse impact on consolidated results of operations, financial position or cash flows. Refer to Note 16 - Commitments and Contingencies for a discussion of the Company's litigation.

Item 4. ***Mine Safety Disclosures.***

Not applicable.

PART II

Item 5. ***Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities***

Griffon's Common Stock is listed for trading on the New York Stock Exchange under the symbol "GFF".

Dividends

During 2025, the Company declared and paid four regular quarterly cash dividends of $0.18 per share, totaling $0.72 per share for the year.

During 2024, the Company declared and paid four regular quarterly cash dividends of $0.15 per share, totaling $0.60 per share for the year.

During 2023, the Company declared and paid four regular quarterly cash dividends consisting of two cash dividends of $0.10 per share and two cash dividends of $0.125 per share, totaling $0.45 per share for the year. Additionally, on April 19, 2023, the Board of Directors declared a special cash dividend of $2.00 per share, paid on May 19, 2023, to shareholders of record as of the close of business on May 9, 2023.

For all dividends, a dividend payable is established for the holders of restricted shares; such dividends will be released upon vesting of the underlying restricted shares. The Company currently intends to pay dividends each quarter; however, payment of dividends is determined by the Board of Directors at its discretion based on various factors, and no assurance can be provided as to the payment of future dividends.

On November 18, 2025, the Board of Directors declared a cash dividend of $0.22 per share, payable on December 16, 2025 to shareholders of record as of the close of business on November 28, 2025.

Registered Holders

As of October 31, 2025, there were approximately 2,036 registered holders of Griffon's Common Stock.

Securities Authorized for Issuance Under Equity Compensation Plans

The following sets forth information relating to Griffon's equity compensation plans as of September 30, 2025:

Plan Category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders[1]	—	$ —	1,895,135
Equity compensation plans not approved by security holders	—	$ —	—

(1) Excludes restricted shares and restricted stock units issued in connection with Griffon's equity compensation plans. The total reflected in column (c) includes shares available for grant as any type of equity award under the Incentive Plan.

Issuer Purchase of Equity Securities

The table below presents shares of Griffon Stock which were acquired by Griffon during the fourth quarter of 2025:

ISSUER PURCHASES OF EQUITY SECURITIES

Period	(a) Total Number of Shares (or Units) Purchased[1]	(b) Average Price Paid Per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs (1)	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) That May Yet Be Purchased Under the Plans or Programs
July 1–31, 2025	73,213[2]	$ 77.16	73,128	
August 1–31, 2025	116,800[3]	$ 73.00	116,800	
September 1–30, 2025	95,800[3]	$ 77.11	95,800	
Total	285,813	$ 75.44	285,728	$298,013[1]

1. On November 13, 2024, Griffon announced that the Board of Directors approved an increase of $400,000 to its share repurchase authorization. Under the share repurchase program, the Company may, from time to time, purchase shares of its common stock in the open market, including pursuant to a 10b5-1 plan, pursuant to an accelerated share repurchase program or issuer tender offer, or in privately negotiated transactions. As of September 30, 2025, $298,013 remained available for purchase under these Board authorized repurchase programs.

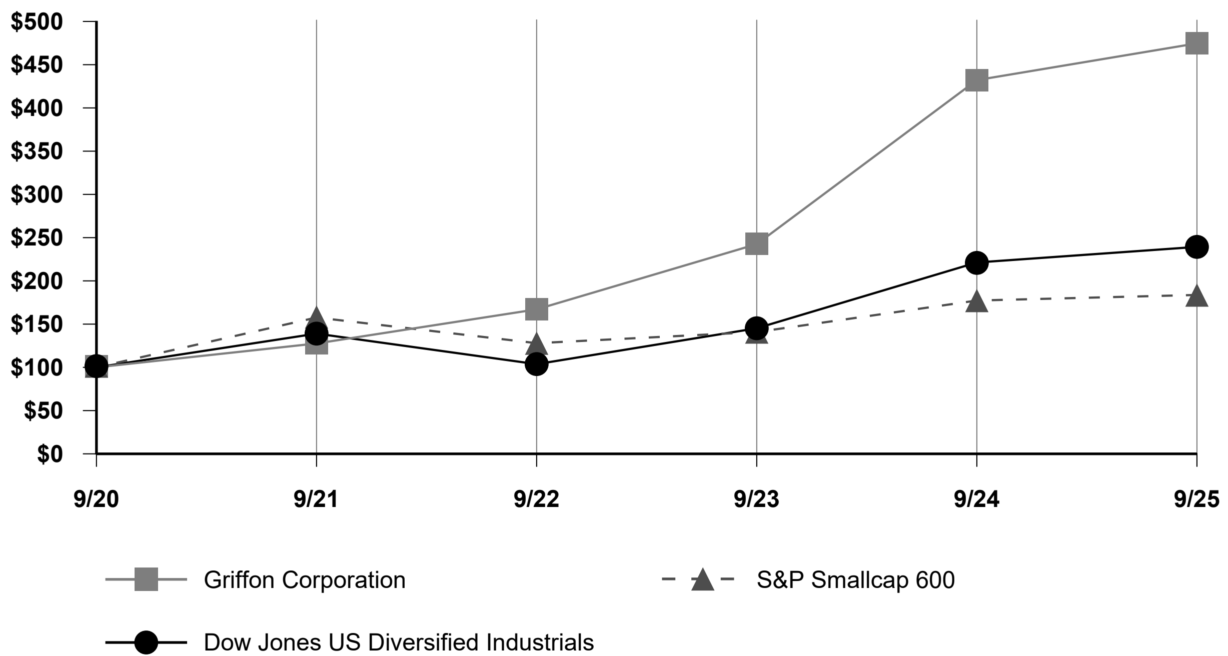
2. Includes (a) 73,128 shares purchased by the Company in open market purchases pursuant to a stock buyback plan authorized by the Company's Board of Directors; and (b) 85 shares acquired by the Company from holders of restricted stock upon the vesting of the restricted stock, to satisfy tax-withholding obligations of the holder.

3. Shares were purchased by the Company in open market purchases pursuant to share repurchase plans authorized by the Company's Board of Directors.

Performance Graph

The performance graph does not constitute soliciting material, is not deemed filed with the SEC and is not incorporated by reference in any of Griffon's filings under the Securities Act of 1933 or the Exchange Act of 1934, whether made before or after the date of this Annual Report on Form 10-K and irrespective of any general incorporation language in any such filings, except to the extent Griffon specifically incorporates this performance graph by reference therein.

The following graph sets forth the cumulative total return to Griffon's stockholders during the five years ended September 30, 2025, as well as an overall stock market (S&P Small Cap 600 Index) and Griffon's peer group index (Dow Jones U.S. Diversified Industrials Index). Assumes $100 was invested on September 30, 2020, including the reinvestment of dividends, in each category.



Item 6. [*Reserved*]

Item 7. ***Management's Discussion and Analysis of Financial Condition and Results of Operations***

(Unless otherwise indicated, all references to years or year-end refer to the fiscal year ending September 30 and dollars are in thousands, except per share data)

OVERVIEW

The Company

Griffon Corporation (the "Company," "Griffon," "we" or "us") is a diversified management and holding company that conducts business through wholly-owned subsidiaries. Griffon oversees the operations of its subsidiaries, allocates resources among them and manages their capital structures. Griffon provides direction and assistance to its subsidiaries with acquisition and growth opportunities as well as divestitures. As long-term investors, we intend to continue to grow and strengthen our existing businesses, and to diversify further through investments in our businesses and acquisitions.

The Company was founded in 1959, is a Delaware corporation headquartered in New York, N.Y. and is listed on the New York Stock Exchange (NYSE:GFF).

Griffon conducts its operations through two reportable segments:

- Home and Building Products ("HBP") conducts its operations through Clopay Corporation ("Clopay"). Founded in 1964, Clopay is the largest manufacturer and marketer of garage doors and rolling steel doors in North America. Residential and commercial sectional garage doors are sold through professional dealers and leading home center retail chains throughout North America under the brands Clopay, Ideal, and Holmes. Rolling steel door and grille products designed for commercial, industrial, institutional, and retail use are sold under the Clopay, Cornell and Cookson brands. HBP revenue was 63%, 61% and 59% of Griffon's consolidated revenue in 2025, 2024 and 2023, respectively.

- Consumer and Professional Products ("CPP") is a global provider of branded consumer and professional tools; residential, industrial and commercial fans; home storage and organization products; and products that enhance indoor and outdoor lifestyles. CPP sells products globally through a portfolio of leading brands including AMES, since 1774, Hunter, since 1886, True Temper, and ClosetMaid. CPP revenue was 37%, 39% and 41% of Griffon's consolidated revenue in 2025, 2024 and 2023, respectively.

On July 1, 2024, Griffon announced that its subsidiary, The AMES Companies, Inc., ("AMES") expanded the scope of its Australian operations by acquiring substantially all the assets of Pope, a leading Australian provider of residential watering products, from The Toro Company (NYSE:TTC) for a purchase price of approximately AUD 21,800 (approximately $14,500) in cash. This is CPP's seventh acquisition in Australia since 2013, and further expands AMES's product portfolio in the Australian market. Pope generated over $25,000 in revenue in its first full year of operations.

Griffon announced in May 2023 that CPP was expanding its global sourcing strategy to include long handled tools, material handling, and wood storage and organization product lines for the U.S. market. This initiative was successfully completed as of September 30, 2024. Refer to Note 10—Restructuring Charges for further detail.

CONSOLIDATED RESULTS OF OPERATIONS

2025 Compared to 2024

Revenue for the year ended September 30, 2025 of $2,519,926 decreased 4% compared to $2,623,520 for the year ended September 30, 2024. The decrease was due to a 10% decline in revenue at CPP, while HBP's revenue remained consistent with the prior year.

Gross profit for 2025 was $1,058,005 compared to $1,019,935 in 2024. Gross profit as a percent of sales ("gross margin") for 2025 and 2024 was 42.0% and 38.9%, respectively. In 2025, gross profit did not include any nonrecurring charges; however, in 2024, gross profit included restructuring charges of $35,806 and amortization of $491 related to the fair value step-up of acquired inventory sold in connection with the Pope acquisition. Excluding these charges from 2024, gross profit would have been $1,058,005 or 42.0% of revenue, compared to $1,056,232 or 40.3% of revenue in the prior year.

Selling, general and administrative ("SG&A") expenses in 2025 of $608,116, or 24.1% of revenue, decreased 2% from $621,638, or 23.7% of revenue, in 2024. 2025 SG&A expenses included strategic review (retention and other) expenses of $3,883 and the impact of retirement plan events of $2,505, primarily related to costs associated with the termination of the Hunter Fan Pension Plan. 2024 SG&A expenses included restructuring charges of $5,503, strategic review (retention and other) expenses of $10,594, and Pope acquisition costs of $441. Excluding these items from both periods, 2025 SG&A expenses would have been $601,728, or 23.9% of revenue, compared to 2024 SG&A expenses of $605,100, or 23.1% of revenue, with the decrease in expenses primarily due to decreases in stock compensation and management incentives.

During the third quarter of fiscal 2025, indicators of goodwill and indefinite-lived intangible asset impairment were present for the Hunter Fan reporting unit within the CPP reportable segment, driven by a decrease in year-to-date and forecasted sales and operating results primarily due to ongoing weak consumer demand coupled with the impact of increased tariffs disrupting historical customer ordering patterns. As such, we performed a quantitative assessment of the Hunter Fan reporting unit goodwill and indefinite-lived intangible assets. Based on the results of these tests, we recorded a pre-tax, non-cash impairment charge of $136,612, representing the remaining goodwill of the Hunter Fan reporting unit, and a pre-tax, non-cash impairment charge of $107,000 related to the Hunter Fan trademark in the third quarter of fiscal 2025. In preparation of our financial statements during the year ended September 30, 2025, we performed qualitative assessments of goodwill and indefinite-lived intangibles for our CPP and HBP reporting units, and concluded that it was not more likely than not that the fair values of these reporting units or indefinite-lived intangible assets were less than their carrying amounts. The quantitative assessment in 2024 did not result in any impairment charges to CPP's goodwill or indefinite-lived intangible assets.

For HBP, in both 2025 and 2024, Griffon performed qualitative assessments and determined that indicators that fair value was less than the carrying amount were not present.

Interest expense in 2025 of $96,012 decreased 8% compared to 2024 interest expense of $104,086, primarily as a result of decreased outstanding borrowings and decreased variable interest rates on both our Revolving Credit Facility and Term Loan B.

Other income (expense) of $6,672 and $1,766 in 2025 and 2024, respectively, includes $474 and ($333), respectively, of net currency exchange transaction gains (losses) from receivables and payables held in non-functional currencies, ($948) and $148, respectively, of net gains (losses) on investments, and $5,411 and ($137), respectively, of retirement benefit plan income (expense). Other income (expense) also includes royalty income of $2,201 and $2,198 in 2025 and 2024, respectively.

Griffon reported income before tax for 2025 of $127,371 compared to $296,650 for 2024. The income tax provision recognized in 2025 and 2024 translated to an effective income tax rate of 59.9% and 29.2%, respectively. The 2025 and 2024 tax rates included discrete and certain other tax provisions (benefits), net, and other items that affect comparability, as listed below. Excluding the discrete and certain other tax provisions (benefits), net, and other items that affect comparability, as listed below, the effective income tax rates for 2025 and 2024 were 27.9% and 27.6%, respectively. These rates reflect the impact of tax reserves and changes in earnings mix between U.S. and non-U.S. operations.

Net income for 2025 was $51,110, or $1.09 per share, compared to $209,897, or $4.23 per share in 2024.

2025 net income included the following:

- Goodwill and intangible asset impairments of $243,612 ($217,154, net of tax, or $4.65 per share);
- Impact of retirement plan events of $1,165 ($1,089, net of tax, or $0.02 per share);
- Strategic review - retention and other of $3,883 ($2,886, net of tax, or $0.06 per share);
- Gain on sale of real estate of $8,279 ($6,169, net of tax, or $0.13 per share); and
- Discrete and certain other tax benefits, net, of $303, or $0.01 per share.

2024 net income included the following:

- Restructuring charges of $41,309 ($30,824, net of tax, or $0.62 per share);
- Strategic review - retention and other of $10,594 ($7,934, net of tax, or $0.16 per share);
- Loss on sale of real estate of $61 ($25, net of tax, or $0.00 per share);
- Debt extinguishment, net of $1,700 ($1,292, net of tax, or $0.03 per share);
- Fair value step-up of acquired inventory sold of $491 ($354, net of tax, or $0.01 per share);
- Acquisition costs of $441 ($335, net of tax, or $0.01 per share); and
- Discrete and certain other tax provisions, net, of $3,586, or $0.07 per share.

Excluding these items from both reporting periods, 2025 net income would have been $263,589, or $5.65 per share, compared to $254,247, or $5.12 per share, in 2024.

2024 Compared to 2023

Revenue for the year ended September 30, 2024 of $2,623,520 decreased 2% compared to $2,685,183 for the year ended September 30, 2023. The decrease was due to a 6% decline in revenue at CPP, while HBP's revenue remained consistent with the prior year.

Gross profit for 2024 was $1,019,935 compared to $948,821 in 2023. The gross margin for 2024 and 2023 was 38.9% and 35.3%, respectively. In the years ended 2024 and 2023, gross profit included restructuring charges of $35,806 and $82,028, respectively. In 2024, gross profit also included amortization of $491 related to the fair value step-up of acquired inventory sold in connection with the Pope acquisition. Excluding these charges from both years, gross profit would have been $1,056,232 or 40.3% of revenue, compared to $1,030,849 or 38.4% in the prior year.

SG&A expenses in 2024 of $621,638, or 23.7% of revenue, decreased 3% from $642,734, or 23.9% of revenue, in 2023. 2024 SG&A expenses included restructuring charges of $5,503, strategic review (retention and other) of $10,594 and Pope acquisition costs of $441. 2023 SG&A expenses included restructuring charges of $10,440, strategic review (retention and other) of $20,225, special dividend ESOP charges of $15,494 and proxy expenses of $2,685. In 2023, proxy expenses of $2,685 related to a settlement entered into with a shareholder that had submitted a slate of director nominees. Excluding these items from both periods, 2024 SG&A expenses would have been $605,100, or 23.1% of revenue compared to $593,890, or 22.1%, with the increase in expenses primarily due to increased selling and administrative costs.

In connection with the preparation of our financial statements for the fiscal years ended September 30, 2024 and 2023, Griffon performed its annual impairment testing of its goodwill and indefinite-lived intangibles. Griffon performed a quantitative assessment of the CPP reporting units and indefinite-lived intangible assets. The assessments in both fiscal years did not result in an impairment to goodwill. Also, in 2024, the impairment test did not result in any impairment charges to CPP's gross carrying amount of

indefinite-lived intangible assets; however, in 2023, the impairment test did result in pre-tax, non-cash impairment charges totaling $109,200 ($81,313 net of tax) to CPP's gross carrying amount of indefinite-lived intangible assets. For HBP, in both 2024 and 2023, Griffon performed qualitative assessments and determined that indicators that fair value was less than the carrying amount were not present.

Interest expense in 2024 of $104,086 increased 3% compared to 2023 interest expense of $101,445, primarily as a result of increased outstanding borrowings and increased variable interest rates on both our Revolving Credit Facility and Term Loan B.

Other income (expense) of $1,766 and $2,928 in 2024 and 2023, respectively, includes ($333) and $302, respectively, of net currency exchange transaction gains (losses) from receivables and payables held in non-functional currencies, $148 and $469, respectively, of net gains on investments, and ($137) and ($866), respectively, of net periodic benefit plan income (expense). Other income (expense) also includes royalty income of $2,198 and $2,104 for the years ended September 30, 2024 and 2023, respectively.

Griffon reported income before tax for 2024 of $296,650 compared to $112,682 for 2023. The income tax provision recognized in 2024 and 2023 translated to an effective income tax rate of 29.2% and 31.1%, respectively. The 2024 and 2023 tax rates included discrete and certain other tax provisions, net, and other items that affect comparability, as listed below. Excluding the discrete and certain other tax provisions, net, and other items that affect comparability, as listed below, the effective income tax rates for 2024 and 2023 were 27.6% and 27.3%, respectively. These rates reflect the impact of tax reserves and changes in earnings mix between U.S. and non-U.S. operations.

Net income for 2024 was $209,897, or $4.23 per share, compared to $77,617, or $1.42 per share in 2023. 2024 net income included the following:

- Restructuring charges of $41,309 ($30,824, net of tax, or $0.62 per share);
- Strategic review - retention and other of $10,594 ($7,934, net of tax, or $0.16 per share);
- Loss on sale of real estate of $61 ($25, net of tax, or $0.00 per share);
- Debt extinguishment, net $1,700 ($1,292, net of tax, or $0.03 per share);
- Fair value step-up of acquired inventory sold of $491 ($354, net of tax, or $0.01 per share);
- Acquisition costs of $441 ($335, net of tax, or $0.01 per share); and
- Discrete and certain other tax provisions, net, of $3,586, or $0.07 per share.

2023 net income included the following:

- Restructuring charges of $92,468 ($68,779, net of tax, or $1.26 per share);
- Gain on sale of real estate of $12,655 ($9,586, net of tax, or $0.18 per share);
- Debt extinguishment, net of $437 ($332, net of tax, or $0.01 per share);
- Strategic review - retention and other of $20,225 ($15,253, net of tax, or $0.28 per share);
- Special dividend ESOP charges of $15,494 ($11,779, net of tax, or $0.22 per share);
- Proxy expenses of $2,685 ($2,059, net of tax, or $0.04 per share);
- Intangible asset impairments of $109,200 ($81,313, net of tax, or $1.49 per share); and
- Discrete and certain other tax provisions, net, of $175, or $0.00 per share.

Excluding these items from both reporting periods, 2024 net income would have been $254,247, or $5.12 per share, compared to $247,721, or $4.54 per share, in 2023.

Griffon evaluates performance based on adjusted net income and the related adjusted earnings per common share, which are non-GAAP measures that exclude non-cash impairment charges, restructuring charges, debt extinguishment, acquisition related expenses and discrete and certain other tax items, as well other items that may affect comparability, as applicable. Griffon believes this information is useful to investors for the same reason. The following table provides a reconciliation of net income to adjusted net income and earnings per share to adjusted earnings per share:

GRIFFON CORPORATION AND SUBSIDIARIES
RECONCILIATION OF NET INCOME
TO ADJUSTED NET INCOME
(Unaudited)

	For the Years Ended September 30,		
	2025	2024	2023
Net Income	$ 51,110	$209,897	$ 77,617

Note: Due to rounding, the sum of earnings per common share and adjusting items, net of tax, may not equal adjusted earnings per common share.

(1) For the year ended September 30, 2025, the Impact of retirement plan events relates to a net gain of $2,181 related to the termination of the Hunter Fan Pension Plan, and a non-cash charge of $1,016 associated with the establishment of a retiree medical plan, of which a gain of $3,670 is included in

Other, net, and a charge of $2,505 is included in SG&A. The Company will recognize an additional retiree medical plan non-cash charge of $5,362 ratably over the first 10 months of fiscal 2026.

(2) For the years ended September 30, 2024 and 2023, restructuring charges relate to the CPP global sourcing expansion of which $35,806 and $82,028, respectively, is included in Cost of goods and services and $5,503 and $10,440, respectively, is included in SG&A.

(3) Tax impact for the above reconciling adjustments from GAAP net income to non-GAAP adjusted net income and the related adjusted EPS is determined by comparing the Company's tax provision, including the reconciling adjustments, to the tax provision excluding such adjustments.

REPORTABLE SEGMENTS

Griffon evaluates performance and allocates resources based on each segment's adjusted EBITDA, a non-GAAP measure, defined as income (loss) before taxes, excluding interest income and expense, depreciation and amortization, unallocated amounts (mainly corporate overhead), strategic review charges, non-cash impairment charges, restructuring charges, gain/loss from debt extinguishment, and acquisition related expenses, as well as other items that may affect comparability, as applicable. Griffon believes this information is useful to investors for the same reason.

See the table provided in Note 19—Reportable Segments for a reconciliation of adjusted EBITDA to income before taxes.

Home and Building Products

	For the Years Ended September 30,					
	2025		2024		2023	
Residential	$ 907,556		$ 904,237		$ 888,393	
Commercial	676,626		684,388		700,112	
Total Revenue	$1,584,182		$1,588,625		$1,588,505	
Adjusted EBITDA	$ 494,576	31.2%	$ 501,001	31.5%	$ 510,876	32.2%
Depreciation and amortization	$ 17,592		$ 15,349		$ 15,066	

2025 Compared to 2024

HBP revenue in 2025 was consistent with the prior year reflecting favorable price and mix of 2%, offset by decreased volume of 2% primarily driven by residential volume.

HBP adjusted EBITDA in 2025 decreased 1% to $494,576 compared to $501,001 in 2024, primarily resulting from increased material, labor and distribution costs.

Segment depreciation and amortization increased $2,243 from the comparable prior year period primarily due to depreciation and amortization on new assets placed in service.

2024 Compared to 2023

HBP revenue in 2024 was consistent with the prior year reflecting increased residential volume offset by reduced commercial volume.

HBP adjusted EBITDA in 2024 decreased 2% to $501,001 compared to $510,876 in 2023 primarily resulting from increased labor and distribution costs.

Segment depreciation and amortization increased $283 from the comparable prior year period primarily due to depreciation and amortization on new assets placed in service.

Consumer and Professional Products

	For the Years Ended September 30,					
	2025		2024		2023	
United States	$516,273		$ 638,782		$ 716,098	
Europe	41,768		52,933		51,041	
Canada	62,573		67,375		75,477	
Australia	289,018		251,778		231,764	
All other countries	26,112		24,027		22,298	
Total Revenue	$935,744		$1,034,895		$1,096,678	
Adjusted EBITDA	$ 85,545	9.1%	$ 72,632	7.0%	$ 50,343	4.6%
Depreciation and amortization	$ 44,856		$ 44,797		$ 49,811	

2025 Compared to 2024

CPP revenue in 2025 decreased $99,151, or 10%, compared to 2024, primarily driven by decreased volume of 12% due to reduced consumer demand in North America and the United Kingdom (U.K.) and disrupted U.S. historical customer ordering patterns due to increased tariffs, partially offset by increased organic volume in Australia. CPP revenue also benefitted 2% from Australia's July 1, 2024 Pope acquisition.

CPP adjusted EBITDA in 2025 of $85,545 increased 18% compared to $72,632 in 2024, primarily due to the benefits from the U.S. global sourcing expansion initiative, increased volume in Australia and reduced administrative expenses, partially offset by the decreased revenue noted above. Foreign currency had a 2% unfavorable impact.

Segment depreciation and amortization remained consistent with the prior year period.

On July 1, 2024, Griffon announced that its subsidiary, The AMES Companies, Inc. ("AMES"), expanded the scope of its Australian operations by acquiring substantially all the assets of Pope, a leading Australian provider of residential watering products, from The Toro Company (NYSE:TTC) for a purchase price of approximately AUD 21,800 (approximately $14,500) in cash. This is CPP's seventh acquisition in Australia since 2013, and further expands AMES's product portfolio in the Australian market. Pope generated over $25,000 in revenue in its first full year of operations.

2024 Compared to 2023

CPP revenue in 2024 decreased $61,783, or 6%, compared to 2023, primarily resulting from decreased volume driven by reduced consumer demand in North America, partially offset by increased volume in Australia, inclusive of incremental revenue from the Pope acquisition of 1%.

CPP adjusted EBITDA in 2024 increased 44% to $72,632 compared to $50,343 in 2023, primarily due to improved North American production costs and improved margins in Australia, partially offset by the unfavorable impact of the reduced volume noted above.

Segment depreciation and amortization decreased $5,014 compared to the prior year period, primarily due to fully depreciated assets and the write-down of certain fixed assets at several manufacturing facilities in connection with restructuring activities.

Unallocated Amounts

For 2025, unallocated amounts, excluding depreciation, which consisted primarily of corporate overhead costs, totaled $57,828 compared to $60,031 in 2024, with the decrease primarily related to a decrease in equity compensation expense.

For 2024, unallocated amounts, excluding depreciation, consisted primarily of corporate overhead costs, totaled $60,031 compared to $55,887 in 2023, with the increase primarily related to increases in ESOP expenses driven by the increase in Griffon's share price, partially offset by a decrease in other compensation related expenses.

Goodwill and intangible asset impairments

During the third quarter of fiscal 2025, indicators of impairment were present for the Hunter Fan reporting unit within the CPP reportable segment, driven by a decrease in year-to-date and forecasted sales and operating results primarily due to ongoing weak consumer demand coupled with the impact of increased tariffs disrupting historical customer ordering patterns. Accordingly, a quantitative assessment was performed, which resulted in the recording of non-cash, pre-tax impairment charges for Hunter Fan's goodwill and indefinite-lived intangible assets of $136,612 and $107,000, respectively, which were recorded in the third quarter of fiscal 2025. See Note 7 - Goodwill and Intangibles for additional information. There were no other indicators of impairment identified for the year ended September 30, 2025 within the CPP and HBP reporting units.

For the year ended September 30, 2024, there were no indicators of impairment identified and thus no impairment charges recorded.

Depreciation and Amortization

Depreciation and amortization was $63,014 in 2025 compared to $60,704 in 2024; the increase primarily relates to depreciation for new assets placed in service.

Depreciation and amortization was $60,704 in 2024 compared to $65,445 in 2023; the decrease primarily relates to fully depreciated assets and the write-down of certain fixed assets at several manufacturing facilities in connection with CPP's restructuring activities.

Comprehensive Income (Loss)

During 2025, total other comprehensive income (loss), net of taxes, of ($13,896) included a loss of $6,569 from foreign currency translation adjustments primarily due to the weakening of the Canadian Dollar and Australian Dollar, partially offset by the strengthening of the Euro and British Pound, all in comparison to the U.S. Dollar; a $8,361 loss from pension and other post-retirement benefits, primarily related to the impact of retirement plan events, offset by return on plan assets and amortization; and a $1,034 gain on cash flow hedges.

During 2024, total other comprehensive income (loss), net of taxes, of $11,986 included a gain of $10,137 from foreign currency translation adjustments primarily due to the strengthening of the Euro, British Pound and Australian Dollar, all in comparison to the U.S. Dollar; a $1,538 gain from pension and other post-retirement benefits, primarily related to asset returns and amortization; and a $311 gain on cash flow hedges.

DISCONTINUED OPERATIONS

At September 30, 2025 and 2024, Griffon's discontinued liabilities included the Company's obligation of $8,726 and $7,768, respectively, primarily related to insurance claims, income taxes, product liability, warranty claims and environmental reserves. Griffon's assets for discontinued operations primarily relate to insurance claims. See Note 8 - Discontinued Operations for additional information.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity

Management assesses Griffon's liquidity in terms of its ability to generate cash to fund its operating, investing and financing activities. Significant factors affecting liquidity include cash flows from operating activities, capital expenditures, acquisitions, dispositions, bank lines of credit and the ability to attract long-term capital under satisfactory terms. Griffon believes it has sufficient liquidity available to invest in existing businesses and strategic acquisitions while managing its capital structure on both a short-term and long-term basis.

As of September 30, 2025, the amount of cash, cash equivalents and marketable securities held by non-U.S. subsidiaries was $38,500. Our intent is to permanently reinvest these funds, except in limited circumstances, outside the U.S., and we do not currently anticipate that we will need funds generated from foreign operations to fund our domestic operations. The Company may repatriate cash from its non-U.S. subsidiaries if the Company determines that it is beneficial to the company and tax efficient. The Company has accrued a deferred tax liability for withholding taxes on previously taxed earnings and profit (PTEP) which are not considered permanently reinvested. In the event we determine that additional funds from non-U.S. operations are needed to fund operations in the U.S., we will be required to accrue and pay U.S. taxes to repatriate these additional funds.

Griffon's primary sources of liquidity are cash flows generated from operations, cash on hand and our secured $500,000 revolving credit facility ("Revolver"), which matures in August 2028. During the fiscal year ended September 30, 2025, the Company generated $357,440 of net cash from operating activities and, as of September 30, 2025, the Company had $485,672 available, subject to certain loan covenants, for borrowing under the Revolver. The Company had cash and cash equivalents of $99,045 at September 30, 2025.

The table below provides a summary of the Consolidated Statements of Cash Flows for the periods indicated.

	Years Ended September 30,	
	2025	2024
	(in thousands)	
Cash Flows		
Net Cash Flows Provided By (Used In):		
Operating activities	$ 357,440	$ 380,042
Investing activities	(34,429)	(64,999)
Financing activities	(338,747)	(298,748)

Cash provided by operating activities for 2025 was $357,440 compared to $380,042 in 2024, a decrease of $22,602. In both 2025 and 2024, cash provided by operating activities reflected increased cash generated from operations and a decrease in net working capital. In 2025, the decrease in net working capital was primarily driven by decreases in accounts receivable, partially offset by an increase in inventory, whereas in 2024, the decrease in working capital was primarily driven by decreases in inventory.

Cash flows from investing activities is primarily comprised of capital expenditures and business acquisitions as well as proceeds from the sale of businesses, investments and property, plant and equipment. During 2025, Griffon used $34,429 in investing activities compared to $64,999 in 2024. During 2025, cash flows used in investing activities primarily consisted of capital expenditures of $52,435, partially offset by $18,006 of proceeds primarily from the sale of real estate. During 2024, cash flows used in investing activities primarily consisted of capital expenditures of $68,399 and payments to acquire businesses, net of cash acquired of $14,579, partially offset by $14,479 of proceeds primarily from the sale of real estate associated with CPP's restructuring activities and $3,500 escrow proceeds released from the fiscal 2022 sale of a business.

Cash used in financing activities was $338,747 in 2025 compared to $298,748 in 2024. During 2025, cash flows used in financing activities primarily consisted of the purchase of shares in connection with the board authorized share repurchase program, including excise taxes, and from common stock withheld to satisfy tax obligations in connection with the vesting of restricted stock, totaling $183,271, net repayments of long-term debt of $115,654, primarily related to the Revolver, and the payment of dividends of $39,692. During 2024, cash flows used in financing activities primarily consisted of the purchase of shares in connection with the board authorized share repurchase program, including excise taxes, and from common stock withheld to satisfy tax obligations in connection with the vesting of restricted stock, totaling $309,916, and the payment of dividends of $35,806, partially offset by net proceeds from long-term debt of $48,222, primarily related to the Revolver.

During 2025, the Board of Directors approved four quarterly cash dividends each for $0.18 per share, totaling $0.72 per share for the year. The Company currently intends to pay dividends each quarter; however, payment of dividends is determined by the Board of Directors at its discretion based on various factors, and no assurance can be provided as to the payment of future dividends. On November 18, 2025, the Board of Directors declared a cash dividend of $0.22 per share, payable on December 16, 2025 to shareholders of record as of the close of business on November 28, 2025.

During 2025, 583,978 shares, with a market value of $45,284, excluding excise taxes, or an average of $77.54 per share, were withheld to settle employee taxes due upon the vesting of restricted stock and were added to treasury stock.

On November 13, 2024, Griffon announced that the Board of Directors approved an increase of $400,000 to its share repurchase authorization. Under the authorized share repurchase program, the Company may, from time to time, purchase shares of its common stock in the open market, including pursuant to a 10b5-1 plan, pursuant to an accelerated share repurchase program or issuer tender offer, or in privately negotiated transactions. During 2025, Griffon purchased 1,897,182 shares of common stock under these repurchase programs, for a total of $134,680, or an average of $70.99 per share, excluding excise taxes. As of September 30, 2025, $298,013 remained under these Board authorized repurchase programs.

During 2025, cash used in discontinued operations from operating activities of $1,422 primarily related to the settling of certain liabilities and environmental costs. During 2025, cash provided by discontinued operations for investing activities of $137 related to proceeds from an insurance recovery. During 2024, cash used in discontinued operations from operating activities of $2,776 primarily related to the settling of certain liabilities, primarily stay bonuses, associated with the disposition of a business in 2022, and environmental and other costs related to other discontinued businesses.

Debt

At September 30, 2025 and 2024, Griffon had debt, net of cash and equivalents, as follows:

	At September 30, 2025	At September 30, 2024
	(in thousands)	
Cash and Equivalents and Debt		
Cash and equivalents	$ 99,045	$ 114,438
Notes payables and current portion of long-term debt	$ 8,103	$ 8,155
Long-term debt, net of current maturities	1,404,387	1,515,897
Debt discount and issuance costs	11,536	15,633
Total debt	1,424,026	1,539,685
Debt, net of cash and equivalents	**$1,324,981**	**$1,425,247**

During 2020, Griffon issued, at par, $1,000,000 of 5.75% Senior Notes due 2028 (the "Senior Notes"). Proceeds from the Senior Notes were used to redeem $1,000,000 of 5.25% Senior Notes due in 2022. In

connection with the issuance and exchange of the Senior Notes, Griffon capitalized $16,448 of underwriting fees and other expenses incurred, which is being amortized over the term of such notes. During 2022, Griffon purchased $25,225 of Senior Notes in the open market at a weighted average discount of 91.82% of par, or $23,161. As of September 30, 2025, outstanding Senior Notes due totaled $974,775; interest is payable semi-annually on March 1 and September 1.

The Senior Notes are senior unsecured obligations of Griffon guaranteed by certain domestic subsidiaries, and subject to certain covenants, limitations and restrictions. The Senior Notes were registered under the Securities Act of 1933, as amended (the "Securities Act") via an exchange offer. The fair value of the Senior Notes approximated $972,338 on September 30, 2025 based upon quoted market prices (Level 1 inputs). At September 30, 2025, $4,880 of underwriting fees and other expenses incurred remained to be amortized.

On January 24, 2022, Griffon amended and restated its Credit Agreement (the "Credit Agreement") to provide for a new $800,000 Term Loan B facility, due January 24, 2029, in addition to the revolving credit facility (the "Revolver") provided for under the Credit Agreement. The Term Loan B facility was issued at 99.75% of par value. Since that time, Griffon has prepaid $325,000 aggregate principal amount of the Term Loan B, which permanently reduced the outstanding balance. In connection with the prepayment of the Term Loan B, Griffon recognized charges of $437 and $6,296 on the prepayment of debt in 2023 and 2022, respectively. The charges were comprised of write-offs of unamortized debt issuance costs of $386 and $5,575 for 2023 and 2022, respectively, and the original issue discount of $51 and $721 for 2023 and 2022, respectively. As of September 30, 2025, the Term Loan B outstanding balance was $449,000.

On June 26, 2024, Griffon further amended its Credit Agreement to favorably reprice the Term Loan B facility. The amendment reduced the margin above SOFR by 0.25%, eliminated the credit spread adjustment and reduced the SOFR floor from 0.50% to 0%. In connection with the amendment, Griffon recognized a $1,700 loss on debt extinguishment during the year ended September 30, 2024 in the Company's Consolidated Statements of Operations, primarily consisting of the write-off of unamortized debt issuance costs and original issue discount related to portions of the Term Loan B facility that were repaid and then reborrowed from new lenders. At September 30, 2025, $4,169 of costs incurred remained to be amortized over the term of the loan.

The Term Loan B bears interest at the Term SOFR rate plus a spread of 2.00% (6.13% as of September 30, 2025). The Term Loan B facility continues to require nominal quarterly principal payments of $2,000, potential additional annual principal payments based on a percentage of excess cash flow and certain secured leverage thresholds, and a final balloon payment due at maturity. Term Loan B borrowings may generally be repaid without penalty. Once repaid, Term Loan B borrowings may not be reborrowed. The Term Loan B facility is subject to the same affirmative and negative covenants that apply to the Revolver (as described below), but is not subject to any financial maintenance covenants. Term Loan B borrowings are secured by the same collateral that secures borrowings under the Revolver, on an equal and ratable basis. The fair value of the Term Loan B facility approximated $450,684 on September 30, 2025 based upon quoted market prices (Level 1 inputs).

On August 1, 2023, Griffon amended and restated the Credit Agreement to increase the maximum borrowing availability under the Revolver from $400,000 to $500,000 and extend the maturity date of the Revolver from March 22, 2025 to August 1, 2028. In the event the 2028 Senior Notes are not repaid, refinanced, or replaced prior to December 1, 2027, the Revolver will mature on December 1, 2027. The amendment also modified certain other provisions of the Credit Agreement, including increasing the letter of credit sub-facility under the Revolver from $100,000 to $125,000 and increasing the customary accordion feature from a minimum of $375,000 to a minimum of $500,000. The Revolver also includes a multi-currency sub-facility of $200,000.

Borrowings under the Revolver may be repaid and re-borrowed at any time. Interest is payable on borrowings at either a SOFR, SONIA or base rate benchmark rate, plus an applicable margin, which adjusts based on financial performance. Griffon's SOFR loans accrue interest at Term SOFR plus a

credit adjustment spread and a margin of 1.75% (5.98% at September 30, 2025); SONIA loans accrue interest at SONIA Base Rate plus a credit adjustment spread and a margin of 1.75% (5.75% at September 30, 2025); and base rate loans accrue interest at prime rate plus a margin of 0.75% (8.00% at September 30, 2025).

At September 30, 2025, under the Credit Agreement, there were no outstanding borrowings on the Revolver; outstanding standby letters of credit were $14,328; and $485,672 was available, subject to certain loan covenants, for borrowing at that date.

The Revolver has certain financial maintenance tests including a maximum total leverage ratio, a maximum senior secured leverage ratio and a minimum interest coverage ratio, as well as customary affirmative and negative covenants and events of default. The negative covenants place limits on Griffon's ability to, among other things, incur indebtedness, incur liens, and make restricted payments and investments. Both the Revolver and Term Loan B borrowings under the Credit Agreement are guaranteed by Griffon's material domestic subsidiaries and are secured, on a first priority basis, by substantially all domestic assets of the Company and the guarantors.

On September 28, 2023, the Company closed on the exercise of its lease purchase option, as permitted under the lease agreement, to acquire ownership of the manufacturing facility located in Ocala, Florida for a cash purchase price of $23,207. The Ocala lease had a maturity date in 2025 and bore interest at a fixed rate of approximately 5.6%. As a result of exercising the purchase option, the Company no longer has any future lease obligations related to this real estate. Refer to Note 22—Leases for additional information.

In November 2012, Garant G.P. ("Garant"), a Griffon wholly owned subsidiary, entered into a CAD 15,000 revolving credit facility, which expired in December 2024. In January 2025, Garant entered into a new CAD 20,000 revolving credit facility that matures in January 2026 but is renewable upon mutual agreement with the lender. The new facility accrues interest at Canadian Overnight Repo Rate Average ("CORRA") plus a credit adjustment spread and a margin of 1.20% (4.06% as of September 30, 2025). At September 30, 2025, there were no outstanding borrowings under the revolving credit facility with CAD 20,000 ($14,376 as of September 30, 2025) available.

During 2023, Griffon Australia Holdings Pty Ltd and its Australian subsidiaries (collectively, "Griffon Australia") amended its AUD 15,000 receivable purchase facility to AUD 30,000. The receivable purchase facility was renewed in March 2025 and now matures in March 2026, but is renewable upon mutual agreement with the lender. The receivable purchase facility accrues interest at Bank Bill Swap Rate plus 1.25% per annum (4.79% at September 30, 2025). At September 30, 2025, there was no balance outstanding under the receivable purchase facility with AUD 30,000 ($19,707 as of September 30, 2025) available. The receivable purchase facility is secured by substantially all of the assets of Griffon Australia and its subsidiaries. Griffon Australia is required to maintain a certain minimum equity level.

In July 2018, the AMES Companies UK Ltd and its subsidiaries (collectively, "Ames UK") entered into a GBP 14,000 term loan, GBP 4,000 mortgage loan and GBP 5,000 revolver, which matured in July 2023. Prior to maturity, on June 30, 2023, AMES UK paid off and cancelled the GBP 14,000 term loan and GBP 4,000 mortgage loan. The payoff amounts were GBP 7,525 ($9,543) and GBP 2,451 ($3,108), respectively. Upon maturity in July 2023, the GBP 5,000 revolver had no balance and was not renewed.

The balance in other long-term debt consists primarily of finance leases.

At September 30, 2025, Griffon and its subsidiaries were in compliance with the terms and covenants of its credit and loan agreements. Net Debt to EBITDA (Leverage ratio), a non-GAAP measure, is a key financial measure that is used by management to assess the borrowing capacity of the Company. The Company has defined its net debt to EBITDA leverage ratio as net debt (total principal debt outstanding net of cash and equivalents) divided by the sum of adjusted EBITDA (as defined above) and stock-based compensation expense. Net Debt to EBITDA, as calculated in accordance with the definition in the Credit Agreement, was 2.4x at September 30, 2025.

Capital Resource Requirements

Griffon's debt requirements include principal on our outstanding debt, most notably our Senior Notes totaling $974,775 payable in 2028 and related annual interest payments of approximately $56,058, a Term Loan B facility maturing in 2029 with an outstanding balance of $449,000 on September 30, 2025, and the Revolver, which matures in 2028 and has no outstanding balance as of September 30, 2025. The Term Loan B accrues interest at the Term SOFR rate plus a spread of 2.00% (6.13% as of September 30, 2025). The Term Loan B facility continues to require nominal quarterly principal payments of $2,000, potential additional annual principal payments based on a percentage of excess cash flow and certain secured leverage thresholds, and a balloon payment due at maturity. Any outstanding borrowings on the Revolver will accrue interest at either a SOFR, SONIA or base rate benchmark rate, plus an applicable margin, which adjusts based on financial performance. Griffon's SOFR loans accrue interest at Term SOFR plus a credit adjustment spread and a margin of 1.75% (5.98% at September 30, 2025); SONIA loans accrue interest at SONIA Base Rate plus a credit adjustment spread and a margin of 1.75% (5.75% at September 30, 2025); and base rate loans accrue interest at prime rate plus a margin of 0.75% (8.00% at September 30, 2025).

Griffon's purchase obligations, which are generally for the purchase of goods and services in the ordinary course of business over the next twelve months, is approximately $218,344. Griffon uses blanket purchase orders to communicate expected requirements to certain vendors. Purchase obligations reflect those purchase orders in which the commitment is considered to be firm.

Griffon rents real property and equipment under operating leases expiring at various dates. Operating lease obligations over the next twelve months is approximately $41,883. Refer to Note 22—Leases for additional information.

Customers

A small number of customers account for, and are expected to continue to account for, a substantial portion of Griffon's consolidated revenue. In 2025, Home Depot represented 10% of Griffon's consolidated revenue, 9% of HBP's revenue and 12% of CPP's revenue.

No other customer exceeded 10% or more of consolidated revenue. Future operating results will continue to substantially depend on the success of Griffon's largest customers and our relationships with them. Orders from these customers are subject to change and may fluctuate materially. The loss of all or a portion of volume from any one of these customers could have a material adverse impact on Griffon's liquidity and operations.

SUPPLEMENTAL GUARANTOR FINANCIAL INFORMATION

Griffon's Senior Notes are fully and unconditionally guaranteed, jointly and severally by Clopay Corporation, The AMES Companies, Inc., Clopay AMES Holding Corp., ClosetMaid LLC, AMES Hunter Holdings Corporation, Hunter Fan Company, CornellCookson, LLC and Cornell Real Estate Holdings, LLC, all of which are indirectly 100% owned by Griffon. In accordance with Rule 3-10 of Regulation S-X promulgated under the Securities Act, presented below are summarized financial information of the Parent (Griffon) subsidiaries and the Guarantor subsidiaries as of September 30, 2025 and September 30, 2024 and for the years ended September 30, 2025 and 2024. All intercompany balances and transactions between subsidiaries under Parent and subsidiaries under the Guarantor have been eliminated. The information presented below excludes eliminations necessary to arrive at the information on a consolidated basis. The summarized information excludes financial information of the Non-Guarantors, including earnings from and investments in these entities. The financial information may not necessarily be indicative of the results of operations or financial position of the guarantor companies or non-guarantor companies had they operated as independent entities. The guarantor companies and the non-guarantor companies include the consolidated financial results of their wholly-owned subsidiaries accounted for under the equity method.

The indentures relating to the Senior Notes (the "Indentures") contain terms providing that, under certain limited circumstances, a guarantor will be released from its obligations to guarantee the Senior Notes. These circumstances include (i) a sale of at least a majority of the stock, or all or substantially all the assets, of the subsidiary guarantor as permitted by the Indentures; (ii) a public equity offering of a subsidiary guarantor that qualifies as a "Minority Business" as defined in the Indentures (generally, a business the EBITDA of which constitutes less than 50% of the segment adjusted EBITDA of the Company for the most recently ended four fiscal quarters), and that meets certain other specified conditions as set forth in the Indentures; (iii) the designation of a guarantor as an "unrestricted subsidiary" as defined in the Indentures, in compliance with the terms of the Indentures; (iv) Griffon exercising its right to defease the Senior Notes, or to otherwise discharge its obligations under the Indentures, in each case in accordance with the terms of the Indentures; and (v) upon obtaining the requisite consent of the holders of the Senior Notes.

Summarized Statements of Operations and Comprehensive Income (Loss)

CRITICAL ACCOUNTING ESTIMATES

The preparation of Griffon's consolidated financial statements in conformity with accounting principles generally accepted in the U.S. of America ("GAAP") requires the use of estimates, assumptions, judgments and subjective interpretations of accounting principles that have an impact on assets, liabilities, revenue and expenses. These estimates can also affect supplemental information contained in public disclosures of Griffon, including information regarding contingencies, risk and its financial condition. These estimates, assumptions and judgments are evaluated on an ongoing basis and based on historical experience, current conditions and various other assumptions, and form the basis for estimating the carrying values of assets and liabilities, as well as identifying and assessing the accounting treatment for commitments and contingencies. Actual results may materially differ from these estimates.

An estimate is considered to be critical if it is subjective and if changes in the estimate using different assumptions would result in a material impact on Griffon's financial position or results of operations. The most significant areas involving management estimates are described below.

Goodwill, Long-Lived Intangible and Tangible Assets, and Impairment

As of September 30, 2025, the balance of goodwill on our balance sheet is $192,917 and indefinite-lived intangibles representing our trademarks is $183,969. We test goodwill and indefinite-lived intangibles for impairment at least annually in the fourth quarter, and more frequently whenever events or circumstances change that would more likely than not reduce the fair value below the carrying amount. Such events or changes in circumstance include significant deterioration in overall economic conditions, changes in the business climate in which our reporting units operate, a decline in our market capitalization, operating performance indicators, when some portion of a reporting unit is disposed of or classified as held for sale, or when a change in the composition of reporting units occurs for other reasons, such as a change in operating segments. To test goodwill and indefinite-lived intangible assets for impairment, we may perform both a qualitative assessment and quantitative assessment. If we elect to perform a qualitative assessment, we consider operating results as well as circumstances impacting the operations or cash flows of the reporting unit or indefinite-lived intangible assets, including macroeconomic conditions, industry and market conditions and reporting unit events and circumstances. For the quantitative test of goodwill, the assessment is based on both an income-based and market-based valuation approach.

Under the income-based approach, we determine the fair value of a reporting unit by using discounted cash flows that require significant judgment and assumptions, such as our best estimate of future revenue, operating costs, cash flows, expected long-term cash flow growth rates (terminal value growth rates), and risk adjusted discount rates. Under the market-based approach, we determine the fair value of a reporting unit by applying those multiples exhibited by comparable publicly traded companies and those multiples paid in acquisitions of peer company transactions to the financial results of the reporting units. We then compare the fair value estimates resulting from the income and market-based valuations to the sum of Griffon's market capitalization and net debt position to assess the reasonableness of the implied control premium. For the quantitative test of indefinite-lived intangible assets, we determine the fair value of indefinite-lived intangible assets by using the relief from royalty method, which estimates the value of a trademark by discounting to present value the hypothetical royalty payments that are saved by owning the asset rather than licensing it. If it is determined that an impairment exists, we recognize an impairment loss for the amount by which the carrying amount of the reporting unit or indefinite-lived intangible asset exceeds its estimated fair value.

Fair value estimates are based on assumptions believed to be reasonable at the time, but such assumptions are subject to inherent uncertainty. Actual results may differ materially from those estimates. Any changes in key assumptions or management judgment with respect to a reporting unit or its prospects, which may result from a decline in Griffon's stock price, a change in market conditions, market trends, interest rates or other factors outside of Griffon's control, or significant under-performance relative to historical or projected future operating results, could result in a significantly different estimate of the fair value of Griffon's reporting units and indefinite-lived intangible assets, which could result in an impairment charge in the future.

During the third quarter of fiscal 2025, indicators of goodwill and indefinite-lived intangible asset impairment were present for the Hunter Fan reporting unit within the CPP reportable segment, driven by a decrease in year-to-date and forecasted sales and operating results primarily due to ongoing weak consumer demand coupled with the impact of increased tariffs disrupting historical customer ordering patterns. As such, we performed a quantitative assessment of the Hunter Fan reporting unit goodwill using both an income based and market-based valuation approach. We also performed a quantitative assessment of the Hunter Fan indefinite-lived intangible assets using the relief from royalty method. The goodwill impairment test resulted in a pre-tax, non-cash impairment charge of $136,612, representing the remaining goodwill of the Hunter Fan reporting unit. Additionally, the indefinite-

lived intangible asset test resulted in a pre-tax, non-cash impairment charge of $107,000 to the carrying amount of Hunter Fan's trademark.

In preparation of our financial statements during the year ended September 30, 2025, we performed qualitative assessments of goodwill and indefinite-lived intangibles for our CPP and HBP reporting units, and concluded that it was not more likely than not that the fair values of these reporting units or indefinite-lived intangible assets were less than their carrying amounts.

For the year ended September 30, 2024, Griffon performed its annual impairment testing, and performed quantitative assessments of the CPP reporting unit's goodwill and indefinite-lived intangible assets, which did not result in an impairment.

For the year ended September 30, 2023, Griffon performed quantitative assessments of the CPP reporting unit's goodwill and indefinite-lived intangible assets at interim and at the annual testing date, which did not result in an impairment of goodwill, however, the tests resulted in pre-tax, non-cash impairment charges of $109,200 to the gross carrying amount of trademarks.

Griffon performed qualitative assessments for the HBP indefinite-lived intangibles and determined that indicators that fair value was less than the carrying amount were not present in fiscal 2025, 2024 and 2023.

Long-lived assets, such as customer relationships and software, and tangible assets, primarily property, plant and equipment, are amortized over their expected useful lives, which involve significant assumptions and estimates. We assess the recoverability of the carrying amount of our long-lived assets, including amortizable intangible assets, whenever events or changes in circumstances indicate the carrying amount of the assets may not be recoverable. We evaluate the recoverability of such assets based on the expectations of undiscounted cash flows attributable to the asset group. If the sum of the expected future undiscounted cash flows are less than the carrying amount of the asset group, a loss would be recognized for the difference between the fair value and the carrying amount. No indicator of impairment existed for the CPP asset groups as of September 30, 2025. As of September 30, 2024, we tested long-lived intangible and tangible assets for impairment by comparing estimated future undiscounted cash flows of each CPP asset group to the carrying amount of the asset group and determined that an impairment did not exist. No event or indicator of impairment existed for the HBP assets groups as of September 30, 2025 and 2024.

Fair value estimates are based on assumptions believed to be reasonable at the time, but such assumptions are subject to inherent uncertainty. Actual results may differ materially from those estimates. Any changes in key assumptions or management judgment with respect to a reporting unit or its prospects, which may result from a decline in Griffon's stock price, a change in market conditions, market trends, interest rates or other factors outside of Griffon's control, or significant under-performance relative to historical or projected future operating results, could result in a significantly different estimate of the fair value of Griffon's reporting units, which could result in an impairment charge in the future.

Income Taxes

Griffon's effective tax rate is based on income, statutory tax rates and tax planning opportunities available in the various jurisdictions in which Griffon operates. For interim financial reporting, the annual tax rate is estimated based on projected taxable income for the full year, and a quarterly income tax provision is recorded in accordance with the anticipated annual rate. As the year progresses, the annual tax rate is refined as new information becomes available, including year-to-date financial results. This process often results in changes to the effective tax rate throughout the year. Significant judgment is required in determining the effective tax rate and in evaluating tax positions.

Deferred tax assets and liabilities are recognized based on the differences between the financial statement carrying amounts and the tax basis of assets and liabilities. Deferred tax assets represent items to be used as a tax deduction or credit in future tax returns for which a tax benefit has been

recorded in the income statement. The Company assesses whether a valuation allowance should be established against its deferred tax assets based on consideration of all available evidence, both positive and negative, using a more likely than not standard. This assessment considers, among other matters, the nature, frequency and severity of recent losses; a forecast of future profitability; the duration of statutory carryback and carryforward periods; the Company's experience with tax attributes expiring unused; and tax planning alternatives. The likelihood that the deferred tax asset balance will be recovered from future taxable income is assessed at least quarterly, and the valuation allowance, if any, is adjusted accordingly.

Pension Benefits

Griffon sponsors defined and supplemental benefit pension plans for certain active and retired employees. Annual amounts relating to these plans are recorded based on actuarial projections, which include various actuarial assumptions, including discount rates, assumed rates of return, compensation increases and turnover rates. The actuarial assumptions used to determine pension liabilities, assets and expense are reviewed annually and modified based on current economic conditions and trends. The expected return on plan assets is determined based on the nature of the plans' investments and expectations for long-term rates of return. The discount rate used to measure obligations is based on a corporate bond spot-rate yield curve that matches projected future benefit payments, with the appropriate spot rate applicable to the timing of the projected future benefit payments. Assumptions used in determining Griffon's obligations under the defined benefit pension plans are believed to be reasonable, based on experience and advice from independent actuaries; however, differences in actual experience or changes in the assumptions may materially affect Griffon's financial position or results of operations.

All of the defined benefit plans are frozen and have ceased accruing benefits.

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

Interest Rates

Griffon's exposure to market risk for changes in interest rates relates primarily to variable interest rate debt and investments in cash and equivalents.

Griffon's amended and restated Credit Agreement references a benchmark rate with SONIA or SOFR. In addition, certain other of Griffon's credit facilities have a Canadian Overnight Repo Rate Average rate (CORRA) and Bank Bill Swap rate (BBSY) based variable interest rate. Due to the current and expected level of borrowings under these facilities, a 100 basis point change in SONIA, SOFR, CORRA or BBSY would not have a material impact on Griffon's results of operations or liquidity.

Foreign Exchange

Griffon conducts business in various non-U.S. countries, primarily in Canada, Australia, United Kingdom, Ireland, New Zealand and China; therefore, changes in the value of the currencies of these countries affect the financial position and cash flows when translated into U.S. Dollars. Griffon has generally accepted the exposure to exchange rate movements relative to its non-U.S. operations. Griffon may, from time to time, hedge its currency risk exposures. A change of 10% in the value of all applicable foreign currencies would not have a material effect on Griffon's financial position and cash flows.

Item 8. ***Financial Statements and Supplementary Data***

The financial statements of Griffon and its subsidiaries and the report thereon of Grant Thornton LLP (PCAOB ID 248) are included herein:

- ☐ Report of Independent Registered Public Accounting Firm.
- ☐ Consolidated Balance Sheets at September 30, 2025 and 2024.
- ☐ Consolidated Statements of Operations and Comprehensive Income (Loss) for the years ended September 30, 2025, 2024 and 2023.
- ☐ Consolidated Statements of Cash Flows for the years ended September 30, 2025, 2024 and 2023.
- ☐ Consolidated Statements of Shareholders' Equity for the years ended September 30, 2025, 2024 and 2023.
- ☐ Notes to Consolidated Financial Statements.
- ☐ Schedule II—Valuation and Qualifying Accounts.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Shareholders
Griffon Corporation

Opinions on the financial statements and internal control over financial reporting

We have audited the accompanying consolidated balance sheets of Griffon Corporation (a Delaware corporation) and subsidiaries (the "Company") as of September 30, 2025 and 2024, and the related consolidated statements of operations and comprehensive income (loss), shareholders' equity, and cash flows for each of the three years in the period ended September 30, 2025, and the related notes and financial statement schedule included under Item 15(a)(2) (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of September 30, 2025, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO").

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of September 30, 2025 and 2024, and the results of its operations and its cash flows for each of the three years in the period ended September 30, 2025 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 30, 2025, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by COSO.

Basis for opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the financial statements included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and limitations of internal control over financial reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical audit matter

The critical audit matter communicated below is a matter arising from the current period audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Hunter Fan Indefinite-Lived Intangible Asset Impairment Assessment

As described further in notes 1 and 7 to the consolidated financial statements, the Company tests indefinite-lived intangible assets for impairment at least annually in the fourth quarter, and more frequently whenever events or circumstances change that would more likely than not reduce the fair value below the carrying amount. Due to a decrease in year-to-date and forecasted sales and operating results at Hunter Fan, primarily attributable to ongoing weak consumer demand coupled with the impact of tariffs on customer order patterns, the Company determined that indicators of impairment were present at June 30, 2025 and therefore completed an interim impairment test for the Hunter Fan trademark.

Hunter Fan's trademark was tested for impairment by comparing the estimated fair value of the asset to its carrying value. The estimated fair value was determined using a relief from royalty valuation method, which estimates the value of a trademark by discounting to present value the hypothetical royalty payments that are saved by owning the asset rather than licensing it. As a result of the interim impairment test, the Company recorded an impairment charge of $107.0 million on Hunter Fan's trademark as of June 30, 2025. We identified the Company's interim impairment testing of the Hunter Fan trademark as a critical audit matter.

The principal considerations for our determination that the Hunter Fan trademark interim impairment testing is a critical audit matter are as follows: The determination of the fair value of indefinite-lived intangible assets requires management to make significant estimates and assumptions related to forecasts of future cash flows, such as revenue growth rates, the discount rate, inclusive of weighted average cost of capital, and the royalty rate. This requires management to evaluate historical results and expectations of future operating performance based on relevant information available to them regarding expectations of industry performance, as well as expectations for entity-specific performance. In addition, determining the discount rate requires management to evaluate the appropriate risk

premium based on their judgment of industry and entity-specific risks. Similarly, determining the royalty rate requires management to evaluate hypothetical royalty payments that are saved by owning the asset rather than licensing it. As disclosed by management, changes in these assumptions could result in a significantly different estimate of the fair value of the indefinite-lived intangible asset. In turn, auditing these judgments and assumptions requires a high degree of auditor judgment.

Our audit procedures related to the Hunter Fan trademark quantitative impairment testing included the following: We tested the design and operating effectiveness of controls relating to the impairment testing, including the Company's ability to develop the assumptions utilized in determining the fair value of the indefinite-lived intangible asset. Such assumptions included revenue growth rates, the discount rate, inclusive of weighted average cost of capital, and the royalty rate. With the assistance of valuation specialists, we evaluated the appropriateness of the valuation method utilized and assessed the appropriateness of assumptions utilized. We also evaluated the qualifications of the valuation specialists engaged by management responsible for preparing the estimated fair value of the Hunter Fan trademark. We evaluated the method used and tested significant inputs and significant assumptions utilized in performing the interim impairment test, as follows: a) tested forecasted revenue attributable to the trademark by comparing to historical trends and industry expectations, performed a sensitivity analysis over revenue growth rates and assessed management's historical ability to accurately forecast; b) tested the discount rate by comparing to historical rates and industry expectations, compared the rate to market comparable companies, independently calculated the discount rate for comparison to those used by management and performed a sensitivity analysis over the discount rate; and c) tested the assumed royalty rate by comparing to comparable licensing agreements, and performed a sensitivity analysis over the royalty rate.

NOTE 1—DESCRIPTION OF BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Description of business

Griffon Corporation (the "Company," "Griffon," "we" or "us") is a diversified management and holding company that conducts business through wholly-owned subsidiaries. Griffon oversees the operations of its subsidiaries, allocates resources among them and manages their capital structures. Griffon provides direction and assistance to its subsidiaries with acquisition and growth opportunities as well as divestitures. As long-term investors, we intend to continue to grow and strengthen our existing businesses, and to diversify further through investments in our businesses and acquisitions.

The Company was founded in 1959, is a Delaware corporation headquartered in New York, N.Y. and is listed on the New York Stock Exchange (NYSE:GFF).

On July 1, 2024, Griffon announced that its subsidiary, The AMES Companies, Inc., ("AMES") expanded the scope of its Australian operations by acquiring substantially all the assets of Pope, a leading Australian provider of residential watering products, from The Toro Company (NYSE:TTC) for a purchase price of approximately AUD 21,800 (approximately $14,500) in cash. This is CPP's seventh acquisition in Australia since 2013, and further expands AMES's product portfolio in the Australian market.

Griffon announced in May 2023 that CPP was expanding its global sourcing strategy to include long handled tools, material handling, and wood storage and organization product lines for the U.S. market. This initiative was successfully completed as of September 30, 2024. Refer to Note 10 - Restructuring Charges for additional information.

Griffon currently conducts its operations through two reportable segments:

- Home and Building Products ("HBP") conducts its operations through Clopay Corporation ("Clopay"). Founded in 1964, Clopay is the largest manufacturer and marketer of garage doors and rolling steel doors in North America. Residential and commercial sectional garage doors are sold through professional dealers and leading home center retail chains throughout North America under the brands Clopay, Ideal, and Holmes. Rolling steel door and grille products designed for commercial, industrial, institutional, and retail use are sold under the Clopay, Cornell and Cookson brands.

- Consumer and Professional Products ("CPP") is a global provider of branded consumer and professional tools; residential, industrial and commercial fans; home storage and organization products; and products that enhance indoor and outdoor lifestyles. CPP sells products globally through a portfolio of leading brands including AMES, since 1774, Hunter, since 1886, True Temper, and ClosetMaid.

Consolidation

The consolidated financial statements include the accounts of Griffon and all subsidiaries. Intercompany accounts and transactions have been eliminated in consolidation. The results of operations of acquired businesses are included from the dates of acquisitions.

Discontinued operations

As of September 30, 2025 and 2024, assets and liabilities of discontinued operations primarily consisted of insurance claims, product liability, warranty and environmental reserves. There was no reported revenue for the years ended September 30, 2025, 2024 and 2023 related to discontinued operations. See Note 8—Discontinued Operations for additional information.

Reclassifications

Certain amounts in prior years have been reclassified to conform to the current year presentation.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting periods. These estimates may be adjusted due to changes in economic, industry or customer financial conditions, as well as changes in technology or demand. Significant estimates include expected loss allowances for credit losses on accounts receivable and sales returns, net realizable value of inventories, restructuring reserves, valuation of goodwill and intangible assets, assumptions associated with pension benefit obligations and income or expenses, useful lives associated with depreciation and amortization of intangible and fixed assets, warranty reserves, sales incentive accruals, assumption associated with stock based compensation valuation, income taxes and tax valuation reserves, environmental reserves, legal reserves, insurance reserves, the valuation of assets and liabilities of discontinued operations, assumptions associated with valuation of acquired assets and assumed liabilities of acquired companies and the accompanying disclosures. These estimates are based on management's best knowledge of current events and actions Griffon may undertake in the future. Actual results may ultimately differ from these estimates.

Cash and equivalents

Griffon considers all highly liquid investments purchased with an initial maturity of three months or less to be cash equivalents. Cash equivalents primarily consist of overnight commercial paper, highly-rated liquid money market funds backed by U.S. Treasury securities and U.S. Agency securities. Griffon had cash in non-U.S. bank accounts of approximately $38,500 and $46,100 at September 30, 2025 and 2024, respectively. Substantially all U.S. cash and equivalents are in excess of FDIC insured limits. Griffon regularly evaluates the financial stability of all institutions and funds that hold its cash and equivalents.

Fair value of financial instruments

The carrying values of cash and cash equivalents, accounts receivable, accounts and notes payable and revolving credit and Term Loan B debt approximate fair value due to either the short-term nature of such instruments or the fact that the interest rate of the revolving credit debt is based upon current market rates.

The fair value hierarchy, as outlined in the applicable accounting guidance, establishes a fair value hierarchy that requires the Company to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. A financial instrument's categorization within the hierarchy is based on the lowest level of input that is significant to the fair value measurement. The

accounting guidance establishes three levels of inputs that may be used to measure fair value, as follows:

- Level 1 inputs are measured and recorded at fair value based upon quoted prices in active markets for identical assets.
- Level 2 inputs include inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices in active markets for similar assets and liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of assets or liabilities.
- Level 3 inputs are unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

The fair values of Griffon's 2028 Senior Notes and Term Loan B facility approximated $972,338 and $450,684, respectively, on September 30, 2025. Fair values were based upon quoted market prices (Level 1 inputs).

Insurance contracts with a value of $5,249 at September 30, 2025 are measured and recorded at fair value based upon quoted prices in active markets for similar assets (Level 2 inputs) and are included in Other assets on the Consolidated Balance Sheets.

Items Measured at Fair Value on a Recurring Basis

In the normal course of business, Griffon's operations are exposed to the effect of changes in foreign currency exchange rates. To manage these risks, Griffon may enter into various derivative contracts such as foreign currency exchange contracts, including forwards and options. Griffon entered into several such contracts in order to lock into a foreign currency rate for planned settlements of trade and inter-company liabilities payable in USD as discussed below.

At September 30, 2025 and 2024, Griffon had $41,000 and $67,500 of Australian dollar contracts at a weighted average rate of $1.50 and $1.47, respectively, which qualified for hedge accounting. These hedges were all deemed effective as cash flow hedges with gains and losses related to changes in fair value deferred and recorded in Other comprehensive income (loss) and Prepaid and other current assets, or Accrued liabilities, until settlement (Level 2 inputs). Upon settlement, gains and losses were recognized in the Consolidated Statements of Operations and Comprehensive Income (Loss) in Cost of goods and services ("COGS"). Accumulated Other Comprehensive Income ("AOCI") included deferred gains of $698 ($489, net of tax) at September 30, 2025 and deferred losses of $660 ($462, net of tax) at September 30, 2024. Upon settlement, gains of $2,919, $1,120 and $3,991 were recognized in the Consolidated Statements of Operations and Comprehensive Income (Loss) in COGS during 2025, 2024 and 2023, respectively. All contracts expire in 30 to 90 days.

At September 30, 2025 and 2024, Griffon had $21,000 and $20,500 of Chinese Yuan contracts at a weighted average rate of $7.10 and $7.11, respectively, which qualified for hedge accounting. These hedges were all deemed effective as cash flow hedges with gains and losses related to changes in fair value deferred and recorded in AOCI and Prepaid and other current assets, or Accrued liabilities, until settlement (Level 2 inputs). Upon settlement, gains and losses are recognized in the Consolidated Statements of Operations and Comprehensive Income (Loss) in COGS. AOCI included deferred gains of $37 ($27, net of tax) and deferred gains of $410 ($300, net of tax) at September 30, 2025 and 2024, respectively. Upon settlement, losses of $974, $1,936 and $2,313 were recorded in COGS during 2025, 2024 and 2023, respectively. All contracts expire in 31 to 273 days.

At September 30, 2025 and 2024, Griffon had $6,150 and $13,497, respectively, of Canadian dollar contracts at a weighted average rate of $1.40 and $1.35, respectively. These contracts, which protect Canadian operations from currency fluctuations for U.S. dollar based purchases, do not qualify for hedge accounting, and fair value losses of $100 and $67 were recorded in Other assets and to Other income for the outstanding contracts, based on similar contract values (Level 2 inputs), for the years ended September 30, 2025 and 2024, respectively. Realized gains (losses) of $157, $98 and $336 were recorded in Other income during 2025, 2024 and 2023, respectively. All contracts expire in 2 to 330 days.

At September 30, 2025, Griffon had CAD 1,742 of Chinese Yuan contracts at a weighted average rate of CAD 5.17. These contracts, which protect Canadian operations from currency fluctuations for Chinese Yuan based purchases, do not qualify for hedge accounting and fair value gains of $15 were recorded in Other assets and to Other income for the outstanding contracts, based on similar contract values (Level 2 inputs), for the year ended September 30, 2025. There were no realized gains recognized in Other income during 2025. All contracts expire in 30 to 359 days.

Pension plan assets with a fair value of $132,376 at September 30, 2025, and $158,705 at September 30, 2024, respectively, are measured and recorded at fair value based upon quoted prices in active markets for identical assets (Level 1 inputs), quoted market prices for similar assets (Level 2 inputs) and fair value assumptions for unobservable inputs in which little or no market data exists (Level 3).

The Company accounts for acquisitions under the acquisition method, in which assets acquired and liabilities assumed are recorded at fair value as of the date of acquisition using a method substantially similar to the goodwill impairment test methodology (Level 3 inputs). The operating results of the acquired companies are included in Griffon's consolidated financial statements from the date of acquisition in each instance.

Non-U.S. currency translation

Assets and liabilities of non-U.S. subsidiaries, where the functional currency is not the U.S. dollar, have been translated at year-end exchange rates and profit and loss accounts have been translated using weighted average exchange rates during the applicable fiscal year. Adjustments resulting from currency translation are recorded in AOCI as cumulative translation adjustments. The Company recognized foreign currency translation adjustment losses during 2025 of $6,569 and foreign currency translation adjustment gains of $10,137 during 2024. As of September 30, 2025 and 2024, the cumulative foreign currency translation recorded in AOCI resulted in losses of $45,155 and $38,586, respectively. Assets and liabilities of an entity that are denominated in currencies other than that entity's functional currency are re-measured into the functional currency using period end exchange rates, or historical rates where applicable to certain balances. Gains and losses arising on remeasurements are recorded within the Consolidated Statements of Operations and Comprehensive Income as a component of Other income (expense).

Revenue recognition

The Company recognizes revenue when performance obligations identified under the terms of contracts with its customers are satisfied. A performance obligation is a promise in a contract to transfer a distinct good or service, or a bundle of goods or services, to the customer, and is the unit of accounting. A contract with a customer is an agreement which both parties have approved, that creates enforceable rights and obligations, has commercial substance and with respect to which payment terms are identified and collectability is probable. Once the Company has entered into a contract or purchase order, it is evaluated to identify performance obligations. For each performance obligation, revenue is

recognized when control of the promised products is transferred to the customer, or services are satisfied under the contract or purchase order, in an amount that reflects the consideration the Company expects to be entitled to in exchange for those products or services (the transaction price).

The Company's performance obligations are recognized at a point in time related to the manufacture and sale of a broad range of products and components, and revenue is recognized when title, and risk and rewards of ownership, have transferred to the customer, which is generally upon shipment.

Refer to Note 2—Revenue for additional information.

Accounts receivable, expected allowance for credit losses and concentrations of credit risk

Accounts receivable is composed principally of trade accounts receivable, that arise from the sale of goods or services on account, and is stated at historical cost. A substantial portion of Griffon's trade receivables are from Home Depot, whose financial condition is dependent on the construction and related retail sectors of the economy. As a percentage of consolidated accounts receivable, Home Depot was 9% as of September 30, 2025 and 12% as of September 30, 2024. Griffon performs continuing evaluations of the financial condition of its customers, and although Griffon generally does not require collateral, letters of credit may be required from customers in certain circumstances.

Trade receivables are recorded at the stated amount, less expected allowance for credit losses and, when appropriate, for customer program reserves and cash discounts. The expected loss allowance represents estimated uncollectible receivables associated with potential customer defaults on contractual obligations (usually due to customers' potential insolvency). The expected allowance for credit losses includes amounts for certain customers where a risk of default has been specifically identified, as well as an amount for customer defaults based on a formula when it is determined the risk of some default is probable and estimable, but cannot yet be associated with specific customers. The provision related to the expected allowance for credit losses is recorded in Selling, general and administrative ("SG&A") expenses. The Company writes off accounts receivable when they are deemed to be uncollectible.

Customer program reserves and cash discounts are netted against accounts receivable when it is customer practice to reduce invoices for these amounts. The amounts netted against accounts receivable as of September 30, 2025 and September 30, 2024 were $46,766 and $64,211, respectively.

All accounts receivable amounts are expected to be collected in less than one year.

The Company does not currently have customers or contracts that prescribe specific retainage provisions.

Inventories

Inventories, stated at the lower of cost (first-in, first-out or average) or net realizable value, include material, labor and manufacturing overhead costs.

Griffon's businesses typically do not require inventory that is susceptible to becoming obsolete or dated. In general, HBP produces residential and commercial sectional garage doors, commercial rolling steel door and grille products, and CPP produces long-handled tools and landscaping products, and storage and organizational products, both in response to orders from customers of retailers and dealers or based on expected orders, as applicable.

Long-lived assets, including definite intangible assets

Property, plant and equipment includes the historical cost of land, buildings, equipment and significant improvements to existing plant and equipment or, in the case of acquisitions, a fair market value appraisal of such assets completed at the time of acquisition. Expenditures for maintenance, repairs and minor renewals are expensed as incurred. When property or equipment is sold or otherwise disposed of, the related cost and accumulated depreciation is removed from the respective accounts and the gain or loss is recognized.

Depreciation expense, which includes amortization of assets under capital leases, was $39,734, $37,901 and $43,056 in 2025, 2024 and 2023, respectively, and was calculated on a straight-line basis over the estimated useful lives of the assets. Depreciation included in SG&A expenses was $17,007, $16,510 and $17,598 in 2025, 2024 and 2023, respectively. The remaining components of depreciation, attributable to manufacturing operations, are included in COGS. Estimated useful lives for property, plant and equipment are as follows: buildings and building improvements, 25 to 40 years; machinery and equipment, 2 to 15 years; and leasehold improvements, over the term of the lease or life of the improvement, whichever is shorter.

Capitalized interest costs included in Property, plant and equipment were $3,489, $2,228 and $1,463 for the years ended September 30, 2025, 2024 and 2023, respectively. The original cost of fully-depreciated property, plant and equipment remaining in use at September 30, 2025 was approximately $265,931.

Long-lived assets, including customer relationships and software, and tangible assets, primarily property, plant and equipment, are amortized over their expected useful lives, generally eight to twenty-five years, and involves significant assumptions and estimates. We assess the recoverability of the carrying amount of our long-lived assets, including amortizable intangible assets, whenever events or changes in circumstances indicate the carrying amount of the assets may not be recoverable. We evaluate the recoverability of such assets based on the expectations of undiscounted cash flows attributable to the asset group. If the sum of the expected future undiscounted cash flows are less than the carrying amount of the asset group, a loss would be recognized for the difference between the fair value and the carrying amount. No indicator of impairment existed for the CPP asset groups as of September 30, 2025. As of September 30, 2024, we tested long-lived intangible and tangible assets for impairment by comparing estimated future undiscounted cash flows of each CPP asset group to the carrying amount of the asset group and determined that an impairment did not exist. No event or indicator of impairment existed for the HBP assets groups as of September 30, 2025 and 2024.

Goodwill and indefinite-lived intangibles

Goodwill represents the excess of the cost of net assets acquired in business combinations over the fair value of the identifiable tangible and intangible assets acquired and liabilities assumed in a business combination.

We test goodwill and indefinite-lived intangibles for impairment at least annually in the fourth quarter, and more frequently whenever events or circumstances change that would more likely than not reduce the fair value below the carrying amount. Such events or changes in circumstance include significant deterioration in overall economic conditions, changes in the business climate in which our reporting units operate, a decline in our market capitalization, operating performance indicators, when some portion of a reporting unit is disposed of or classified as held for sale, or when a change in the composition of reporting units occurs for other reasons, such as a change in operating segments. To test goodwill and indefinite-lived intangible assets for impairment, we may perform both a qualitative assessment and quantitative assessment. If we elect to perform a qualitative assessment, we consider operating results as well as circumstances impacting the operations or cash flows of the reporting unit or

indefinite-lived intangible assets, including macroeconomic conditions, industry and market conditions and reporting unit events and circumstances. For the quantitative test of goodwill, the assessment is based on both an income-based and market-based valuation approach. Under the income-based approach, we determine the fair value of a reporting unit by using discounted cash flows that require significant judgment and assumptions, such as our best estimate of future revenue, operating costs, cash flows, expected long-term cash flow growth rates (terminal value growth rates), and risk adjusted discount rates. Under the market-based approach, we determine the fair value of a reporting unit by applying those multiples exhibited by comparable publicly traded companies and those multiples paid in acquisitions of peer company transactions to the financial results of the reporting units. We then compare the fair value estimates resulting from the income and market-based valuations to the sum of Griffon's market capitalization and net debt position to assess the reasonableness of the implied control premium. For the quantitative test of indefinite-lived intangible assets, we determine the fair value of indefinite-lived intangible assets by using the relief from royalty method, which estimates the value of a trademark by discounting to present value the hypothetical royalty payments that are saved by owning the asset rather than licensing it. If it is determined that an impairment exists, we recognize an impairment loss for the amount by which the carrying amount of the reporting unit or indefinite-lived intangible asset exceeds its estimated fair value.

Fair value estimates are based on assumptions believed to be reasonable at the time, but such assumptions are subject to inherent uncertainty. Actual results may differ materially from those estimates. Any changes in key assumptions or management judgment with respect to a reporting unit or its prospects, which may result from a decline in Griffon's stock price, a change in market conditions, market trends, interest rates or other factors outside of Griffon's control, or significant under-performance relative to historical or projected future operating results, could result in a significantly different estimate of the fair value of Griffon's reporting units and indefinite-lived intangible assets, which could result in an impairment charge in the future.

During the third quarter of fiscal 2025, indicators of goodwill and indefinite-lived intangible asset impairment were present for the Hunter Fan reporting unit within the CPP reportable segment, driven by a decrease in year-to-date and forecasted sales and operating results primarily due to ongoing weak consumer demand coupled with the impact of increased tariffs disrupting historical customer ordering patterns. As such, we performed a quantitative assessment of the Hunter Fan reporting unit goodwill using both an income based and market-based valuation approach. We also performed a quantitative assessment of the Hunter Fan indefinite-lived intangible assets using the relief from royalty method. The goodwill impairment test resulted in a pre-tax, non-cash impairment charge of $136,612, representing the remaining goodwill of the Hunter Fan reporting unit. Additionally, the indefinite-lived intangible asset test resulted in a pre-tax, non-cash impairment charge of $107,000 to the carrying amount of Hunter Fan's trademark.

In preparation of our financial statements during the year ended September 30, 2025, we performed qualitative assessments of goodwill and indefinite-lived intangibles for our CPP and HBP reporting units, and concluded that it was not more likely than not that the fair values of these reporting units or indefinite-lived intangible assets were less than their carrying amounts as of the annual test date of September 30, 2025.

For the year ended September 30, 2024, Griffon performed its annual impairment testing, and performed quantitative assessments of the CPP reporting unit's goodwill and indefinite-lived intangible assets, which did not result in an impairment.

For the year ended September 30, 2023, Griffon performed quantitative assessments of the CPP reporting unit's goodwill and indefinite-lived intangible assets at interim and at the annual testing date,

which did not result in an impairment of goodwill, however, the tests resulted in pre-tax, non-cash impairment charges of $109,200 to the gross carrying amount of trademarks.

Griffon performed qualitative assessments for the HBP reporting unit goodwill and indefinite-lived intangibles and determined that indicators that fair value was less than the carrying amount were not present in fiscal years 2024 and 2023.

Leases

ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. ROU assets and liabilities are recognized at the lease commencement date based on the present value of lease payments over the lease term. As most of our leases do not provide an implicit rate, we use our incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments. We use the implicit rate when readily determinable. Our determination of the lease term may include options to extend or terminate the lease when it is reasonably certain that we will exercise that option.

The Company determines if an arrangement is a lease at inception. The ROU assets and short and long-term liabilities associated with our operating leases are shown as separate line items on our Consolidated Balance Sheets. Finance leases are included in property, plant, and equipment, net, other accrued liabilities, and other non-current liabilities.

For operating leases, fixed lease payments are recognized as operating lease cost on a straight-line basis over the lease term. For finance leases and impaired operating leases, the ROU asset is depreciated on a straight-line basis over the remaining lease term, along with recognition of interest expense associated with accretion of the lease liability. For leases with a lease term of 12 months or less (a "Short-term" lease), any fixed lease payments are recognized on a straight-line basis over such term, and are not recognized on the Consolidated Balance Sheets. Variable lease cost for both operating and finance leases, if any, is recognized as incurred. The Company has lease agreements that contain both lease and non-lease components. For real estate leases, we account for lease components together with non-lease components (e.g., common-area maintenance).

Income taxes

We are subject to Federal, state and local income taxes in the U.S. and in various taxing jurisdictions outside the U.S. We recognize deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns in accordance with applicable accounting guidance for accounting for income taxes, using currently enacted tax rates in effect for the year in which the differences are expected to reverse.

We record a valuation allowance when necessary to reduce deferred tax assets to the amount expected to be realized. Deferred tax assets are reduced by a valuation allowance if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Both positive and negative evidence are considered in forming our judgment as to whether a valuation allowance is appropriate, and more weight is given to evidence that can be objectively verified. Valuation allowances are reassessed whenever there are changes in circumstances that may cause a change in judgment.

The accounting for uncertainty in income taxes requires a more-likely-than-not threshold for financial statement recognition of tax positions taken or expected to be taken in a tax return. We record, as needed, a liability for the difference between the benefit recognized for financial statement purposes

and the tax position taken or expected to be taken on our tax return. To the extent that our assessment of such tax positions changes, the change in estimate is recorded in the period in which the determination is made. Interest and penalties recognized on the liability for unrecognized tax benefits is recorded as income tax expense.

Research and development costs, shipping and handling costs and advertising costs

Research and development costs are charged to SG&A expense as incurred and amounted to approximately $20,300 in 2025, $19,400 in 2024 and $18,100 in 2023.

Total shipping and handling costs included in both COGS and SG&A were $121,671 in 2025, $125,120 in 2024 and $123,100 in 2023, of which $67,500 in 2025, $68,400 in 2024 and $67,300 in 2023 were included in SG&A. Advertising costs, which are expensed as incurred in SG&A, were $26,600 in 2025, $25,600 in 2024 and $28,400 in 2023.

Risk, retention and insurance

Griffon's property and casualty insurance programs contain various deductibles that, based on Griffon's experience, are reasonable and customary for a company of its size and risk profile. Griffon generally maintains deductibles for claims and liabilities related primarily to workers' compensation, general, product and automobile liability as well as property damage and business interruption losses resulting from certain events. Griffon does not consider any of the deductibles to represent a material risk to Griffon. Griffon accrues for claim exposures that are probable of occurrence and can be reasonably estimated. Insurance is maintained to transfer risk beyond the level of self-retention and provides protection on both an individual claim and annual aggregate basis.

Pension benefits

Griffon sponsors defined and supplemental benefit pension plans for certain retired employees. Annual amounts relating to these plans are recorded based on actuarial projections, which include various actuarial assumptions, including discount rates, assumed rates of return, compensation increases and turnover rates. Actuarial assumptions used to determine pension liabilities, assets and expense are reviewed annually and modified based on current economic conditions and trends. The expected return on plan assets is determined based on the nature of the plan's investments and expectations for long-term rates of return. The discount rate used to measure obligations is based on a corporate bond spot-rate yield curve that matches projected future benefit payments, with the appropriate spot rate applicable to the timing of the projected future benefit payments. Assumptions used in determining Griffon's obligations under the defined benefit pension plans are believed to be reasonable, based on experience and advice from independent actuaries; however, differences in actual experience or changes in assumptions may materially impact Griffon's financial position or results of operations.

All of the defined benefit plans are frozen and have ceased accruing benefits.

The Company recognized non-service cost components of net periodic (benefit) cost of ($5,411), $137 and $866 during 2025, 2024, and 2023 respectively.

Issued but not yet effective accounting pronouncements

In December 2023, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2023-09, *Income Taxes (Topic 740): Improvements to Income Tax Disclosures.*

The new standard was issued to improve transparency and decision usefulness of income tax disclosures by providing information that helps investors better understand how an entity's operations, tax risks, tax planning and operational opportunities affect its tax rate and prospects for future cash flows. The standard requires significant additional disclosures focused on income taxes paid and the rate reconciliation table. Specifically, the amendments in the standard require the Company to disclose disaggregated: (1) income taxes paid by federal, state, and foreign, (2) continuing operations pre-tax income between domestic and foreign, and (3) continuing operations income tax expense by federal, state and foreign. The standard also requires the Company to disclose specific categories in the rate reconciliation and provide additional information for reconciling items that meet a quantitative threshold. This standard is effective for the Company beginning with our fiscal year 2026, and can be applied prospectively or retrospectively. While the Company is currently evaluating the guidance to determine the impact it may have on its consolidated financial statements, the Company does not expect the adoption of this standard to have a material impact on its financial position, results of operations, or cash flows.

In November 2024, the FASB issued ASU 2024-03, *Income Statement—Reporting Comprehensive Income—Expense Disaggregation Disclosures (Subtopic 220-40): Disaggregation of Income Statement Expenses.* The amendments in this update require disclosure and further disaggregation, in the notes to financial statements, of specified information about certain costs and expenses. The required disclosures include the amounts of purchases of inventory, employee compensation, depreciation, intangible asset amortization, and depreciation, depletion, and amortization recognized as part of oil and gas producing activities included in each relevant expense caption. Additionally, further disclosures are required for certain amounts already required to be disclosed under current GAAP, a qualitative description of amounts remaining in relevant expense captions that are not separately disaggregated quantitatively, and the total amount of selling expenses, and on an annual basis, the definition of selling expenses. The ASU is effective for the Company beginning with the Company's fiscal year 2027 and interim reporting periods beginning with the Company's 2028 fiscal year. Implementation of this standard may be applied prospectively or retrospectively. The Company is currently evaluating this guidance to determine the impact it may have on its consolidated financial statements.

New Accounting Standards Adopted

In November 2023, the FASB issued ASU No. 2023-07, *Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures.* The new standard provides improvements to reportable segment disclosure requirements through amendments that require disclosure of significant segment expenses and other segment items on an interim and annual basis and requires all annual disclosures about a reportable segment's profit or loss and assets to be made on an interim basis. The standard also requires the disclosure of the chief operating decision maker's ("CODM") title and position and an explanation of how the CODM uses the reported measure(s) of segment profit or loss in assessing segment performance and deciding how to allocate resources. The standard also clarifies that if the CODM uses more than one measure in assessing segment performance and deciding how to allocate resources, a company may report the additional segment profit or loss measure(s), and that companies with a single reportable segment must provide all disclosures required by this amendment. The Company adopted this standard for the year ended September 30, 2025. The standard was applied retrospectively to all prior periods presented in the financial statements. Refer to Note 19—Reportable Segments, for additional information.

NOTE 2—REVENUE

The Company recognizes revenue when performance obligations identified under the terms of contracts with its customers are satisfied. A performance obligation is a promise in a contract to transfer a distinct good or service, or a bundle of goods or services, to the customer, and is the unit of accounting. A contract with a customer is an agreement which both parties have approved, that creates enforceable rights and obligations, has commercial substance and with respect to which payment terms are identified and collectability is probable. Once the Company has entered into a contract or purchase order, it is evaluated to identify performance obligations. For each performance obligation, revenue is recognized when control of the promised products is transferred to the customer, or services are satisfied under the contract or purchase order, in an amount that reflects the consideration the Company expects to be entitled to in exchange for those products or services (the transaction price).

A contract's transaction price is allocated to each distinct performance obligation and recognized as revenue when each performance obligation is satisfied. A majority of the Company's contracts have a single performance obligation which represents, in most cases, the product being sold to the customer. To a lesser extent, some contracts include multiple performance obligations such as a product, the related installation, and extended warranty services. These contracts require judgment in determining the number of performance obligations. For contracts with multiple performance obligations, judgment is required to determine whether performance obligations specified in these contracts are distinct and should be accounted for as separate revenue transactions for recognition purposes. In these types of contracts, the Company allocates the total transaction price to each performance obligation in an amount based on the estimated relative standalone selling prices of the promised goods or services underlying each performance obligation. The Company uses an observable price to determine the stand-alone selling price for separate performance obligations or a cost plus margin approach when one is not available. The transaction price includes variable consideration, such as discounts and volume rebates, when it is probable that a significant reversal of revenue recognized will not occur. Variable consideration is determined using either the expected value or the most likely amount of consideration to be received based on historical experience and the specific facts and circumstances at the time of evaluation.

See Note 19—Reportable Segments for revenue from contracts with customers disaggregated by end markets, segments and geographic location.

The Company's performance obligations are recognized at a point in time related to the manufacture and sale of a broad range of products and components and revenue is recognized when title, and risk and rewards of ownership, have transferred to the customer, which is generally upon shipment.

A majority of the Company's revenue is short cycle in nature with shipments occurring within one year from order and does not include a material long-term financing component, implicitly or explicitly. Payment terms generally range between 15 to 90 days and vary by the location of the business, the type of products manufactured to be sold and the volume of products sold, among other factors.

The Company recognizes revenue from product sales when all factors are met, including when control of a product transfers to the customer upon its shipment, completion of installation, testing, certification or other substantive acceptance required under the contract. Other than standard product warranty provisions, sales arrangements provide for no significant post-shipment obligations on the Company. From time-to-time and for certain customers, rebates and other sales incentives, promotional allowances or discounts are offered, typically related to customer purchase volumes, all of which are fixed or determinable and are classified as a reduction of revenue and recorded at the time of sale. Griffon provides for sales returns and allowances based upon historical returns experience. The Company includes shipping costs billed to customers in revenue and the related shipping costs in either COGS or SG&A expenses.

The majority of the Company's contracts offer assurance-type warranties in connection with the sale of a product to a customer. Assurance-type warranties provide a customer with assurance that the related product will function as the parties intended because it complies with agreed-upon specifications. Such warranties do not represent a separate performance obligation.

Payment terms vary depending on the type and location of the customer and the products or services offered. Generally, the period between the time revenue is recognized and the time payment is due is not significant. Shipping and handling charges are not considered a separate performance obligation. Additionally, all taxes assessed by a governmental authority that are both imposed on and concurrent with a specific revenue-producing transaction and collected from a customer (e.g., sales, use, value added, and some excise taxes) are excluded from revenue.

NOTE 3—ACQUISITIONS

Griffon continually evaluates potential acquisitions that either strategically fit within its portfolio or expand its portfolio into new product lines or adjacent markets. Griffon has completed a number of acquisitions that have been accounted for as business combinations, in which assets acquired and liabilities assumed are recorded at fair value as of the date of acquisition and have resulted in the recognition of goodwill. The operating results of the business acquisitions are included in Griffon's consolidated financial statements from the date of acquisition.

On July 1, 2024, Griffon announced that its subsidiary, AMES expanded the scope of its Australian operations by acquiring substantially all the assets of Pope, a leading Australian provider of residential watering products, from The Toro Company (NYSE:TTC) for a purchase price of approximately AUD 21,800 (approximately $14,500) in cash. During the year ended September 30, 2025, the purchase price was finalized and allocated to acquired intangibles, net of deferred taxes, of AUD 2,940 (approximately $1,960) and goodwill of AUD 2,640 (approximately $1,758), which was assigned to the CPP segment and is not deductible for income tax purposes. The purchase price was also allocated to inventory of AUD 16,132 (approximately $10,752), property, plant and equipment, net of AUD 1,289 (approximately $859) and accrued liabilities of AUD 1,194 (approximately $795).

During the year ended September 30, 2024, SG&A expenses included acquisition costs of $441. There were no acquisition costs recorded during the years ended September 30, 2025 and 2023.

NOTE 4—INVENTORIES

The following table details the components of inventory:

	At September 30, 2025	At September 30, 2024
Raw materials and supplies	$ 89,305	$ 92,366
Work in process	13,685	13,923
Finished goods	337,782	319,200
Total	$440,772	$425,489

In connection with the Company's restructuring activities described in Note 10—Restructuring Charges, during the year ended September 30, 2024 CPP recorded an inventory impairment charge of $23,763 in COGS to adjust inventory to its net realizable value. There were no impairment charges recorded during the year ended September 30, 2025.

NOTE 5—PROPERTY, PLANT AND EQUIPMENT

The following table details the components of property, plant and equipment, net:

	At September 30, 2025	At September 30, 2024
Land, building and building improvements	$ 160,233	$ 153,076
Machinery and equipment[1]	498,656	472,030
Leasehold improvements	38,317	37,833
	697,206	662,939
Accumulated depreciation and amortization	(403,678)	(374,642)
Total	$ 293,528	$ 288,297

[1] Machinery and Equipment includes approximately $33,239 and $36,443 of construction in progress assets as of September 30, 2025 and September 30, 2024, respectively.

In connection with the expansion of CPP's global sourcing strategy which was completed as of September 30, 2024, certain owned manufacturing locations which concluded operations have met the criteria to be classified as held for sale, and the net book value of these properties as of September 30, 2025 totaled $5,609.

During the year ended September 30, 2025, in connection with the goodwill and indefinite-lived intangible asset impairment event described in Note 7—Goodwill and Intangibles, the Company also evaluated property, plant and equipment assets for potential impairment. The review did not result in any impairment charges to property, plant and equipment.

Except as described in Note 10—Restructuring Charges, no event or indicator of impairment occurred during the year ended September 30, 2024 which required additional impairment testing of property, plant and equipment.

NOTE 6—CREDIT LOSSES

The Company is exposed to credit losses primarily through sales of products and services. Trade receivables are recorded at their stated amount, less expected allowances for credit losses and, when appropriate, for customer program reserves and cash discounts. The Company's expected loss allowance methodology for trade receivables is primarily based on the aging method of the accounts receivable balances and the financial condition of its customers. The expected allowance for doubtful accounts represents estimated uncollectible receivables associated with potential customer defaults on contractual obligations (usually due to customers' potential insolvency), discounts related to early payment of accounts receivable by customers and estimates for returns. The allowance for credit losses includes amounts for certain customers where a risk of default has been specifically identified, as well as an amount for customer defaults, based on a formula, when it is determined the risk of some default is probable and estimable, but cannot yet be associated with specific customers. The provision related to the expected allowance for credit losses is recorded in SG&A expenses. The Company writes-off accounts receivable when they are deemed to be uncollectible. The Company also considers current and expected future economic and market conditions when determining any estimate of credit losses. Generally, estimates used to determine the allowance are based on assessment of anticipated payment and all other historical, current and future information that is reasonably available. All accounts receivable amounts are expected to be collected in less than one year.

Based on a review of the Company's policies and procedures across all segments, including the aging of its trade receivables, recent write-off history and other factors related to future macroeconomic conditions, Griffon determined that its method to determine credit losses and the amount of its allowances for bad debts is in accordance with this guidance in all material respects.

The following table provides a roll-forward of the allowance for credit losses that is deducted from the amortized cost basis of accounts receivable to present the net amount expected to be collected:

Beginning Balance, September 30, 2023	$11,264
Provision for expected credit losses	636
Amounts written off charged against the allowance	(1,325)
Other, primarily foreign currency translation	411
Ending Balance, September 30, 2024	$10,986
Provision for expected credit losses	566
Amounts written off charged against the allowance	(1,755)
Other, primarily foreign currency translation	289
Ending Balance, September 30, 2025	$10,086

NOTE 7—GOODWILL AND INTANGIBLES

Goodwill at September 30, 2025 and 2024 was $192,917 and $329,393, respectively.

During the third quarter of fiscal 2025, indicators of goodwill impairment were present for the Hunter Fan reporting unit within the CPP reportable segment, driven by a decrease in year-to-date and forecasted sales and operating results primarily due to ongoing weak consumer demand coupled with the impact of increased tariffs disrupting historical customer ordering patterns. As such, we performed a quantitative assessment of the Hunter Fan reporting unit goodwill using both an income-based and market-based valuation approach. This impairment test resulted in a pre-tax, non-cash goodwill impairment charge of $136,612, representing the remaining goodwill of the Hunter Fan reporting unit. In connection with the preparation of our financial statements for the fiscal year ended September 30, 2025, Griffon performed a qualitative assessment of the CPP reporting units and determined that indicators that fair value was less than the carrying amount were not present. For the fiscal years ended September 30, 2024 and 2023, the Company performed a quantitative assessment of the CPP reporting units using both an income-based and market-based approach, which did not result in a goodwill impairment.

For the HBP reporting unit, we performed a qualitative assessment and determined that indicators that fair value was less than the carrying amount were not present in fiscal years 2025, 2024 and 2023.

The following table provides a summary of the carrying value of goodwill by segment as of September 30, 2025, 2024 and 2023.

	At September 30, 2023	Goodwill from acquisitions[a]	Foreign currency translation adjustments	At September 30, 2024	Impairment Charges	Goodwill from acquisitions[b]	Foreign currency translation adjustments	At September 30, 2025
Consumer and Professional Products	$136,611	$1,483	$46	$138,140	$(136,612)	$230	$(94)	$ 1,664
Home and Building Products	191,253	—	—	191,253	—	—	—	191,253
Total	$327,864	$1,483	$46	$329,393	$(136,612)	$230	$(94)	$192,917

(a) The change in goodwill for the CPP segment relates to the initial purchase price allocation of the Pope acquisition in 2024.

(b) The change in goodwill for the CPP segment is due to final purchase price allocation adjustments recorded during the year ended September 30, 2025 related to the 2024 Pope acquisition.

Indicators of impairment were present for our Hunter Fan indefinite-lived intangible asset during the third quarter of fiscal 2025 due to the reasons discussed above. As such, we determined the fair value of Hunter Fan's indefinite-lived intangible asset by using a relief from royalty method, which estimates the value of a trademark by discounting to present value the hypothetical royalty payments that are saved by owning the asset rather than licensing it. We compared the estimated fair value to the carrying amount, resulting in a pre-tax, non-cash impairment charge of $107,000 to the carrying amount of Hunter Fan's trademark recorded in the third quarter of fiscal 2025. In preparation of the financial statements for the year ended September 30, 2025, Griffon performed qualitative assessments for the CPP indefinite-lived intangibles and determined that indicators that fair value was less than the carrying amount were not present. For the year ended September 30, 2024, the impairment tests did not result in impairment charges to CPP's gross carrying amount of intangible assets; however, for the year ended September 30, 2023, the impairment tests resulted in a pre-tax non-cash impairment charge of $109,200 to the gross carrying amount of our trademarks in the CPP segment.

Griffon performed qualitative assessments for the HBP indefinite-lived intangibles and determined that indicators that fair value was less than the carrying amount were not present during 2025, 2024 and 2023.

The following table provides the gross carrying value and accumulated amortization for each major class of intangible asset:

	At September 30, 2025			At September 30, 2024	
	Gross Carrying Amount	Accumulated Amortization	Average Life (Years)	Gross Carrying Amount	Accumulated Amortization
Customer relationships & other	$449,203	$153,507	17	$450,784	$134,296
Unpatented technology	18,596	10,147	10	17,350	6,859
Total amortizable intangible assets	467,799	163,654		468,134	141,155
Trademarks	183,969	—		291,803	—
Total intangible assets	$651,768	$163,654		$759,937	$141,155

In 2025, the gross carrying amount of intangible assets was unfavorably impacted by $1,169 related to foreign currency translation.

We also evaluated our definite-lived intangible assets for potential impairment in connection with the goodwill impairment event noted above. The review did not result in any impairment charges related to definite-lived intangible assets.

Amortization expense for intangible assets subject to amortization was $23,280, $22,803 and $22,389 in 2025, 2024, and 2023, respectively. Amortization expense for each of the next five years and thereafter, based on current intangible balances and classifications, is estimated as follows: 2026 - $23,600; 2027 - $23,600; 2028 - $23,600; 2029 - $23,500 and 2030 - $23,300; thereafter - $186,545.

NOTE 8—DISCONTINUED OPERATIONS

The following amounts which summarize the total assets and liabilities related to discontinued activities have been segregated from Griffon's continuing operations, and are reported as assets and liabilities of discontinued operations in the Consolidated Balance Sheets:

	At September 30, 2025	At September 30, 2024
Assets of discontinued operations:		
Prepaid and other current assets	$1,302	$ 648
Other long-term assets	4,699	3,417
Total assets of discontinued operations	$6,001	$4,065
Liabilities of discontinued operations:		
Accrued liabilities, current	$3,956	$4,498
Other long-term liabilities	4,770	3,270
Total liabilities of discontinued operations	$8,726	$7,768

At September 30, 2025 and 2024, Griffon's liabilities for discontinued operations primarily related to insurance claims, income taxes, product liability, warranty claims and environmental reserves totaling $8,726 and $7,768, respectively. Griffon's assets for discontinued operations primarily relate to insurance claims. The increase in assets and liabilities was primarily associated with insurance claims receivable and payable.

There was no reported revenue in 2025, 2024 and 2023 related to discontinued operations.

NOTE 9—ACCRUED LIABILITIES

The following table details the components of accrued liabilities:

	At September 30, 2025	At September 30, 2024
Compensation	$ 70,013	$ 82,413
Interest	4,246	4,532
Warranties and rebates	14,124	16,900
Insurance	12,369	12,535
Rent, utilities and freight	4,536	5,294
Income and other taxes	23,256	17,459
Marketing and advertising	3,315	5,401
Restructuring	4,043	12,998
Other	16,805	24,386
Total	$152,707	$181,918

NOTE 10—RESTRUCTURING CHARGES

Griffon announced in May 2023 that CPP was expanding its global sourcing strategy to include long handled tools, material handling, and wood storage and organization product lines for the U.S. market. This initiative was successfully completed as of September 30, 2024.

As a result of this global sourcing expansion initiative, manufacturing operations have concluded at four manufacturing sites and four wood mills, resulting in a total facility footprint reduction of

approximately 1.2 million square feet, or approximately 15% of CPP's square footage, and a headcount reduction of approximately 600. The closed locations have met the held for sale criteria and have been classified as such on our Consolidated Balance Sheets as of September 30, 2025 and September 30, 2024. The net book value of these properties as of September 30, 2025 and September 30, 2024 totaled $5,609 and $14,532, respectively.

The adoption of an asset-light business model for these U.S. products has positioned CPP to better serve customers with a more flexible and cost-effective sourcing model that leverages supplier relationships around the world, and improved its competitive positioning.

Implementation of this strategy over the duration of the project resulted in charges of $133,777, which included $51,082 of cash charges for employee retention and severance, operational transition, and facility and lease exit costs, and $82,695 of non-cash charges primarily related to asset write-downs. In addition, there were $2,678 of capital investments to effectuate the project. This excluded cash proceeds from the sale of real estate and equipment, which through September 30, 2024 were $13,271, and excluded future proceeds from the sale of remaining real estate and equipment. During the year ended September 30, 2025, cash proceeds related to the sale of the remaining real estate and equipment held for sale totaled $17,729.

In the year ended September 30, 2024, CPP incurred pre-tax restructuring and related exit costs approximating $41,309. Cash charges totaled $17,546 and non-cash, asset-related charges totaled $23,763; the cash charges included $5,856 for one-time termination benefits and other personnel related costs and $11,690 for facility exit costs. Non-cash charges related to $23,763 recorded to adjust inventory to its net realizable value.

In the year ended September 30, 2023, CPP incurred pre-tax restructuring and related exit costs approximating $92,468. Cash charges totaled $33,536 and non-cash, asset-related charges totaled $58,932; the cash charges included $16,772 for one-time termination benefits and other personnel-related costs and $16,764 for facility exit costs. Non-cash charges included a $21,832 impairment charge related to certain fixed assets at several manufacturing locations and $37,100 recorded to adjust inventory to its net realizable value.

A summary of the restructuring and other related charges included in COGS and SG&A expenses in the Company's Consolidated Statements of Operations were as follows:

	For the Year Ended September 30,	
	2024	2023
Cost of goods and services	$35,806	$82,028
Selling, general and administrative expenses	5,503	10,440
Total restructuring charges	$41,309	$92,468

	For the Year Ended September 30,	
	2024	2023
Personnel related costs	$ 5,856	$16,772
Facilities, exit costs and other	11,690	16,764
Non-cash facility and other	23,763	58,932
Total	$41,309	$92,468

The following table summarizes the accrued liabilities of the Company's restructuring actions:

	Cash Charges	Cash Charges	Non-Cash Charges	
	Personnel related costs	Facilities & Exit Costs	Facility and Other Costs	Total
Accrued liability at September 30, 2022	$ 386	$ 264	$ —	$ 650
Charges	16,772	16,764	58,932	92,468
Payments	(3,051)	(11,477)	—	(14,528)
Non-cash charges[1]	—	—	(58,932)	(58,932)
Accrued liability at September 30, 2023	$ 14,107	$ 5,551	$ —	$ 19,658
Charges	5,856	11,690	23,763	41,309
Payments	(11,781)	(12,425)	—	(24,206)
Non-cash charges[1]	—	—	(23,763)	(23,763)
Accrued liability at September 30, 2024	$ 8,182	$ 4,816	$ —	$ 12,998
Payments	(5,355)	(3,600)	—	(8,955)
Accrued liability at September 30, 2025	$ 2,827	$ 1,216	$ —	$ 4,043

(1) Non-cash charges in Facility and Other Costs primarily represent the non-cash write-off of certain long-lived assets and inventory that has no recoverable value in connection with certain facility closures.

NOTE 11—WARRANTY LIABILITY

CPP and HBP offer warranties against product defects for periods generally ranging from one to ten years, with limited lifetime warranties on certain door models. Typical warranties require CPP and HBP to repair or replace the defective products during the warranty period at no cost to the customer. At the time revenue is recognized, Griffon records a liability for warranty costs, estimated based on historical experience, and periodically assesses its warranty obligations and adjusts the liability as necessary. CPP offers an express limited warranty for a period of ninety days on all products from the date of the original purchase unless otherwise stated on the product or packaging from the date of original purchase. CPP provides limited lifetime warranties on certain products. Warranty costs expected to be incurred in the next 12 months are classified in accrued liabilities. Warranty costs expected to be incurred beyond one year are classified in other long-term liabilities. The short-term warranty liability was $10,143 as of September 30, 2025 and $13,050 as of September 30, 2024. The long-term warranty liability was $1,239 at both September 30, 2025 and 2024.

Changes in Griffon's warranty liability, included in Accrued liabilities, were as follows:

	Years Ended September 30,	
	2025	2024
Balance, beginning of period	$ 13,050	$ 20,781
Warranties issued and changes in estimated pre-existing warranties	19,300	23,253
Actual warranty costs incurred	(22,207)	(30,984)
Balance, end of period	$ 10,143	$ 13,050

NOTE 12—LONG-TERM DEBT

Debt at September 30, 2025 and 2024 consisted of the following:

		At September 30, 2025				
		Outstanding Balance	Original Issuer Premium (Discount)	Capitalized Fees & Expenses	Balance Sheet	Coupon Interest Rate
Senior Notes due 2028	(a)	$ 974,775	$ 121	$ (4,880)	$ 970,016	5.75%
Term Loan B due 2029	(b)	449,000	(461)	(4,169)	444,370	Variable

Capitalized interest			(142)	—	—	(142)
Totals			$97,213	$124	$4,108	$101,445

Minimum payments under debt agreements for the next five years are as follows: $8,103 in 2026, $8,045 in 2027, $982,819 in 2028, $425,047 in 2029, $12 in 2030 and no debt payments due thereafter.

(a) During 2020, Griffon issued, at par, $1,000,000 of 5.75% Senior Notes due 2028 (the “Senior Notes”). Proceeds from the Senior Notes were used to redeem $1,000,000 of 5.25% Senior Notes due in 2022. In connection with the issuance and exchange of the Senior Notes, Griffon capitalized $16,448 of underwriting fees and other expenses incurred, which is being amortized over the term of such notes. During 2022, Griffon purchased $25,225 of Senior Notes in the open market at a weighted average discount of 91.82% of par, or $23,161. As of September 30, 2025, outstanding Senior Notes due totaled $974,775; interest is payable semi-annually on March 1 and September 1.

The Senior Notes are senior unsecured obligations of Griffon guaranteed by certain domestic subsidiaries, and subject to certain covenants, limitations and restrictions. The Senior Notes were registered under the Securities Act of 1933, as amended (the “Securities Act”) via an exchange offer. The fair value of the Senior Notes approximated $972,338 on September 30, 2025 based upon quoted market prices (Level 1 inputs). At September 30, 2025, $4,880 of underwriting fees and other expenses incurred remained to be amortized.

(b) On January 24, 2022, Griffon amended and restated its Credit Agreement (the “Credit Agreement”) to provide for a new $800,000 Term Loan B facility, due January 24, 2029, in addition to the revolving credit facility (the “Revolver”) provided for under the Credit Agreement. The Term Loan B facility was issued at 99.75% of par value. Since that time, Griffon has prepaid $325,000 aggregate principal amount of the Term Loan B, which permanently reduced the outstanding balance. In connection with the prepayment of the Term Loan B, Griffon recognized charges of $437 and $6,296 on the prepayment of debt in 2023 and 2022, respectively. The charges were comprised of write-offs of unamortized debt issuance costs of $386 and $5,575 for 2023 and 2022, respectively, and the

original issue discount of $51 and $721 for 2023 and 2022, respectively. As of September 30, 2025, the Term Loan B outstanding balance was $449,000.

On June 26, 2024, Griffon further amended its Credit Agreement to favorably reprice the Term Loan B facility. The amendment reduced the margin above SOFR by 0.25%, eliminated the credit spread adjustment and reduced the SOFR floor from 0.50% to 0%. In connection with the amendment, Griffon recognized a $1,700 loss on debt extinguishment during the year ended September 30, 2024 in the Company's Consolidated Statements of Operations, primarily consisting of the write-off of unamortized debt issuance costs and original issue discount related to portions of the Term Loan B facility that were repaid and then reborrowed from new lenders. At September 30, 2025, $4,169 of costs incurred remained to be amortized over the term of the loan.

The Term Loan B bears interest at the Term SOFR rate plus a spread of 2.00% (6.13% as of September 30, 2025). The Term Loan B facility continues to require nominal quarterly principal payments of $2,000, potential additional annual principal payments based on a percentage of excess cash flow and certain secured leverage thresholds, and a final balloon payment due at maturity. Term Loan B borrowings may generally be repaid without penalty. Once repaid, Term Loan B borrowings may not be reborrowed. The Term Loan B facility is subject to the same affirmative and negative covenants that apply to the Revolver (as described below), but is not subject to any financial maintenance covenants. Term Loan B borrowings are secured by the same collateral that secures borrowings under the Revolver, on an equal and ratable basis. The fair value of the Term Loan B facility approximated $450,684 on September 30, 2025 based upon quoted market prices (Level 1 inputs).

On August 1, 2023, Griffon amended and restated the Credit Agreement to increase the maximum borrowing availability under the Revolver from $400,000 to $500,000 and extend the maturity date of the Revolver from March 22, 2025 to August 1, 2028. In the event the 2028 Senior Notes are not repaid, refinanced, or replaced prior to December 1, 2027, the Revolver will mature on December 1, 2027. The amendment also modified certain other provisions of the Credit Agreement, including increasing the letter of credit sub-facility under the Revolver from $100,000 to $125,000 and increasing the customary accordion feature from a minimum of $375,000 to a minimum of $500,000. The Revolver also includes a multi-currency sub-facility of $200,000.

Borrowings under the Revolver may be repaid and re-borrowed at any time. Interest is payable on borrowings at either a SOFR, SONIA or base rate benchmark rate, plus an applicable margin, which adjusts based on financial performance. Griffon's SOFR loans accrue interest at Term SOFR plus a credit adjustment spread and a margin of 1.75% (5.98% at September 30, 2025); SONIA loans accrue interest at SONIA Base Rate plus a credit adjustment spread and a margin of 1.75% (5.75% at September 30, 2025); and base rate loans accrue interest at prime rate plus a margin of 0.75% (8.00% at September 30, 2025).

At September 30, 2025, under the Credit Agreement, there were no outstanding borrowings on the Revolver; outstanding standby letters of credit were $14,328; and $485,672 was available, subject to certain loan covenants, for borrowing at that date.

The Revolver has certain financial maintenance tests including a maximum total leverage ratio, a maximum senior secured leverage ratio and a minimum interest coverage ratio, as well as customary affirmative and negative covenants and events of default. The negative covenants place limits on Griffon's ability to, among other things, incur indebtedness, incur liens, and make restricted payments and investments. Both the Revolver and Term Loan B borrowings under the Credit Agreement are guaranteed by Griffon's material domestic subsidiaries and are secured, on a first priority basis, by substantially all domestic assets of the Company and the guarantors.

(c) On September 28, 2023, the Company closed on the exercise of its lease purchase option, as permitted under the lease agreement, to acquire ownership of the manufacturing facility located in Ocala, Florida for a cash purchase price of $23,207. The Ocala lease had a maturity date in 2025 and bore interest at a fixed rate of approximately 5.6%. As a result of exercising the purchase option, the Company no longer has any future lease obligations related to this real estate. Refer to Note 22- Leases for additional information.

(d) In November 2012, Garant G.P. ("Garant"), a Griffon wholly owned subsidiary, entered into a CAD 15,000 revolving credit facility, which expired in December 2024. In January 2025, Garant entered into a new CAD 20,000 revolving credit facility that matures in January 2026 but is renewable upon mutual agreement with the lender. The new facility accrues interest at Canadian Overnight Repo Rate Average ("CORRA") plus a credit adjustment spread and a margin of 1.20% (4.06% as of September 30, 2025). At September 30, 2025, there were no outstanding borrowings under the revolving credit facility with CAD 20,000 ($14,376 as of September 30, 2025) available.

During 2023, Griffon Australia Holdings Pty Ltd and its Australian subsidiaries (collectively, "Griffon Australia") amended its AUD 15,000 receivable purchase facility to AUD 30,000. The receivable purchase facility was renewed in March 2025 and now matures in March 2026, but is renewable upon mutual agreement with the lender. The receivable purchase facility accrues interest at Bank Bill Swap Rate plus 1.25% per annum (4.79% at September 30, 2025). At September 30, 2025, there was no balance outstanding under the receivable purchase facility with AUD 30,000 ($19,707 as of September 30, 2025) available. The receivable purchase facility is secured by substantially all of the assets of Griffon Australia and its subsidiaries. Griffon Australia is required to maintain a certain minimum equity level.

In July 2018, the AMES Companies UK Ltd and its subsidiaries (collectively, "Ames UK") entered into a GBP 14,000 term loan, GBP 4,000 mortgage loan and GBP 5,000 revolver, which matured in July 2023. Prior to maturity, on June 30, 2023, AMES UK paid off and cancelled the GBP 14,000 term loan and GBP 4,000 mortgage loan. The payoff amounts were GBP 7,525 ($9,543) and GBP 2,451 ($3,108), respectively. Upon maturity in July 2023, the GBP 5,000 revolver had no balance and was not renewed.

(e) The balance in other long-term debt consists primarily of finance leases.

At September 30, 2025, Griffon and its subsidiaries were in compliance with the terms and covenants of its credit and loan agreements.

NOTE 13—EMPLOYEE BENEFIT PLANS

Griffon offers defined contribution plans to most of its U.S. employees. In addition to employee contributions to the plans, Griffon makes contributions based upon various percentages of compensation and/or employee contributions, which were $12,115 in 2025, $10,319 in 2024 and $10,857 in 2023. Fiscal year 2025 includes $1,525 of employer contributions to a qualified replacement plan that were funded by excess assets from the Hunter Pension Plan.

Effective August 5, 2025, the Company implemented a new retiree medical plan for certain eligible employees. Under the plan eligible retirees and their covered spouses are provided company-paid medical, prescription drug and dental coverage through the Company's group health plans(or if such coverage cannot be provided, an equivalent benefit), along with reimbursement for certain uncovered expenses. It is the Company's practice to fund these benefits as incurred.

The Company recognized a benefit obligation of $6,527 as of September 30, 2025, accumulated other comprehensive income, net of $4,063 and benefit expense of $1,071. The discount rate utilized in the

determination of the projected benefit obligation and net periodic benefit cost was 5.60%. The annual increase in cost of benefits (health care cost trend rate) is assumed to be 7.50% and gradually decreases to a rate of 6.60% over three years. The Company recognized $1,016 and will recognize $5,362, of non-cash charges in fiscal 2025 and 2026, respectively, related to the implementation of this plan.

The Company also provides healthcare and life insurance benefits for certain groups of retirees through several plans. For certain employees, the benefits are at fixed amounts per retiree and are partially contributory by the retiree. The post-retirement benefit obligation was $1,545 and $1,670 as of September 30, 2025 and 2024. The weighted average discount rate utilized to determine the benefit obligation was 4.87% and 4.08% as of September 30, 2025 and 2024, respectively. The accumulated other comprehensive income for these plans was $311 and $306 as of September 30, 2025 and 2024, respectively, and the 2025, 2024 and 2023 expense was $19, $4 and $17, respectively. The weighted average discount rate utilized to determine the net periodic benefit expense was 4.69%, 5.61% and 5.52% in 2025, 2024 and 2023, respectively. It is the Company's practice to fund these benefits as incurred.

Griffon also has qualified and non-qualified defined benefit plans covering certain employees which provide benefits based on years of service and employee compensation. Over time, these amounts will be recognized as part of net periodic pension costs in the Consolidated Statements of Operations and Comprehensive Income (Loss).

During fiscal year 2025 Griffon was responsible for overseeing the management of the investments of it's qualified defined benefit plans. The Company uses the services of an investment manager to manage the plans' assets based on agreed upon risk profiles. The primary objective of the qualified defined benefit plan is to secure participant retirement benefits. As such, the key objective in this plan's financial management is to promote stability and, to the extent appropriate, growth in the funded status. Financial objectives are established in conjunction with a review of current and projected plan financial requirements. The fair values of a majority of the plan assets were determined by the plans' trustee using quoted market prices for identical instruments (Level 1 inputs) as of September 30, 2025 and 2024. The fair value of various other investments was determined by the plans' trustees using direct observable market corroborated inputs, including quoted market prices for similar assets (Level 2 inputs). A small amount of plan assets are invested in private equity which consist primarily of investments in private companies which are valued using the net asset values provided by the underlying private investment companies as a practical expedient (Level 3 inputs).

The Clopay AMES Pension Plan and the AMES supplemental executive retirement plan are frozen to new entrants and participants in the plans no longer accrue benefits.

The Hunter Fan Pension Plan (the "Plan") was terminated with an effective date of April 30, 2024. This was communicated to plan participants in February 2024. At the time of termination, the Plan was fully funded and the Company did not anticipate making additional funding contributions as of the benefit distribution dates. During the year ended September 30, 2025, the Plan made lump sum payments in the amount of $4,830 to those participants who elected a lump sum distribution. Additionally, the Company selected an insurance company to hold the annuity and provide pension benefits to the plan participants currently receiving benefit payments and those that elected to continue their future benefit with an annuity provider. This decision included a transfer of plan assets valued at $10,859. In July 2025, Griffon completed the termination of the Plan and $6,100 of excess cash was transferred to the Company, a portion of which was transferred directly to a qualified replacement plan. During the year ended September 30, 2025, the Company recognized a gain on the termination of the Plan of $2,181, net of excise taxes, in the Consolidated Statements of Operations and Comprehensive Income (Loss).

The Company recognized non-service cost components of net periodic (benefit) cost of ($5,411), $137 and $866 during 2025, 2024, and 2023 respectively.

Griffon uses judgment to establish the assumptions used in determining the future liability of the plan, as well as the investment returns on the plan assets. The expected return on assets assumption used for pension expense was developed through analysis of historical market returns, current market conditions and past experience of plan investments. The long-term rate of return assumption represents the expected average rate of earnings on the funds invested, or to be invested, to provide for the benefits included in the benefit obligations. The assumption is based on several factors including historical market index returns, the anticipated long-term asset allocation of plan assets and the historical return. The discount rate assumption is determined by developing a yield curve based on high quality bonds with maturities matching the plans' expected benefit payment stream. The plans' expected cash flows are then discounted by the resulting year-by-year spot rates. A 10% change in the discount rate or return on assets would not have a material effect on the financial statements of Griffon.

Net periodic (benefits) costs were as follows:

	Defined Benefits for the Years Ended September 30,			Supplemental Benefits for the Years Ended September 30,		
	2025	2024	2023	2025	2024	2023
Net periodic (benefits) costs:						
Interest cost	$ 5,506	$ 7,050	$ 6,814	$ 387	$ 504	$488
Expected return on plan assets	(9,387)	(10,172)	(10,213)	—	—	—
Pension termination settlement	(4,621)	—	—	—	—	—
Amortization of:						
Actuarial loss	2,087	2,250	3,314	617	505	463
Total net periodic (benefits) costs	$(6,415)	$ (872)	$ (85)	$1,004	$1,009	$951

The tax benefits in 2025, 2024 and 2023 for the amortization of pension costs in Other comprehensive income (gain) were $(402), $578 and $793, respectively.

The weighted-average assumptions used in determining the net periodic (benefits) costs were as follows:

	Defined Benefits for the Years Ended September 30,			Supplemental Benefits for the Years Ended September 30,		
	2025	2024	2023	2025	2024	2023
Discount rate	4.76%	5.63%	5.17%	4.46%	5.53%	5.02%
Expected return on assets	6.75%	6.75%	6.72%	—%	—%	—%

Plan assets and benefit obligation of the defined and supplemental benefit plans were as follows:

	Defined Benefits at September 30,		Supplemental Benefits at September 30,	
	2025	2024	2025	2024
Change in benefit obligation:				
Benefit obligation at beginning of fiscal year	$145,746	$139,224	$ 10,776	$ 10,882
Interest cost	5,506	7,050	387	504
Benefits paid	(11,124)	(11,576)	(1,893)	(1,896)
Benefits paid related to pension termination	(15,784)	—	—	—
Actuarial (gain) loss	(2,823)	11,048	870	1,286
Benefit obligation at end of fiscal year	121,521	145,746	10,140	10,776
Change in plan assets:				
Fair value of plan assets at beginning of fiscal year	158,705	146,997	—	—
Actual return on plan assets	6,048	21,933	—	—
Company contributions	631	1,351	1,893	1,896
Benefits paid	(11,124)	(11,576)	(1,893)	(1,896)
Benefits paid related to pension termination	(15,784)	—	—	—
Return of excess plan assets	(6,100)	—	—	
Fair value of plan assets at end of fiscal year	132,376	158,705	—	—
Projected benefit obligation in excess of plan assets	$ 10,855	$ 12,959	$(10,140)	$(10,776)
Amounts recognized in the statement of financial position consist of:				
Non-Current Assets	$ 10,855	$ 12,959	$ —	$ —
Accrued liabilities	—	—	(1,813)	(1,823)
Other liabilities (long-term)	—	—	(8,327)	(8,953)
Total Liabilities	10,855	12,959	(10,140)	(10,776)
Net actuarial losses	28,367	25,314	6,953	6,700
Deferred taxes	(5,957)	(5,316)	(1,665)	(3,037)
Total accumulated other comprehensive loss, net of tax	22,410	19,998	5,288	3,663
Net amount recognized at September 30,	$ 33,265	$ 32,957	$ (4,852)	$ (7,113)
Accumulated benefit obligations	$121,521	$145,746	$ 10,140	$ 10,776
Information for plans with accumulated benefit obligations in excess of plan assets:				
ABO	$121,521	$145,746	$ 10,140	$ 10,776
PBO	121,521	145,746	10,140	10,776
Fair value of plan assets	132,376	158,705	—	—

Actuarial gains as of September 30, 2025 were primarily due to the increase in the discount rate; conversely, actuarial losses as of September 30, 2024 were primarily due to the decrease in the discount rate.

The weighted-average assumptions used in determining the benefit obligations were as follows:

	Defined Benefits at September 30,		Supplemental Benefits at September 30,	
	2025	2024	2025	2024
Weighted average discount rate	5.09%	4.76%	4.52%	4.46%

Estimated future benefit payments to retirees, which reflect expected future service, are as follows:

For the years ending September 30,	Defined Benefits	Supplemental Benefits
2026	$10,929	$1,813
2027	10,869	1,637
2028	10,772	1,461
2029	10,655	1,287
2030	10,470	1,118
2031-2035	48,453	3,453

During 2026, Griffon expects to contribute $1,567 to the Clopay Ames Pension Plan and expects to contribute $1,813 to Supplemental Benefits that will be funded from the general assets of Griffon.

The Clopay AMES Pension Plan is covered by the Pension Protection Act of 2006. The Adjusted Funding Target Attainment Percent for the Clopay AMES Pension Plan as of January 1, 2025 was 95.0%. Since the plan was in excess of the 80% funding threshold there were no plan restrictions. There are no catch up contributions for the plan expected in 2026.

The actual and weighted-average asset allocation for qualified benefit plans were as follows:

	At September 30,		
	2025	2024	Target
Cash and equivalents	2.4%	2.9%	—%
Equity securities	5.4%	26.4%	5.0%
Fixed income	80.0%	48.6%	85.0%
Other	12.2%	22.1%	10.0%
Total	100.0%	100.0%	100.0%

The following is a description of the valuation methodologies used for plan assets measured at fair value:

Government and agency securities—When quoted market prices are available in an active market, the investments are classified as Level 1. When quoted market prices are not available in an active market, the investments are classified as Level 2.

Equity securities—The fair values reflect the closing price reported on a major market where the individual mutual fund securities are traded in equity securities. These investments are classified within Level 1 of the valuation hierarchy.

Debt securities—The fair values are based on a compilation of primarily observable market information or a broker quote in a non-active market where the individual mutual fund securities are invested in debt securities. These investments are classified within Level 1 and Level 2 of the valuation hierarchy.

Commingled funds—The fair values are determined using NAV provided by the administrator of the fund. The NAV is based on the value of the underlying assets owned by the trust/entity, minus its liabilities, and then divided by the number of shares outstanding. These investments are generally classified within Level 2 or 3, as appropriate, of the valuation hierarchy and can be liquidated on demand.

Interest in limited partnerships and hedge funds—One limited partnership investment is a private equity fund and the fair value is determined by the fund managers based on the net asset values provided by the underlying private investment companies as a practical expedient. These investments are classified within Level 2 of the valuation hierarchy.

Fully benefit-responsive investment contracts—The Plan holds fully benefit-responsive investment contracts that are reported at contract value, which is the value of principal and interest under the terms of the annuity contract.

The following table presents the fair values of Griffon's pension and post-retirement plan assets by asset category:

At September 30, 2025	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Cash and equivalents	$ 3,167	$ —	$ —	$ 3,167
Government agency securities	10,091	8,154	—	18,245
Debt instruments	75,344	9,284	—	84,628
Equity securities	7,134	—	—	7,134
Commingled funds	—	—	6,585	6,585
Limited partnerships and hedge fund investments	—	9,404	—	9,404
Other securities	2,205	—	—	2,205
Subtotal	$97,941	$26,842	$6,585	$131,368
Accrued income and plan receivables				1,008
Total				$132,376

At September 30, 2024	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Cash and equivalents	$ 4,522	$ —	$ —	$ 4,522
Government and agency securities	5,890	5,116	—	11,006
Debt instruments	42,705	6,144	—	48,849
Equity securities	41,786	—	—	41,786
Commingled funds	—	4,859	9,979	14,838
Limited partnerships and hedge fund investments	—	20,177	—	20,177
Other securities	17,004	—	—	17,004
Subtotal	$111,907	$36,296	$9,979	$158,182
Accrued income and plan receivables				523
Total				$158,705

The following table represents Level 3 significant unobservable inputs for the years ended September 30, 2025 and 2024:

	Significant Unobservable Inputs (Level 3)
As of October 1, 2023	$10,459
Purchases, issuances and settlements	(1,591)
Gains and losses	1,111
As of September 30, 2024	$ 9,979
Purchases, issuances and settlements	(5,448)
Gains and losses	2,054
As of September 30, 2025	$ 6,585

Griffon has an Employee Stock Ownership Plan ("ESOP") that covered substantially all domestic employees. The ESOP was frozen as of September 30, 2024; this means that, for the plan years after this date, no additional employees will become participants under the ESOP and no new voluntary contributions will be made to the ESOP. Prior to this date, all U.S. employees of Griffon, who are not members of a collective bargaining unit, were automatically eligible to participate in the plan on the October 1st following completion of one qualifying year of service (as defined in the plan). Securities were allocated to participants' individual accounts based on the proportion of each participant's aggregate compensation (not to exceed $330 for the plan year ended September 30, 2024), to the total of all participants' compensation. Shares of the ESOP that had been allocated to employee accounts were charged to expense based on the fair value of the shares transferred and were treated as outstanding in determining earnings per share. Through December 31, 2024, dividends paid on shares held by the ESOP were used to offset debt service on the ESOP Loans; since such date, dividends have been, and will be, deposited directly into the ESOP participants' accounts. Dividends paid on shares held in participant accounts are utilized to allocate shares from the aggregate number of shares to be released, equal in value to those dividends, based on the closing price of Griffon common stock on the dividend payment date.

During 2025 the final loan payment was made by the ESOP to the Company and compensation expense for the period was fully offset by dividends paid. Compensation expense under the ESOP was $8,533 in 2024 and $20,583 in 2023. The cost of the shares held by the ESOP and not yet allocated to employees is reported as a reduction of Shareholders' Equity. The fair value of the unallocated ESOP shares as of September 30, 2024 based on the closing price of Griffon's stock was $1,250. The ESOP shares were as follows:

	At September 30,	
	2025	2024
Allocated shares	3,977,753	4,234,713
Unallocated shares	—	17,852
Total	3,977,753	4,252,565

NOTE 14—INCOME TAXES

Income taxes have been based on the following components of Income before taxes:

	For the Years Ended September 30,		
	2025	2024	2023
Domestic	$101,537	$292,409	$106,209
Non-U.S.	25,834	4,241	6,473
	$127,371	$296,650	$112,682

Provision (benefit) for income taxes on income was comprised of the following:

	For the Years Ended September 30,		
	2025	2024	2023
Current	$104,746	$83,179	$ 72,860
Deferred	(28,485)	3,574	(37,795)
Total	$ 76,261	$86,753	$ 35,065
U.S. Federal	$ 45,683	$59,480	$ 23,612
State and local	17,290	15,328	5,899
Non-U.S.	13,288	11,945	5,554
Total provision	$ 76,261	$86,753	$ 35,065

Differences between the effective income tax rate applied to Income before taxes and the U.S. Federal statutory income tax rate are presented in the table below.

	For the Years Ended September 30,		
	2025	2024	2023
U.S. Federal statutory income tax rate	21.0 %	21.0 %	21.0 %
State and local taxes, net of Federal benefit	5.5 %	3.7 %	(0.2)%
Non-U.S. taxes - foreign permanent items and taxes	3.0 %	1.0 %	1.4 %
Change in tax contingency reserves	— %	(0.5)%	(0.4)%
Tax Reform-Repatriation of Foreign Earnings and GILTI	(2.1)%	(0.5)%	0.5 %
Change in valuation allowance	2.7 %	2.8 %	3.9 %
Other non-deductible/non-taxable items, net	(0.5)%	— %	— %
Non-deductible officer's compensation	5.6 %	1.9 %	5.1 %
Research and U.S. foreign tax credits	(0.9)%	(0.3)%	(0.9)%
Goodwill impairment	27.4 %	— %	— %
Share based compensation	(2.8)%	(0.7)%	0.8 %
Other	1.0 %	0.8 %	(0.1)%
Effective tax rate	59.9 %	29.2 %	31.1 %

The tax effect of temporary differences that give rise to future deferred tax assets and liabilities are as follows:

	At September 30,	
	2025	2024
Deferred tax assets:		
Bad debt reserves	$ 2,103	$ 2,491
Inventory reserves	8,219	7,086
Deferred compensation (equity compensation and defined benefit plans)	6,739	7,036
Compensation benefits	6,121	5,052
Insurance reserve	1,918	2,411
Restructuring reserve	826	2,616
Warranty reserve	4,392	5,130
Lease liabilities	46,454	47,824
Net operating loss	27,750	25,299
Tax credits	5,933	5,933
Research & development	10,329	4,510
Other reserves and accruals	5,160	5,167
	125,944	120,555
Valuation allowance	(30,703)	(26,989)
Total deferred tax assets	95,241	93,566
Deferred tax liabilities:		
Goodwill and intangibles	(99,174)	(126,523)
Property, plant and equipment	(19,872)	(19,903)
Right-of-use assets	(43,498)	(45,112)
Unremitted foreign earnings	(1,514)	(1,896)
Other	(1,068)	(723)
Total deferred tax liabilities	(165,126)	(194,157)
Net deferred tax liabilities	$ (69,885)	$(100,591)

The components of the net deferred tax liability, by balance sheet account, were as follows:

	At September 30,	
	2025	2024
Other assets	$ 209	$ 495
Assets held for sale	—	947
Other liabilities	(70,948)	(103,194)
Liabilities of discontinued operations	854	1,161
Net deferred liability	$(69,885)	$(100,591)

In 2025 and 2024, the net increases in the valuation allowance of $3,714 and $8,997, respectively are the result of a determination that certain state and foreign net operating losses will not be realized.

At September 30, 2025 and 2024, Griffon's policy election under APB 23 is to indefinitely reinvest the undistributed earnings of certain non-U.S. subsidiaries. As of September 30, 2025, we have approximately $122,964 of undistributed earnings of non-U.S. subsidiaries. Of these undistributed earnings, $38,703 were previously subjected to U.S. federal income tax. As of September 30, 2025, we recognized a deferred tax liability of $1,514 for estimated non-U.S. withholding taxes on the non-U.S. earnings that are not indefinitely reinvested. The Company has not provided deferred taxes on any

other outside basis differences in its investments in the non-U.S. subsidiaries as these other outside basis differences are currently considered indefinitely reinvested. The Company may repatriate non-indefinitely reinvested earnings of its non-U.S. subsidiaries where excess cash has accumulated and the Company determines that it is appropriate and tax efficient. Accordingly, the Company continues to reinvest all other undistributed earnings of its non-U.S. subsidiaries and may be subject to additional non-U.S. withholding taxes and U.S. state income taxes if it reverses its indefinite reinvestment assertion in the future.

At September 30, 2025, Griffon had no loss carryforwards for U.S. tax purposes and $75,849 for non-U.S. tax purposes. At September 30, 2024, Griffon had no loss carryforwards for U.S. tax purposes and $63,217 for non-U.S. tax purposes. The non-U.S. loss carryforwards expire in varying amounts beginning in 2027 to indefinite carryforward.

At September 30, 2025 and 2024, Griffon had state and local loss carryforwards of $221,855 and $228,485, respectively. The state and local loss carryforwards expire in varying amounts beginning in 2026 to indefinite carryforward.

At September 30, 2025 and 2024, Griffon had federal tax credit carryforwards of $5,933 in both years, which expire in 2028.

We believe it is more likely than not that the benefit from certain federal, state, and non-U.S. tax attributes will not be realized. In recognition of this risk, we have provided a valuation allowance as of September 30, 2025 and 2024 of $30,703 and $26,989, respectively, on the deferred tax assets. As it becomes probable that the benefits of these attributes will be realized, the reversal of valuation allowance will be recognized as a reduction of income tax expense.

Griffon files U.S. Federal, state and local tax returns, as well as applicable returns in Canada, Australia, U.K. and other non-U.S. jurisdictions. Griffon's U.S. Federal income tax returns are no longer subject to income tax examination for years before 2022. Griffon's major U.S. state and other non-U.S. jurisdictions are no longer subject to income tax examinations for years before 2017. Various U.S. state and statutory tax audits are currently underway.

The following is a roll forward of unrecognized tax benefits:

Balance at September 30, 2023	$ 6,292
Additions based on tax positions related to the current year	154
Additions based on tax positions related to prior years	35
Reductions based on tax positions related to prior years	(2,735)
Lapse of Statutes	(140)
Balance at September 30, 2024	$ 3,606
Additions based on tax positions related to the current year	39
Additions based on tax positions related to prior years	11
Reductions based on tax positions related to prior years	(130)
Lapse of Statutes	(440)
Balance at September 30, 2025	$ 3,086

If recognized, the amount of potential unrecognized tax benefits that would impact Griffon's effective tax rate is $1,603. Griffon recognizes potential accrued interest and penalties related to unrecognized tax benefits in income tax expense. At September 30, 2025 and 2024, the combined amount of accrued interest and penalties related to tax positions taken or to be taken on Griffon's tax returns and recorded as part of the reserves for uncertain tax positions was $402 and $310, respectively. Griffon cannot reasonably estimate the extent to which other existing liabilities for uncertain tax positions may increase

or decrease within the next twelve months as a result of the progression of ongoing tax audits or other events. Griffon believes that it has adequately provided for all open tax years by tax jurisdiction.

The Organization for Economic Co-operation and Development released the Global Anti-base Erosion Model Rules for Pillar Two ("Pillar Two"), which defined a 15% global minimum tax. Australia, Canada, U.K., Ireland, and other countries have enacted or are considering changes in their tax laws and regulations based on Pillar Two, some of which became effective for the Company in 2025. The Company has evaluated the impact of Pillar Two under the safe harbor provisions and currently there is no impact to the Company's financial statements.

On July 4, 2025, the One Big Beautiful Bill Act ("OBBBA") was enacted in the U.S. The OBBBA includes significant tax related provisions, such as the permanent extension of certain expiring provisions of the Tax Cuts and Jobs Act, modifications to the international tax framework and the restoration of favorable tax treatment for certain business provisions. The legislation has multiple effective dates, with certain provisions effective in the Company's fiscal year 2025 and others to be implemented through 2027. The Company evaluated the OBBBA and there is no material impact on its financial position or results of operations in the current year.

NOTE 15—STOCKHOLDERS' EQUITY AND EQUITY COMPENSATION

During 2025, 2024 and 2023, the Company declared and paid, in quarterly increments, cash dividends totaling \$0.72 per share, \$0.60 per share and \$0.45 per share, respectively. Additionally, on April 19, 2023, the Board of Directors declared a special cash dividend of \$2.00 per share, paid on May 19, 2023 to shareholders of record as of the close of business on May 9, 2023.

The Company currently intends to pay dividends each quarter; however, payment of dividends is determined by the Board of Directors at its discretion based on various factors, and no assurance can be provided as to the payment of future dividends. Dividends paid on shares in the ESOP through December 31, 2024 were used to offset ESOP loan payments and recorded as a reduction of debt service payments and compensation expense. The ESOP loan was paid in full as of December 31, 2024 and dividends paid after that date are paid in cash directly to participant accounts. For all dividends, a dividend payable was established for the holders of restricted shares; such dividends will be released upon vesting of the underlying restricted shares. At September 30, 2025, accrued dividends were \$2,962.

On November 18, 2025, the Board of Directors declared a cash dividend of \$0.22 per share, payable on December 16, 2025 to shareholders of record as of the close of business on November 28, 2025.

On January 29, 2016, shareholders approved the Griffon Corporation 2016 Equity Incentive Plan (the "Original Incentive Plan") pursuant to which, among other things, awards of performance shares, performance units, stock options, stock appreciation rights, restricted shares, restricted stock units, deferred shares and other stock-based awards may be granted. On January 31, 2018, shareholders approved Amendment No. 1 to the Original Incentive Plan pursuant to which, among other things, 1,000,000 shares were added to the Original Incentive Plan; on January 30, 2020, shareholders approved Amendment No. 2 to the Original Incentive Plan, pursuant to which 1,700,000 shares were added to the Original Incentive Plan; on February 17, 2022, shareholders approved the Amended and Restated 2016 Equity Incentive Plan (the "Amended Incentive Plan"), which amended and restated the Original Incentive Plan and pursuant to which, among other things, 1,200,000 shares were added to the Original Incentive Plan; and on March 20, 2024, shareholders approved an amendment to add 2,600,000 shares to the Amended Incentive Plan. Options granted under the Amended Incentive Plan may be either "incentive stock options" or nonqualified stock options, which generally expire ten years after the date of grant and are granted at an exercise price of not less than 100% of the fair market value at the date of grant. The maximum number of shares of common stock available for award under the Amended

Incentive Plan is 8,850,000 (600,000 of which may be issued as incentive stock options), plus (i) any shares that were reserved for issuance under the Original Incentive Plan as of the effective date of the Original Incentive Plan, and (ii) any shares underlying awards outstanding on such date under the 2011 Incentive Plan that were subsequently canceled or forfeited. As of September 30, 2025, 1,895,135 shares were available for grant.

Compensation expense for restricted stock and restricted stock units is recognized ratably over the required service period based on the fair value of the grant, calculated as the number of shares or units granted multiplied by the stock price on date of grant, and for performance shares, including performance units, the likelihood of achieving the performance criteria. The Company recognizes forfeitures as they occur. Compensation expense for restricted stock granted to four senior executives is calculated as the target number of shares granted, upon achieving certain performance criteria or market conditions. The Monte Carlo Simulation Model is used to estimate the grant-date fair value restricted stock awards that include market conditions. Compensation cost related to stock-based awards with graded vesting, generally over a period of 3 years, is recognized using the straight-line attribution method and recorded within SG&A.

The following table summarizes the Company's compensation expense relating to all stock-based incentive plans:

	For the Years Ended September 30,		
	2025	2024	2023
Restricted stock	$25,483	$18,305	$20,529
ESOP[1]	—	8,533	20,583
Total stock-based compensation	$25,483	$26,838	$41,112

[1] During the year ended September 30, 2023, special dividend ESOP charges included in compensation expense were $15,494.

A summary of restricted stock activity, inclusive of restricted stock units, for 2025 is as follows:

	Shares	Weighted Average Grant-Date Fair Value
Unvested at September 30, 2024	2,417,200	$37.96
Granted	595,798	81.30
Vested	(1,267,142)	77.21
Forfeited	(113,401)	29.94
Unvested at September 30, 2025	1,632,455	66.79

The fair value of restricted stock which vested during 2025, 2024, and 2023 was $97,833, $80,861 and $25,863, respectively.

Unrecognized compensation expense related to non-vested shares of restricted stock was $37,911 at September 30, 2025 and will be recognized over a weighted average vesting period of 1.8 years.

At September 30, 2025, a total of approximately 3,527,590 shares of Griffon's authorized Common Stock were reserved for issuance in connection with stock compensation plans.

During 2025, Griffon granted 579,858 shares of restricted stock and restricted stock units to its employees. This included 137,479 shares of restricted stock and 5,432 restricted stock units granted to

forty-three executives and key employees, subject to certain performance conditions, with a vesting period of thirty-six months with a total fair value of $9,735, or a weighted average fair value of $68.12 per share. This also included 436,947 shares of restricted stock granted to four senior executives with a vesting period of thirty-six months and a two-year post-vesting holding period, subject to the achievement of certain performance criteria and market conditions, relating to required levels of return on invested capital and the relative total shareholder return of Griffon's common stock as compared to a market index. So long as the minimum performance and market conditions are attained, the amount of shares that can vest will range from a minimum of 72,827 to a maximum of 436,947, with the target number of shares being 145,649. The total fair value of these restricted shares, assuming achievement of the performance and market conditions at target, is approximately $12,372, or a weighted average fair value of $84.95 per share. Additionally, Griffon granted 15,940 shares of restricted stock to the non-employee directors of Griffon with a vesting period of one year and a fair value of $1,100, or a weighted average fair value of $69.03 per share. During the year ended September 30, 2025, 590,366 shares granted were issued out of treasury stock.

On November 18, 2025, Griffon granted 147,141 shares of restricted stock to 29 executives and key employees, subject to certain performance conditions, with a vesting period of thirty-six months, with a total fair value of $9,855, or a weighted average fair value of $66.86 per share. Griffon also granted 531,456 shares of restricted stock to four senior executives with a vesting period of thirty-six months and a two-year post-vesting holding period, subject to the achievement of certain performance criteria and market conditions relating to required levels of return on invested capital and the relative total shareholder return of Griffon's common stock as compared to a market index. So long as the minimum performance and market conditions are attained, the amount of shares that can vest will range from a minimum of 88,578 to a maximum of 531,456, with the target number of shares being 177,152. The total estimated fair value of these restricted shares, assuming achievement of the performance and market conditions at target, is $15,073, or a weighted average fair value of $85.09 per share (based on the target number of shares).

On November 12, 2024, the Board of Directors approved an increase of $400,000 to Griffon's share repurchase authorization. Under the authorized share repurchase program, the Company may, from time to time, purchase shares of its common stock in the open market, including pursuant to a 10b5-1 plan, pursuant to an accelerated share repurchase program or issuer tender offer, or in privately negotiated transactions. During the year ended September 30, 2025, Griffon purchased 1,897,182 shares of common stock under the repurchase program, for a total of $134,680, or $70.99 per share, excluding excise taxes of $1,329. As of September 30, 2025, $298,013 remained available for the purchase of common stock under these Board authorized repurchase programs.

On February 20, 2024, Griffon repurchased 1,500,000 shares of its common stock, par value $0.25 per share, pursuant to a stock purchase and cooperation agreement executed by the Company and Voss Value Master Fund, L.P., Voss Value-Oriented Special Situations Fund, L.P and four separately managed accounts of which Voss Capital, LLC is the investment manager, in a private transaction. The purchase price per share was $65.50, for an aggregate purchase price of $98,250.

During the year ended September 30, 2025, 583,978 shares, with a market value of $45,284, or $77.54 per share, were withheld to settle employee taxes due upon the vesting of restricted stock, and were added to treasury stock. This excludes excise tax benefits of $528 for the year ended September 30, 2025.

During the year ended September 30, 2025, we accrued $1,329 in connection with the share repurchases described above, which was partially offset by the reversal of $528 of excise taxes to adjust for a benefit related to employee vesting and a $107 net benefit on ESOP contributions. As of September 30, 2025, $694 was accrued for excise taxes related to employee share repurchases.

NOTE 16—COMMITMENTS AND CONTINGENCIES

Purchase Commitments

Purchase obligations are generally for the purchase of goods and services in the ordinary course of business. Griffon uses blanket purchase orders to communicate expected requirements to certain vendors. Purchase obligations reflect those purchase orders where the commitment is considered to be firm. Amounts purchased under such commitments were $218,603, $159,362 and $184,422 for the years ended September 30, 2025, 2024 and 2023, respectively. Aggregate future minimum purchase obligations at September 30, 2025 are $218,344 in 2026, $789 in 2027, $376 in 2028, $218 in 2029, $178 in 2030 and $0 thereafter.

Legal and environmental

Peekskill Site. Lightron Corporation ("Lightron"), a wholly-owned subsidiary of Griffon, once conducted lamp manufacturing and metal finishing operations at a location in the Town of Cortlandt, New York, just outside the city of Peekskill, New York (the "Peekskill Site") which was owned by ISC Properties, Inc. ("ISCP"), a wholly-owned subsidiary of Griffon, for approximately three years. ISCP sold the Peekskill Site in November 1982.

Based upon studies conducted by ISCP and the New York Department of Environmental Conservation, soils and groundwater beneath the Peekskill Site contain chlorinated solvents and metals. Stream sediments downgradient from the Peekskill Site also contain metals. On May 15, 2019 the United States Environmental Protection Agency ("EPA") added the Peekskill Site to the National Priorities List under CERCLA and has since reached agreement with Lightron and ISCP pursuant to which Lightron and ISCP will perform a Remedial Investigation/Feasibility Study ("RI/FS"). Performance of the RI/FS is expected to be completed in 2027.

Lightron has not engaged in any operations in over three decades. ISCP functioned solely as a real estate holding company and has not held any real property in over three decades. Griffon does not acknowledge any responsibility to perform any investigation or remediation at the Peekskill Site. Lightron and ISCP are being defended by an insurance company, subject to a reservation of rights, and the insurance company is paying the costs of the RI, with Lightron and ISCP paying for the FS.

Memphis, TN site. Hunter Fan Company ("Hunter") operated headquarters and a production plant in Memphis, TN for over 50 years (the "Memphis Site"). While Hunter completed certain on-site remediation of PCB-contaminated soils, Hunter did not investigate the extent to which PCBs existed beneath the building itself nor determine whether off-site areas had been impacted. Hunter vacated the site approximately twenty years ago, and the on-site buildings have now been demolished.

The State of Tennessee Department of Environment and Conservation ("TDEC") identified the Memphis site as being potentially contaminated, raising the possibility that site operations could have resulted in soil and groundwater contamination involving volatile organic compounds and metals. In 2021, the TDEC performed a preliminary assessment of the site and recommended to the EPA that it include the site on the National Priorities List established under CERCLA. The TDEC further recommended that the EPA fund an investigation of potential soil gas contamination in receptors near the site. The TDEC has also indicated that it will proceed with this investigation if the EPA does not act. Since 2021, there has been no further action by the EPA or TDEC relating to the Memphis site.

It is unknown whether the EPA will add the Memphis Site to the National Priorities List, whether a site investigation will reveal contamination and, if there is contamination, the extent of any such contamination. However, given that certain PCB work was not completed in the past and the TDEC's

stated intent for the EPA to perform an investigation (and the statement by the TDEC that it will perform the investigation if the EPA will not), liability is probable in this matter. There are other potentially responsible parties for this site, including a former owner of Hunter; Hunter has notified such former owner of this matter.

If the EPA decides to add this site to the National Priorities List, a Remedial Investigation/Feasibility Study ("RI/FS") will be required. Hunter expects that the EPA will ask it to perform this work. If Hunter does not reach an agreement with the EPA to perform this work, the EPA will implement the RI/FS on its own. Should the EPA implement the RI/FS or perform further studies and/or subsequently remediate the site without first reaching an agreement with one or more relevant parties, the EPA would likely seek reimbursement from such parties, including Hunter, for the costs incurred.

General legal

Griffon is subject to various laws and regulations relating to the protection of the environment and is a party to legal proceedings arising in the ordinary course of business. Management believes, based on facts presently known to it, that the resolution of the matters above and such other matters will not have a material adverse effect on Griffon's consolidated financial position, results of operations or cash flows.

NOTE 17—EARNINGS PER SHARE

Basic EPS was calculated by dividing income available to common shareholders by the weighted average number of shares of common stock outstanding during the period. Diluted EPS was calculated by dividing income available to common shareholders by the weighted average number of shares of common stock outstanding plus additional common shares that could be issued in connection with stock-based compensation.

The following table is a reconciliation of the share amounts (in thousands) used in computing basic and diluted EPS for 2025, 2024 and 2023:

	2025	2024	2023
Common shares outstanding	46,346	48,303	53,062
Unallocated ESOP shares	—	(18)	(196)
Non-vested restricted stock	(1,593)	(2,336)	(3,111)
Impact of weighted average shares	601	1,624	2,356
Weighted average shares outstanding—basic	45,354	47,573	52,111
Incremental shares from stock based compensation	1,331	2,095	2,501
Weighted average shares outstanding—diluted	46,685	49,668	54,612

Shares of the ESOP that have been allocated to employee accounts are treated as outstanding in determining earnings per share.

NOTE 18—RELATED PARTIES

On February 20, 2024, Griffon entered into a stock purchase and cooperation agreement to repurchase, and repurchased, 1,500,000 shares of its common stock, par value $0.25 per share, beneficially owned by four separately managed accounts of which Voss Capital, LLC is the investment manager (the "Selling Shareholders"), in a private transaction. The purchase price per share was approximately $65.50, for an aggregate purchase price of $98,250. The Selling Shareholders are affiliates of Voss Capital, LLC. Travis

W. Cocke, the Founder, Chief Investment Officer and Managing Member of Voss Capital, LLC, was formerly a member of the Board of Directors of the Company. Pursuant to the stock purchase and cooperation agreement, Mr. Cocke resigned as a member of the Board on February 20, 2024.

On September 5, 2023 Griffon entered into a stock purchase agreement to repurchase 400,000 shares of its common stock, par value $0.25 per share, beneficially owned by two separately managed accounts of which Voss Capital, LLC is the investment manager (the "Selling Shareholders"), in a private transaction to facilitate redemptions by investors in the Selling Shareholders. The purchase price per share was approximately $41.87, for an aggregate purchase price of $16,746. The Selling Shareholders are affiliates of Voss Capital, LLC. Travis W. Cocke, the Founder, Chief Investment Officer and Managing Member of Voss Capital, LLC, was formerly a member of the Board of Directors of the Company.

NOTE 19—REPORTABLE SEGMENTS

Griffon conducts its operations through two reportable segments, as follows:

- Home and Building Products ("HBP") conducts its operations through Clopay Corporation ("Clopay"). Founded in 1964, Clopay is the largest manufacturer and marketer of garage doors and rolling steel doors in North America. Residential and commercial sectional garage doors are sold through professional dealers and leading home center retail chains throughout North America under the brands Clopay, Ideal, and Holmes. Rolling steel door and grille products designed for commercial, industrial, institutional, and retail use are sold under the Clopay, Cornell and Cookson brands.
- Consumer and Professional Products ("CPP") is a global provider of branded consumer and professional tools; residential, industrial and commercial fans; home storage and organization products; and products that enhance indoor and outdoor lifestyles. CPP sells products globally through a portfolio of leading brands including AMES, since 1774, Hunter, since 1886, True Temper, and ClosetMaid.

Information on Griffon's reportable segments from continuing operations is as follows:

	For the Years Ended September 30,		
	2025	2024	2023
Revenue			
Home and Building Products	$1,584,182	$1,588,625	$1,588,505
Consumer and Professional Products	935,744	1,034,895	1,096,678
Total revenue	$2,519,926	$2,623,520	$2,685,183

Griffon defines our reportable segments based on the way the Chief Operating Decision Maker ("CODM"), which is our Chief Executive Officer, manages the operations of the Company for purposes of allocating resources and assessing segment performance. The CODM evaluates performance and allocates resources based on segment adjusted EBITDA, a non-GAAP measure, defined as income before taxes, excluding interest income and expense, depreciation and amortization, strategic review charges, non-cash impairment charges, restructuring charges, gain/loss from debt extinguishment, and acquisition related expenses, as well as other items that may affect comparability, as applicable. Segment adjusted EBITDA also excludes unallocated amounts, mainly corporate overhead. Griffon believes this information is useful to its investors for the same reason.

The following table provides a reconciliation of segment adjusted EBITDA to income before taxes:

	Home and Building Products			Consumer and Professional Products		
	For the Years Ended September 30,			For the Years Ended September 30,		
	2025	2024	2023	2025	2024	2023
Revenue	$1,584,182	$1,588,625	$1,588,505	$ 935,744	$1,034,895	$1,096,678
Adjusted costs of goods and services[1]	(819,944)	(819,784)	(818,020)	(641,977)	(747,504)	(836,314)
Adjusted selling, general and administrative expenses[2]	(287,237)	(282,875)	(274,163)	(258,148)	(262,571)	(263,559)
Depreciation and amortization	17,592	15,349	15,066	44,856	44,797	49,811
Other segment items[3]	(17)	(314)	(512)	5,070	3,015	3,727
Segment Adjusted EBITDA[4]	$ 494,576	$ 501,001	$ 510,876	$ 85,545	$ 72,632	$ 50,343

	For the Years Ended September 30,		
	2025	2024	2023
Segment Adjusted EBITDA:			
Home and Building Products	$ 494,576	$ 501,001	$ 510,876
Consumer and Professional Products	85,545	72,632	50,343
Segment Adjusted EBITDA	580,121	573,633	561,219
Unallocated amounts, excluding depreciation[5]	(57,828)	(60,031)	(55,887)
Net interest expense	(93,857)	(101,652)	(99,351)
Depreciation and amortization	(63,014)	(60,704)	(65,445)
Goodwill and intangible asset impairments	(243,612)	—	(109,200)
Impact of retirement plan events	1,165	—	—
Gain (loss) on sale of real estate	8,279	(61)	12,655
Strategic review—retention and other	(3,883)	(10,594)	(20,225)
Restructuring charges	—	(41,309)	(92,468)
Debt extinguishment, net	—	(1,700)	(437)
Acquisition costs	—	(441)	—
Fair value step-up of acquired inventory sold	—	(491)	—
Special dividend ESOP charges	—	—	(15,494)
Proxy expenses	—	—	(2,685)
Income before taxes	$ 127,371	$ 296,650	$ 112,682

(1) Adjusted costs of goods and services excludes restructuring and other costs and acquisition related expenses, and includes depreciation and amortization.

(2) Adjusted selling, general and administrative expenses excludes strategic review - retention and other expenses, special dividend ESOP charges, restructuring and other costs, and goodwill and intangible asset impairments, and includes depreciation and amortization.

(3) The Other segment items category includes rental income, foreign exchange gains/losses and other miscellaneous expenses.

(4) Segment Adjusted EBITDA includes other income and excludes depreciation, amortization and normalized items.

(5) Unallocated amounts mainly consists of corporate overhead costs maintained at the corporate level, which is not allocated to the business segments. These expenses include equity-based compensation

costs, expenses relating to treasury, accounting, consulting, advisory, legal, tax and audit, insurance, financial reporting services and various administrative expenses related to the corporate headquarters.

	For the Years Ended September 30,		
	2025	2024	2023
Depreciation and Amortization			
Segment:			
Home and Building Products	$17,592	$15,349	$15,066
Consumer and Professional Products	44,856	44,797	49,811
Total segment depreciation and amortization	62,448	60,146	64,877
Corporate	566	558	568
Total consolidated depreciation and amortization	$63,014	$60,704	$65,445
Capital Expenditures			
Segment:			
Home and Building Products[1]	$30,200	$41,765	$24,065
Consumer and Professional Products[2] [3]	17,385	26,330	39,476
Total segment	47,585	68,095	63,541
Corporate[4]	4,850	304	63
Total consolidated capital expenditures	$52,435	$68,399	$63,604

(1) During the year ended September 30, 2023, HBP's capital expenditures included approximately $6,000 in connection with the purchase of HBP's Mason headquarters.

(2) During the year ended September 30, 2023, CPP's capital expenditures included approximately $23,207 in connection with the purchase of CPP's Ocala, Florida manufacturing facility.

(3) During the years ended September 30, 2025, 2024 and 2023, CPP capital expenditures excludes proceeds from the sale of real estate and equipment of approximately $17,729, $13,271 and $8,900, respectively.

(4) During the year ended September 30, 2023, Corporate's capital expenditures exclude proceeds from the sale of real estate of approximately $11,800.

	At September 30, 2025	At September 30, 2024
Assets		
Segment assets:		
Home and Building Products	$ 770,072	$ 737,992
Consumer and Professional Products[1]	1,164,957	1,495,489
Total segment assets	1,935,029	2,233,481
Corporate	122,607	133,408
Total continuing assets	2,057,636	2,366,889
Other discontinued operations	6,001	4,065
Consolidated total	$2,063,637	$2,370,954

(1) In connection with the expansion of CPP's global sourcing strategy, certain owned manufacturing locations which concluded operations have met the criteria to be classified as held for sale as of September 30, 2025. The aggregate net book value of these properties as of September 30, 2025 totaled $5,609.

The Company's long-lived assets are concentrated primarily in the United States, which accounted for approximately 84% and 85% of the Company's total long-lived assets as of September 30, 2025 and 2024, respectively. No foreign country accounted for more than 10% of the Company's total long-lived assets as of September 30, 2025 and 2024.

Disaggregation of Revenue

Revenue from contracts with customers is disaggregated by end markets, segments and geographic location, as it more accurately depicts the nature and amount of the Company's revenue.

	For the Years Ended September 30,		
	2025	2024	2023
Residential repair and remodel[1]	$ 771,585	$ 769,691	$ 757,088
Commercial	676,626	684,388	700,112
Residential new construction[1]	135,971	134,546	131,305
Total Home and Building Products	1,584,182	1,588,625	1,588,505
Residential repair and remodel	$ 289,091	$ 352,797	$ 377,775
Retail	170,838	234,591	267,046
Residential new construction	55,367	57,537	51,093
Industrial	72,352	67,738	78,308
International excluding North America	348,096	322,232	322,456
Total Consumer and Professional Products	935,744	1,034,895	1,096,678
Total Revenue	$2,519,926	$2,623,520	$2,685,183

(1) The breakout between residential new construction and residential repair and remodel contains certain management assumptions, such as customer and product type.

The following table presents revenue disaggregated by geography based on the location of the Company's customer:

	For the Year Ended September 30, 2025		
	Home and Building Products	Consumer and Professional Products	Total
Revenue by Geographic Area—Destination			
United States	$1,523,828	$516,273	$2,040,101
Europe	—	41,768	41,768
Canada	49,458	62,573	112,031
Australia	—	289,018	289,018
All other countries	10,896	26,112	37,008
Total Revenue	$1,584,182	$935,744	$2,519,926

	For the Year Ended September 30, 2024		
	Home and Building Products	Consumer and Professional Products	Total
Revenue by Geographic Area—Destination			
United States	$1,519,063	$ 638,782	$2,157,845
Europe	112	52,933	53,045
Canada	60,995	67,375	128,370
Australia	—	251,778	251,778
All other countries	8,455	24,027	32,482
Total Revenue	$1,588,625	$1,034,895	$2,623,520

	For the Year Ended September 30, 2023		
	Home and Building Products	Consumer and Professional Products	Total
Revenue by Geographic Area—Destination			
United States	$1,515,479	$ 716,098	$2,231,577
Europe	18	51,041	51,059
Canada	62,897	75,477	138,374
Australia	—	231,764	231,764
All other countries	10,111	22,298	32,409
Total Revenue	$1,588,505	$1,096,678	$2,685,183

As a percentage of segment revenue, HBP sales to The Home Depot approximated 9%, 8% and 9% in 2025, 2024 and 2023, respectively; CPP sales to The Home Depot approximated 12%, 15% and 15% in 2025, 2024 and 2023, respectively.

As a percentage of Griffon's consolidated revenue, sales to The Home Depot approximated 10%, 11% and 12% in 2025, 2024 and 2023, respectively.

NOTE 20—OTHER INCOME (EXPENSE)

For the years ended September 30, 2025, 2024 and 2023, Other income (expense) of $6,672, $1,766 and $2,928, respectively, includes $474, ($333) and $302, respectively, of net currency exchange transaction gains (losses) from receivables and payables held in non-functional currencies, ($948), $148 and $469, respectively, of net gains (losses) on investments, and $5,411, ($137) and ($866), respectively, of net periodic benefit plan income (expense) For the year ended September 30, 2025, net periodic benefit plan income (expense) of $5,411 includes a gain of $4,621 associated with the termination of the Hunter Fan Pension Plan and a charge of $951 related to the establishment of a new retiree medical plan. Other income (expense) also includes royalty income of $2,201, $2,198 and $2,104 for the years ended September 30, 2025, 2024 and 2023, respectively.

NOTE 21—OTHER COMPREHENSIVE INCOME (LOSS)

The amounts recognized in other comprehensive income (loss) were as follows:

	Years Ended September 30,								
	2025			2024			2023		
	Pre-tax	Tax	Net of tax	Pre-tax	Tax	Net of tax	Pre-tax	Tax	Net of tax
Foreign currency translation adjustments	$ (6,569)	$ —	$ (6,569)	$10,137	$ —	$10,137	$ 8,447	$ —	$ 8,447
Pension and other defined benefit plans	(10,584)	2,223	(8,361)	1,947	(409)	1,538	8,418	(1,784)	6,634

Tax	159	750	441
Net of tax	$ (600)	$(2,821)	$(1,658)

NOTE 22—LEASES

The Company recognizes right-of-use ("ROU") assets and lease liabilities on the balance sheet, with the exception of leases with a term of twelve months or less. The Company determines if an arrangement is a lease at inception. The ROU assets and short and long-term liabilities associated with our Operating leases are shown as separate line items on our Consolidated Balance Sheets. Finance leases are included in property, plant, and equipment, net, accrued liabilities, and other liabilities on our Consolidated Balance Sheets. The Company's finance leases are immaterial. ROU assets, along with any other related long-lived assets, are periodically evaluated for impairment.

ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. ROU assets and liabilities are recognized at the lease commencement date based on the present value of lease payments over the lease term. Lease payments primarily include rent and insurance costs (lease components). The Company's leases also include non-lease components such as real estate taxes and common-area maintenance costs. The Company elected the practical expedient to account for lease and non-lease components as a single component. In certain of the Company's leases, the non-lease components are variable and in accordance with the standard are therefore excluded from lease payments to determine the ROU asset. As most of our leases do not provide an implicit rate, we use our incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments. We use the implicit rate when readily determinable. Our determination of the lease term may include options to extend or terminate the lease when it is reasonably certain that we will exercise that option.

For operating leases, fixed lease payments are recognized as operating lease cost on a straight-line basis over the lease term. For finance leases and impaired operating leases, the ROU asset is depreciated on a straight-line basis over the remaining lease term, along with recognition of interest expense associated with accretion of the lease liability. For leases with a lease term of 12 months or less (a "Short-term" lease), any fixed lease payments are recognized on a straight-line basis over such term, and are not recognized on the Consolidated Balance Sheets. Variable lease cost for both operating and finance leases, if any, is recognized as incurred. Components of operating lease costs are as follows:

	For the Year Ended September 30,		
	2025	2024	2023
Fixed	$46,995	$46,575	$45,993
Variable[(a), (b)]	10,580	9,772	10,654
Short-term[(b)]	5,163	4,997	7,717
Total	$62,738	$61,344	$64,364

(a) Primarily related to common-area maintenance and property taxes.

(b) Not recorded on the balance sheet.

Supplemental cash flow information were as follows:

	For the Year Ended September 30,		
	2025	2024	2023
Cash paid for amounts included in the measurement of lease liabilities:			
Operating cash flows from operating leases	$43,496	$45,439	$41,533
Financing cash flows from finance leases	154	291	2,164
Total	$43,650	$45,730	$43,697

Supplemental Consolidated Balance Sheet information related to leases were as follows:

	As of September 30,	
	2025	2024
Operating Leases:		
Right of use assets:		
Operating right-of-use assets	$167,829	$171,211
Lease Liabilities:		
Current portion of operating lease liabilities	$ 32,307	$ 35,065
Long-term operating lease liabilities	147,203	147,369
Total operating lease liabilities	$179,510	$182,434
Finance Leases:		
Right of use assets:		
Property, plant and equipment, net[1]	$ 430	$ 808
Lease Liabilities:		
Notes payable and current portion of long-term debt	$ 102	$ 155
Long-term debt, net	149	255
Total financing lease liabilities	$ 251	$ 410

(1) For the years ended September 30, 2025 and 2024, finance lease assets are recorded net of accumulated depreciation of $1,399 and $1,463, respectively.

On September 28, 2023, the Company closed on the exercise of its lease purchase option, as permitted under the lease agreement, to acquire ownership of the manufacturing facility located in Ocala, Florida for a cash purchase price of $23,207. The Ocala lease had a maturity date in 2025 and bore interest at a fixed rate of approximately 5.6%. As a result of exercising the purchase option, the Company no longer has any future lease obligations related to this real estate. The remaining lease liability balance relates to finance equipment leases.

The aggregate future maturities of lease payments for operating leases and finance leases as of September 30, 2025 are as follows (in thousands):

	Operating Leases	Finance Leases
2026	$ 41,883	$116
2027	38,045	54
2028	32,428	49
2029	27,195	50
2030	19,593	12
Thereafter	60,825	—
Total lease payments	219,969	281
Less: imputed interest	(40,459)	(30)
Present value of lease liabilities	$179,510	$251

Average lease terms and discount rates were as follows:

	As of September 30,	
	2025	2024
Weighted-average remaining lease term (years)		
Operating Leases	6.6	7.1
Finance Leases	3.6	4.2
Weighted-average discount rate		
Operating Leases	6.19%	6.33%
Finance Leases	6.76%	6.70%

SCHEDULE II

GRIFFON CORPORATION

VALUATION AND QUALIFYING ACCOUNTS

For the Years Ended September 30, 2025, 2024 and 2023
(in thousands)

Description	Balance at Beginning of Year	Additions	Reductions	Other	Balance at End of Year

(1) In connection with the Company's restructuring activities described in Note 10—Restructuring Charges, during the years ended September 30, 2024 and 2023, CPP recorded inventory impairment charges of $23,763 and $37,100, respectively, to adjust inventory to its net realizable value.

Item 9. ***Changes in and Disagreements with Accountants on Accounting and Financial Disclosure***

Not applicable.

Item 9A. ***Controls and Procedures***

Evaluation and Disclosure Controls and Procedures

Griffon's management, with the participation of its Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the design and operation of Griffon's disclosure controls and procedures, as defined by Exchange Act Rule 13a-15(e). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of September 30, 2025, Griffon's disclosure controls and procedures were effective.

Management's Report on Internal Control over Financial Reporting

Griffon's management is responsible for establishing and maintaining adequate internal control over financial reporting. Griffon's internal control over financial reporting is a process designed under the supervision of its Chief Executive Officer and Chief Financial Officer to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Griffon's financial statements for external reporting in accordance with accounting principles generally accepted in the United States of America. Management evaluates the effectiveness of Griffon's internal control over financial reporting using the criteria set forth by the 2013 Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework. Management, under the supervision and with the participation of Griffon's Chief Executive Officer and Chief Financial Officer, assessed the effectiveness of Griffon's internal control over financial reporting as of September 30, 2025 and concluded that it is effective.

Griffon's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Griffon's internal control over financial reporting includes those policies and procedures that:

(i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of Griffon's assets;

(ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that Griffon's receipts and expenditures are being made only in accordance with authorizations of Griffon's management and directors; and

(iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of Griffon's assets that could have a material effect on the financial statements.

Management, including Griffon's Chief Executive Officer and Chief Financial Officer, does not expect that Griffon's internal controls will prevent or detect all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of internal controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. Also, any evaluation of the effectiveness of controls in future periods is subject to the risk that those internal controls may become inadequate because of changes in business conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Griffon’s independent registered public accounting firm, Grant Thornton LLP, has audited the effectiveness of Griffon’s internal control over financial reporting as of September 30, 2025, and has expressed an unqualified opinion in their report which appears in this Annual Report on Form 10-K.

Changes in Internal Controls

There were no changes in Griffon’s internal control over financial reporting that occurred during the fourth quarter of the year ended September 30, 2025 that have materially affected, or are reasonably likely to materially affect, the registrant’s internal control over financial reporting.

Item 9B. ***Other Information***

Rule 10b5-1 Trading Plans

During the fiscal quarter ended September 30, 2025, none of our directors or executive officers adopted or terminated any contract, instruction or written plan for the purchase or sale of our securities to satisfy the affirmative defense conditions of Rule 10b5-1(c) or any “non-Rule 10b5-1 trading arrangement.”

Item 9C. ***Disclosure Regarding Foreign Jurisdictions that Prevent Inspections.***

None.

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, Griffon has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized on the 19th day of November 2025.

GRIFFON CORPORATION

By: /s/ RONALD J. KRAMER

Ronald J. Kramer,
Chief Executive Officer

Pursuant to the requirements of the Securities Exchange Act of 1934, this report has been signed below on November 19, 2025 by the following persons on behalf of the Registrant in the capacities indicated:

Signature	Title
/s/ RONALD J. KRAMER Ronald J. Kramer	Chairman of the Board and Chief Executive Officer (Principal Executive Officer)

Exhibit 31.1

Certification

I, Ronald J. Kramer, certify that:

1. I have reviewed this annual report on Form 10-K of Griffon Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: November 19, 2025
